Topic: 3 Message: 3

Guys;
Due to our need for a place to meet for the December meeting, I would like to offer a suggestion. It of course is subject to the approval of Steve (Hancock)but since he is having difficulties in setting up his microphone for use with PalTalk, we could meet at his place and try to get him up and talking. Just an idea. Respond with your approvals or dis-approvals. Expecially Steve.

Actually, we have a place for December at the Galleria, if I understood Steve B. correctly. It is after December where we lose the community room at the Galleria. Busch is checking into a community room at the West Manchester Mall, Dick is checking with a mall up north, and the rest of us are just kinda brainstorming right now. We'll come up with something!

7. Meeting place

Yahoo group: CPMA
Date: 1999-12-10 17:16:54 UTC
From: yorkfd@xxxx.xxx
Topic: 7 Message: 7

I figured I better go back and double check Busch's original message to make sure I didn't misinterpret it as well. His original message states:

> I got a letter from the mall that said they have rented the community
> room space and will not make a space availble to the community in the
> early part of 2000. Our last use date will be Dec 1999.

So it appears that we're good for December, but January will be somewhere else.

Busch, did you contact the West Manchester Mall yet?

Greg

Community Room, Galleria Mall, second floor, York, PA

9. Communications Problems

Yahoo group: CPMA
Date: 1999-12-13 12:54:50 UTC
From: KPA3MT@aol.com
Topic: 9 Message: 9

Due to the communication difficulties in the IRC meeting on Dec 12, 1999 at 2000 hrs. I think that other options should be considered. I had removed the AOL Instant Messenger several weeks ago because it was taking up valuable disk space and wasn't being used. I have now re-downloaded it. Greg and I were having a very short discussion after the meeting, and we both agreed that another medium for the weekly meetings must be addressed. I myself am getting tired of having difficulty just getting connected through IRC. Apparently you others are having other types of problems also.

Since this still is a Democratic Society, I vote scrapping IRC mode of communicating. If I were to make a suggestion as to what direction we should turn, I would suggest the AOL Instant Messenger. It's certainly more reliable and most of us have it already anyway. Those that don't haven't exactly been frequent attendees of the meeting anyway, but maybe that could be linked to the problems that IRC is posing. I am open to suggestions, as next week approaches fast.

From: yorkfd@xxxx.xxx
Topic: 9 Message: 10

But next week we are at the Galleria! That gives us two weeks to plan.

Since the topic is "on the floor," and since you mentioned the turnout, or lack thereof, at the chats, I wonder if the weekly chat is still a necessity? Dave (KPA3MT), SteveH and I seem to be the only "regular" attendees at the chat, with occasional visits from DaveB and SteveB. And we actually do very little chatting during that hour we are all on-line together,

Perhaps, we can use this mailing list as a substitute for the weekly chats, as we can share information with each other by sending a single e-mail to a single address which goes to everyone subscribed to the list. Which, by the way, presently consists of five of us:

Greg Halpin
Steve Hancock
Dave Bortzfield
Steve Busch
Dick Heintzelman (sp?)

We may need to encourage some of the others to subscribe to the e-mail list. Two notables missing are Mike Schiding and Dave Bennett. Any others Steve? Perhaps an e-mail to those on your list that you send CPMA info to inviting them to join?

The regulars all have AOL's Instant Messenger installed so we can still "chat" with each other if we happen to be on-line.

On a somewhat separate topic: what did everyone think of the e-mail reminder that the list server sent out about the meeting? I put the meeting date into a calendar on the server, with it set to send an e-mail reminder one week prior to the event. I think another reminder is set to come out Thursday or Friday.

Commenst anyone?

Greg

If this list works out well I would be willing to drop the chat services
also. IM chat software could be a problem with people that own
a MAC or other PC's/

I will go thru my email list and see what names are on it. We could
move these people over to the list or I guess I should send out a
notice about the changes and people who dont like it we wont
transfer over.

I'd feel much more comfortable if we "invited" them to join the list,
give them all the information they need to join it, and leave the
decision to them. I'd rather not "force" someone to join the list if
they're not interested in it.

I realize we have some procrastinators who we'll probably have to drag
there to get them on the list, but hey, we got Busch to sign up on his
own!

I wasn't even sure I could add someone to the list without their
permission without going to onelist.com to see if I could. It has the
ability to do so, but even they recommend that people approve being added
to the mailing list.

IM chat software could be a problem with people that own > a MAC or other PC's/ > Well I would at least vote to give the AOL Instant Messenger Chats a try for maybe a month. If problems still arise then I would be agreeable to scrap the weekly chats. Give me a break here, I re-downloaded AOL Instant Messenger and Netzero again because I was having so difficulty getting the IMer to work while still online with AOL. If however during several tests that I will perform using Netzero and AOL IM, I find that no problems exist, I would at least like to try continuing the chats for an additional month. As I stated before, one possible reason for the lack of participation could be the unreliability of IRC. Secondary note: AOL Instant Messenger can be downloaded for use with a MAC. From: KPA3MT@xxx.xxx
Topic: 17 Message: 17

CPMA Members; In response to several messages ago regarding the lack of participation in the weekly chats, besides IRC problems that might be contributing to the low turnout; it could also (maybe) be the time that chat is scheduled for. Perhaps a poll could be taken for an alternate time perhaps 1900 instead of 2000. Since we have two weeks before the next chat would normally occur there is plenty of time to gather ideas about changing the schedule. Just a thought. From the Monitoring Station Of KPA3MT@... A welcome to Mike Schiding, who brings our total subscribers to six!

Newsletters are at the publishers (Busch) and should be at the meeting on Sunday for distribution.

A tidbit for York area members: 154.370 is a tactical channel licensed by Manchester Twp. FD for use by the greater York area departments. Manchester Twp. is the only one I've heard use it so far, and they use it quite extensively. I listened to them use it during a live fire training session last Sunday afternoon, and it sounded like they were operating at an actual fire. A contact at the FD tells me they will be doing another live burn on Wednesday, December 29th, during the day. Listen for comms on this channel again. The location for the live burn is the old Bruall farm, on Church Rd. off of N. George St. Extd. in Manchester Twp. (in your neck of the woods Steve H.).

See you on Sunday!

Greg

Hello gang!

As I head off to work on the afternoon of Christmas Eve, I decided to take a quick pause to wish all of you, and your families, a very safe and happy holiday!

Keep the scanners on, and I hope you don't hear me on them tonight!

Greg

From: Steve Hancock
Topic: 34 Message: 34

Today it was announced that the new Amateur Restructuring is here.

Code speed for all HF privages is now 5 wpm.
The 3 new amateur classes are Technician, General, and Amateur Extra.

Check out

http://www.arrl.org/news/restructuring/

for more details of the restructuring.

I have some mix feelings about the changes but
will be upgrading.

Steve

38. New mobile trunktracker

Yahoo group: CPMA
Date: 1999-12-31 23:24:08 UTC
From: Steve Hancock
Topic: 38 Message: 38

Here is some new information on the new Uniden Trunktracker mobile coming out.

It has my interest! I do need a new mobile scanner.

THE UNIDEN BEARCAT 780XLT
"THE WORLD'S MOST ADVANCED MOBILE SCANNER"

- 500 channels (10 banks of 50 channels)
- 7" Wide 2" High
- Frequency coverage: 25-512, 806-1300 (excludes cellular)
- Trunktracker III:
Motorola (Type II: 800, 900, UHF, VHF)
Motorola (Type I: 800)
EDACS (Ericsson) (800, 900)
LTR (Johnson)
I Call (Emergency Alert)
- Alpha-numerics: 2 lines of text for channel and bank names
- CTCSS and DCS: tone decoding and tone search/find
- VFO Knob
- 10 Search ranges (can be searched contiguously) with alpha tag names
- Computer control, cloning, and Smart Scanner (R)
- Menu driven keyboard (backlit)
- Service Search (includes CB with CB channel #'s)
- Weather Alert: SAME decoding with FIPS codes
- Attenuate: individual channel
- Control channel only mode for trunktracking (enter only the Control channel and it figures out the rest)
- Auxiliary mode for individual channel recording
- Status Bit and Squelch Detect for Motorola trunking
- Delay: 0,1,2, or 4 seconds (individual channel)
- AM/FM/WFM modes selectable per channel
- Beep alert (any channel)

47. this month's meeting

Yahoo group: CPMA
Date: 2000-01-11 00:37:08 UTC
From: yorkfd@xxxx.xxx
Topic: 47 Message: 47

OK gang, I've secured a meeting place for this month.

The meeting will be held at the Lincoln Fire Co. No. 9 at 800 Roosevelt Avenue, cross street of Maryland Ave. For those of you that have been in the area, it's the fire station about halfway between my house and Bush's house.

Directions for out-of-towners:

Rt. 30 westbound to Pennsylvania Avenue (Burger King & Rutter's store on the left, just past Friendly's on the right). Turn left onto Pennsylvania Avenue. Go two signal lights (about 1 mile) to Roosevelt Avenue. Turn right onto Roosevelt Avenue. Go one block to Maryland Avenue. Fire station is on the left at the intersection. Turn left, and park to the rear of the station, and enter the rear door. There is a meeting room in the back.

We have the room from 1:00 to 3:00 or so. There is a group that has the room rented, and they will be in around 4:00. If they show earlier than that, we'll have to move to the basement if we wish to continue.

We should still look for a permanent meeting place, but this one will do in a pinch.

Greg

Just a quick note to all of you coming to the meeting tomoroow at the new location.

Use the door that sits back, to the right of the wheelchair ramp door. That's the door I have a key to.

Topic: 71 Message: 71

OK gang ... it's soon newsletter time.

I need articles for the newsletter. I have one from Steve Hancock and one expected from Dave Bortzfield. I need some more to fill it out.

At least one of you (THAT MEANS YOU BUSCH) is long overdue on submitting an article!

The sooner the better folks, but absolutely no later than Sunday, March 5th to have them in my e-mail box. Thanks in advance for your articles.

****

Also, I'm sorry to say that I will be unable to attend the weekly chat this weekend. Perhaps Steve will show up on time and take my place.

One of these Sundays, I'd like to try out the chat feature at our Onelist.com page.

Greg

72. Letter from center director

Yahoo group: CPMA
Date: 2000-03-03 01:46:07 UTC
From: yorkfd@juno.com
Topic: 72 Message: 72

As those of you that were at the last meeting might recall, I left a letter for Beth Grove, the director of the Senior Center, just to touch base with her and to see if we could do anything for them. The following is her rpely to me:

Dear Mr. Halpin,

Your note, aftre your meeting was deeply appreciated.

As I always say . . . . as a "Community Center" we never know exactly the kinds of things people may be interested in reading. We'd appreciate some of your newsletters and/or magazines. We re-circulate these items to many of our Home Delivered Meals Clients.

Also, the building was just fine. If you would know of anyone that could help us, even 1x/week to deliver meals it would be GREAT.

We provide training and we could use help the 4th Wednesday of each month or on Fridays.

Thanks and looking forward to working with you, I remain,

Beth Grove
Executive Director
Yorktown Senior Center

****

So gang, if you have any subscriptions that you may want to share with the seniors rather than toss them away, bring them along to the meeting and drop them off. If any one has any time to help them out, let me know and I'll get you in touch with Ms. Grove.

Also, in case you weren't looking, we've just picked up our 15th member to the mailing list at Onelist.com ... now we just need to share information a little more on the list.

And a reminder .... I need articles by Sunday for the newsletter .... help me out gang, I don't have much right now.

Greg

York County EMA primary channel is 453.600, repeated. EMA channel 2 is a talkaround of channel 1. EMA channel three is 453.775, simplex. Tones are DPL 261 on all three.

Oh ... and welcome aboard the list ... it continues to grow!

79. York Fire repeater test

Yahoo group: CPMA
Date: 2000-03-24 02:24:28 UTC
From: yorkfd@juno.com
Topic: 79 Message: 79

OK, as I've mentioned previously, York City Fire will be doing some repeater testing this weekend.

I just received the info you will need if you want to do some monitoring.

The Fire test repeater will be located at the County Court House. Repeater input freq will be 153.7925 and repeater output freq will be 159.1875, with a PL of 7Z (186.2).

In addition, a new repeater was just installed at York Hospital, and we will be running some tests from that site as well. That repeater is input 159.2175, output 154.1525, DPL 023. This is a <<NEW>> York Hospital freq that hasn't gone in service yet!

Fire up that scanners .... this will give you some idea of repeater coverage when we start installing repeaters on some of our fire frequencies!

And ... if you hear Chief 8 ... that's me!

Greg

Will this be the final repeater frequencies when it's totally operational
or are we talking just for testing purposes that these frequencies will be
used.

I'm not sure. I do know that they are "borrowed frequencies" and are not licensed to the city.

Sorry I don't have any more details.

The city fire repeater is using "borrowed frequencies" for the testing only. Frequencies and location will change. York Hospital's system should be the final settings, and should just be waiting to go online.

85. PSP 120 Ch. Radio Plan (Repost)

Yahoo group: CPMA
Date: 2000-03-28 01:26:23 UTC
From: yorkfd@juno.com
Topic: 85 Message: 85

Found the following on the SCAN-PA mailing list, and thought you all might be interested in the info:

From: "Darren North" <northd@...>

This attachment contains one of many PSP 120 Ch. radio plans. This particular radio was used by a vice officer during a prostitution investigation. The trooper advised me that each radio has a particular plan, depending on use and location. The regular patrol officer does not have access to all the TAC channels that vice and drug law have. They have channels available to them that the narcotics and vice guys don't. Also, they may vary from troop to troop on the local use channels. Statewide, most radios of a particular division should be programmed the same, except for the local channels. For example, all L.C.E. radios should be the same, with the only difference being different local usage channels from troop to troop. Other radios, such as Patrol, Drug Law, Intelligence, etc., may have different channel plans. Also, some radios are DVP-capable and others are not.

86. Re: [CPMA] PSP 120 Ch. Radio Plan (Repost)

Yahoo group: CPMA
Date: 2000-03-29 01:16:59 UTC
From: Richard Heintzelman
Topic: 86 Message: 86

HI GREG: Thanks for the PSP data, you will note
that channels 43 to 48 and Dept. of Environmental
Resources relay input channels. Too bad all of
this info will be out dated with the new 800 Mhz
as well as all the good Motorola radios. DICK

87. Fw: [onelist_moderators] Scheduled maintenance

Yahoo group: CPMA
Date: 2000-03-29 02:13:44 UTC
From: yorkfd@juno.com
Topic: 80 Message: 87

--------- Forwarded message ----------
From: admin@onelist.com
To: onelist_moderators@onelist.com
Date: Tue, 28 Mar 2000 22:59:27 -0000
Subject: [onelist_moderators] Scheduled maintenance
Message-ID: <8brdgf+5qsp@egroups.com>

From: admin@onelist.com

Dear ONElist Moderators,

The ONElist Web site will have brief, intermittent outages
due to scheduled maintenance from 6 AM until 2 PM Pacific
Standard Time on Saturday 1st April, 2000

We apologize for any inconvenience this may cause you or
subscribers. Please notify your subscribers of this service
announcement.

Mail delivery will not be affected during this time.
Any mail posted during these hours will be processed in
the regular manner.

Thank you in advance for your patience.

The ONElist Team

88. Scanner Codes

Yahoo group: CPMA
Date: 2000-04-02 18:43:13 UTC
From: yorkfd@juno.com
Topic: 88 Message: 88

Got this off of the centralPAscanner list at onelist.com:

--------- Forwarded message ----------

91. Pozilla Software Closed !!!

Yahoo group: CPMA
Date: 2000-04-18 00:56:17 UTC
From: Peter Kirk
Topic: 91 Message: 91

I just received the following from Melissa Goldman, wife of Adam Goldman, President of Pozilla Software:

Adam wanted me to send you an e-mail. He was hospitalized last Monday with a collapsed lung and the office has been temporarily closed. While the doctors have released him from the hospital, he has been ordered to bed rest for a couple of weeks. In the interim, the office is closed. If you could release a statement that the office is closed and why it is closed, that would be very appreciated. Please let people know that e-mail will be answered at least once a day until his health improves. I am doing the best I can to keep things running like now, but since I do not have the extensive knowledge of scanners and the software that my husband has, I am very limited on what I can reply to. Please assure everyone that Pozilla is still around and we will do our best to facilitate our customers.

Regards,
Melissa
GoldMan

I'm sure I speak for all of us in the scanner community when I offer our heartfelt wishes for a fast recovery, Adam! Take care of yourself and we'll be here, waiting patiently, when the time comes for you to climb back in the saddle!
Rich Wells @ Stongsignals.Net

Reposted for General Info from Strongsignals.net News

Hope Adam Gets well soon....

Subject: [4phun-scan] Test 'Disaster' Sept. 9

Subway Faces Test 'Disaster' Sept. 9
Pittsburgh Post-Gazette
April 19, 2000
Marylynne Pitz
Hundreds of local emergency management officials, police, paramedics and hospital workers will find out Sept. 9 just how prepared they are for disaster. Disaster, in the form of a five-hour training exercise, will strike the Steel Plaza subway station, Downtown, on that date. The exercise will be a learning experience for law enforcement and emergency personnel from Pittsburgh, Allegheny and 12 surrounding counties who have spent the last 18 months preparing to respond to acts of terrorism. The Federal Emergency Management Agency has awarded a $28,000 grant for the exercise. During the past year, law enforcement officers and emergency personnel have attended training sessions that featured discussions about biological terrorism, such as release of anthrax, chemical terrorism, such as the use of mustard gas, and the type of explosion that five years ago today ripped apart the Alfred P. Murrah Federal Building in Oklahoma City.

93. Conflict between Carroll County, MD and new PA trunked systems

Yahoo group: CPMA
Date: 2000-04-29 02:23:46 UTC
From: yorkfd@juno.com
Topic: 93 Message: 93

Found this on the SCAN-DC mailing list:

Wrangling over the radio
Apr 27 2000 12:00AM By Patrick Walters, Times Staff Writer.

Some Carroll County emergency, road and police crews might have to change the radio frequencies they use to avoid interference with a similar statewide radio system Pennsylvania is planning to install.

Pennsylvania could be using a fully-operational 800 Megahertz radio system,
like the one in Carroll, in nearby counties, such as Adams, Lancaster, York
and Franklin, as early as December.

County officials need to make sure Carroll is not using any of the 256 available frequencies that Pennsylvania will be using in neighboring counties. A resolution that would involve Carroll switching some frequencies
is being discussed.

Carroll uses a 800 Megahertz system for groups and agencies across the county, including all of its volunteer fire departments, county road workers, emergency medical services, facilities management and the sheriff's
office.

Frequencies that are close to one another or are the same in two areas can
cause static or other disruptions in communications, said Mike Valentine, a
county communications technical assistant.

Carroll has federal licenses to use nine of the 256 frequencies, so officials are still negotiating a few of those frequencies.

``This seems to have taken forever,'' said Buddy Redman, director of the county's Office of Public Safety. ``But we should be pretty close.''

Donald Appleby, project director with the Governor's Office of Administration in Pennsylvania, agreed.

``There was one frequency that we had some questions on,'' he said. ``I'm really optimistic we're going to reach a solution quickly.''

Appleby said Pennsylvania's statewide project will cost about $222 million,
and he hopes to have the southeast corner of the state - including the counties near Carroll - up and ready by December. The system will have 25,000 users when it's completed for the entire state in 2001.

To resolve the possible interstate conflict by the December target date, Carroll needs to go through the Federal Communications Commission and the Associated Public Communications Officers Inc. to get licenses for several
new frequencies. Redman said he is not sure when exactly the switch would happen. But he added that it would only create minor inconveniences for Carroll's radio users.

``The worst case scenario would be we'll shut down some of the channels and
the others will continue to operate,'' he said.

The county, he said, could also ask some agencies not to communicate by radio during the frequency change.

Carroll has had its 800 Megahertz system since 1997. The county paid Motorola $8 million to build the system.

Redman said Motorola will make the necessary technical changes in the system
for free when the county changes the frequencies.

Mike Law, who was the Motorola project manager for Carroll, said he doesn't
think the company could issue licenses in this region until the frequency issue is resolved. Region 20, includes Maryland, the District of Columbia and six northern counties in Virginia.

94. Fw: [Scan-DC] New Radios for Marines

Yahoo group: CPMA
Date: 2000-04-30 17:48:09 UTC
From: yorkfd@juno.com
Topic: 94 Message: 94

Forwarded from the SCAN-DC list:

--------- Forwarded message ----------

Just got this from the latest edition of the Marine Corps times.....

COMBAT MARINES WILL GET RADIOS

With delivery of new intra squad radios, Marines yelling commands and signaling squad mates by hand may be a thing of the past.

Not a new technology by any means, training for urban warfare convinced
the Corps to buy the SMALL, OFF THE SHELF COMMERCIAL RADIOS for EVERY Marine
in a combat infantry battalion.

The Corps is buying 13,000 radios for 1.5 million.

Made by ICOM America, the radios were MODIFIED TO FUNCTION WITHIN THE MILITARY UHF BANDWITH....

The radios offer NO COMMUNICATIONS SECURITY.....(everything is in the clear).

....the radios are particularly effective in dense undergrowth and urban settings....

Delivery to each Active duty and reserve Infantry Battalion is scheduled
for September and October.

(All caps added).

Sounds like military freq's will be picking up in traffic we can listen to.

Jason

95. President's statement on GPS degradation

Yahoo group: CPMA
Date: 2000-05-02 00:05:48 UTC
From: yorkfd@juno.com
Topic: 95 Message: 95

Got this off of another mailing list ... no confirmation ... caveat emptor!

****

May 1, 2000

STATEMENT BY THE PRESIDENT REGARDING THE UNITED STATES' DECISION TO STOP DEGRADING GLOBAL POSITIONING SYSTEM ACCURACY

THE WHITE HOUSE

Office of the Press Secretary

For Immediate Release May 1, 2000

STATEMENT BY THE PRESIDENT REGARDING
THE UNITED STATES' DECISION TO STOP DEGRADING
GLOBAL POSITIONING SYSTEM ACCURACY

Today, I am pleased to announce that the United States will stop the intentional degradation of the Global Positioning System (GPS) signals available to the public beginning at midnight tonight. We call this degradation feature Selective Availability (SA). This will mean that civilian users of GPS will be able to pinpoint locations up to ten times more accurately than they do now. GPS is a dual-use, satellite-based system
that provides accurate location and timing data to users worldwide.

My March 1996 Presidential Decision Directive included in the goals for GPS
to: "encourage acceptance and integration of GPS into peaceful civil, commercial and scientific applications worldwide; and to encourage private
sector investment in and use of U.S. GPS technologies and services." To meet these goals, I committed the U.S. to discontinuing the use of SA by 2006 with an annual assessment of its continued use beginning this year.

The decision to discontinue SA is the latest measure in an on-going effort
to make GPS more responsive to civil and commercial users worldwide. Last
year, Vice President Gore announced our plans to modernize GPS by adding two
new civilian signals to enhance the civil and commercial service. This

initiative is on-track and the budget further advances modernization by incorporating some of the new features on up to 18 additional satellites that are already awaiting launch or are in production. We will continue to
provide all of these capabilities to worldwide users free of charge.

My decision to discontinue SA was based upon a recommendation by the Secretary of Defense in coordination with the Departments of State, Transportation, Commerce, the Director of Central Intelligence, and other Executive Branch Departments and Agencies. They realized that worldwide transportation safety, scientific, and commercial interests could best be served by discontinuation of SA. Along with our commitment to enhance GPS
for peaceful applications, my administration is committed to preserving fully the military utility of GPS. The decision to discontinue SA is coupled with our continuing efforts to upgrade the military utility of our
systems that use GPS, and is supported by threat assessments which conclude
that setting SA to zero at this time would have minimal impact on national
security. Additionally, we have demonstrated the capability to selectively
deny GPS signals on a regional basis when our national security is threatened. This regional approach to denying navigation services is consistent with the 1996 plan to discontinue the degradation of civil and commercial GPS service globally through the SA technique.

Originally developed by the Department of Defense as a military system, GPS
has become a global utility. It benefits users around the world in many different applications, including air, road, marine, and rail navigation, telecommunications, emergency response, oil exploration, mining, and many more. Civilian users will realize a dramatic improvement in GPS accuracy with the discontinuation of SA. For example, emergency teams responding to
a cry for help can now determine what side of the highway they must respond
to, thereby saving precious minutes. This increase in accuracy will allow
new GPS applications to emerge and continue to enhance the lives of people
around the world.

96. RE: [CPMA] President's statement on GPS degradation

Yahoo group: CPMA

You beat me to posting the information <g> Since its suppose to
be take effect at midnight GMT which is 8PM EST I have not notice
any difference yet. Will try again in a couple hours. This is
indeed exciting information. Can't wait to play with the GPS
once its turned off.

Steve

Monthly meeting of the Central Pennsylvania Monitoring
Association at the Yorktown Senior Center, 1059 Kelly Drive,
York Pennsylvania.

98. Fw: Andrews Air show

Yahoo group: CPMA
Date: 2000-05-19 19:41:17 UTC
From: yorkfd@juno.com
Topic: 98 Message: 98

Found this on the SCAN-DC e-mail list ... thought it might be of interest to at least one of our members ... have fun at the air show Dave!

-----Original Message-----

The Joint Services Open House 2000 at Andrews Air Force Base will take place the weekend of May 20, 21.
(http://www.andrews.af.mil/pa/airshow/default.htm)

This list is a few years in the making. Some quick notes:

1-Years are denoted if the frequency was active at Andrews (ADW) 1996-1999
2-MC- is a frequency noted by MILCOM postings from airshows in 1999
3-FRG-frequencies used by The Blues while staying at Republic Airport, Farmingdale NY 1998

Thanks to Daniel Myers for his input at the show, "the red wagon has arrived"!!
Any comments are welcome, see ya at the show

105. Cumberland County Radio System

Yahoo group: CPMA
Date: 2000-06-03 00:21:16 UTC
From: Richard Heintzelman
Topic: 105 Message: 105

Hi Greg: The following item appeared in the May 23, 2000 edition of the PATRIOT-NEWS, HARRISBURG, PA and is quoted in part.
The Cumberland County commissioners approved a $4.7 million dollar contract on May 22,2000 to buy the core of a cutting-edge emergency communications system by piggybacking on a STATE radio pact. The 800MHz system will replace a network that uses 1950's technology. Under a license with the FCC, Cumberland County has until December 31 to begin at least limited use of the new system. The county will buy consoles, tower equipment and other infastructure gear for an 800 MHz radio system for AMP M/A-COM of Massachusetts, which has a $222 million dollar contract with the STATE.

Edit this to meet space requirements! Best regards DICK

Yahoo group: CPMA
Date: 2000-06-04 20:59:21 UTC
From: yorkfd@juno.com
Topic: 106 Message: 106

From the SCAN-PA e-mail list at eGroups:

--------- Forwarded message ----------

Here is my current listing of regional medical helicopters.

(Life Flight and Life Lion are both heard throughout the area you
requested
info on.)

"University MedEvac" - Allentown/Phila - 155.22/136.5 (Lehigh Valley
Medical
Center/Hahnemann Medical Center)
"Sky Flight Care" - Coatsville - 155.205/100.0 (Brandywine Hospital &
Trauma
Center)
"Life Lion" - Hershey - 155.355/146.2 (Penn State Milton S. Hershey
Medical
Center)
"Life Flight" - Danville - 155.16/151.4 (Penn State Geisinger Medical
Center)
"PennSTAR" - Phila - 155.385/100.0 (F1) 155.355/100.0 (F2) 155.40/100.0
(F3)(University Of Pennsylvania)
"Guthrie One" - Sayre - 453.90/100.0 - (Guthrie Regional Medical
Center/Robert Packard Hospital)

North Star - NJ-North - NJSP 800 Mhz - (University Of Medicine &
Dentistry)
South Star -NJ-South - NJSP 800 Mhz - (University Of Medicine &
Dentistry)

Medevac - MD Statewide - 44.74/110.9 (Ops) 47.66/100.0 (Medical Reports)
-
(John Hopkins Trauma Center)

Here is the recent info that I have personally confirmed for Central PA
MED
primary Channels:

Dauphin County (Harrisburg) - Med 9 - PL=203.5
York County - Med 9 & 10 - PL=186.2
Cumberland County - Med 9 & 10 - PL=131.8
Franklin County - Med 9 & 10 - PL=156.7
Northumberland County - Med 9 - PL=141.3
Montour County - Med 9 - PL=146.2
Shamokin City - Med 9 - PL=151.4
Lycoming County - Med 9 - PL=173.8

Centre County - Med 9 - PL=179.9
Union County - Med 9 - PL=192.8
Clinton County - Med 9 - PL=167.9
Columbia County - Med 9 - PL=210.7
Snyder County - Med 10 - PL=151.4 (unconfirmed)

109. Fw: Cumberland County 800MHz website

Yahoo group: CPMA
Date: 2000-06-15 00:27:56 UTC
From: yorkfd@juno.com
Topic: 109 Message: 109

Forwarded from the centralPAscanner list:

--------- Forwarded message ----------

I had to resubscribe to these two lists under my work address since I moved
about two weeks ago and no longer have the use of my brother's PC.

Now that I am back, I found this website that may be of interest to those following the developments of the Cumberland County 800MHz system.

http://www.ccpa.net/800MHz/

You can also start here for some other general County EMA info:

111. Michigan scannists need your help Scanners NOT allowed in vehicles in MI

Yahoo group: CPMA
Date: 2000-06-14 02:40:22 UTC
From: MBajek000@msn.com
Topic: 111 Message: 111

Dear CPMA

Having returned from your state PA (vacation) to MY home state of
MI
BE thankful your legislature does not restrict your scanning rights.
Michigan However, Does NOT allow scanners in cars...
They cannot even be in the trunk.

MCL750.508 prohibits possessing a scanner in a car.
MI residents may apply to MSP for a permit.
Hams are exempt
TOURISTs (are not welcome) to my state can be jailed.

1yr plus a $500.00 fine if you are found with a scanner.

YOUR HELP is needed as hobbyists to Stop this law NOW
Your Help as tourists as well.
PLease protect the freedom to scan, and the freedom to do so anywhere.
NO other Hobby is restricted like OURs.
Golfers would not stand for it if MICHIGAN restricted their
equipment....Way should WE.

goto http://www.trainwatchers.com/index.html
this site lists the law, and has a plea to protest plus the addresses
to write..

Help if you can, be greatful you Live in PA.

112. CPMA Club Meeting on 6/18/00

Yahoo group: CPMA
Date: 2000-06-17 13:44:23 UTC
From: Steve
Topic: 112 Message: 112

Hello everyone,

Just a reminder I will be demoing the
ClearSpeech DSP Filter on the Drake R8B
at the club meeting.

This the filter I picked up at Dayton
and it really makes a difference.

Also will demo the GPS since "SA" has
been turned off.

Dave I have some printouts of some
Military frequencies I came across
for Willow Grove, The Gap and Harrisburg.
You probably have them but will
bring them along.

Steve

HI PETER Thanks for the tips on Radio Shack sales, of the two scanners PRO 92 and PRO 2052 which is the best bang for the bucks?

Since the club has moved from the mall, December 1999, I have not attended as of the monthly meetings do to the fact that I let my wife shop at the mall while attending the club meetings, as we have Sunday Brunch at the Holiday Inn in West York and I live in Camp Hill.

Again thanks for the info, and any comments would be appreciated. Best regards DICK

Dick,

We were just talking about that very thing last Sunday at the meeting.

Just to make you aware, we are meeting about two minutes away from the
West Manchester Mall. So dropping her off at the Mall and stopping by the
meeting can still be an option for you.

We really look forward to seeing you at the meetings again.

118. Fw: [IPN-Members] real bad prank

Yahoo group: CPMA
Date: 2000-06-24 15:08:59 UTC
From: Peter Kirk
Topic: 118 Message: 118

Got this off of IPN Members..

Subject: FW: DANGEROUS PRANK
Importance: High

**********DANGEROUS PRANK:**********
Please read and forward to anyone you know who drives. My name is
Captain Abraham Sands of the Jacksonville, Florida Police
Department. I have been asked by state and local authorities to
write this email in order to get the word out to car drivers of a
very dangerous prank that is occurring in numerous states.Some
person or persons have been affixing hypodermic needles to the
underside of gas pump handles. These needles appear to be infected
with HIV positive blood. In the Jacksonville area alone there have
been 17 cases of people being stuck by these needles over the past
five months. We have verified reports of at least 12 others in
various states around the country. It is believed that these may be
copycat incidents due to someone reading about the crimes or seeing
them reported on the television. At his point no one has been
arrested and catching the perpetrator(s) has become our top priority.
Shockingly, of the 17 people who where stuck, eight have tested HIV
positive and because of the nature of the disease, the others could
test positive in a couple years. Evidently the consumers go to fill
their car with gas, and when picking up the pump handle get stuck
with the infected needle. IT IS IMPERATIVE TO CAREFULLY CHECK THE
HANDLE of the gas pump each time you use one. LOOK AT EVERY SURFACE
YOUR HAND MAY TOUCH, INCLUDING UNDER THE HANDLE. If you do find a
needle affixed to one, immediately contact your local police
department so they can collect the evidence. PLEASE HELP US BY
MAINTAINING A VIGILANCE AND BY FORWARDING THIS EMAIL TO ANYONE YOU
KNOW WHO DRIVES. THE MORE PEOPLE WHO KNOW OF THIS THE BETTER
PROTECTED WE CAN ALL BE

Subject: HOAX!!!!!! Re: [IPN-Members] real bad prank

>From the files of the Urban Legends Reference Pages:

http://www.snopes.com/horrors/mayhem/gaspump.htm

Legend: Folks are getting stuck by HIV-loaded syringes affixed to
gas pump handles.

Status: False.

Example: [Collected on the Internet, 2000]

<exact text of letter quoted below>

Origins: This hoax urging caution when pumping gas appeared on the
Internet in early June 2000. In common with other AIDS-infected needle
scares (syringe attacks in movies houses and dance clubs and
contaminated needles in payphone coin returns), it plays upon our fear
of contracting this dread disease through the pursuit of ordinary and
harmless activities.

If there's an Abraham Sands with the Jacksonville Police Department,
they're certainly keeping him under wraps. No newspaper stories from
that city make mention of him, which is unusual (to say the least)
about a department's spokesperson; Jacksonville is served by a
sheriff's office, not a police department; a phone call to the
Jacksonville Sheriff produces the response that they've never heard of
Abraham Sands; and he's not listed with the rest of the personnel on
the City of Jacksonville Sheriff's Office web site. No news stories
out of Florida confirm the e-mail's claim that 17 people have so far
been injured by these attacks, the City of Jacksonsville Sheriff's
Office says the whole thing is a hoax, and the Centers for Disease
Control in Atlanta maintain they are not aware of any cases where HIV
has been transmitted by a needle-stick injury outside of a health care

setting.

This is naught but another darn fool hoax dreamed up by someone intent upon enjoying the sight of the Internet community thrown into another panic. Don't contribute to it by passing this humbug along.

I'll have to dig around to see if I can find it ... it's been so long since we've used it.

Three of us had it programmed into our Yaesu FT-50s.

Hint taken. (Sorry you wasted your breath)

> What did you end up getting? A Motorola product or a different brand?
>
Apparently Steve's Motorola's receive needs tweaked a bit because I went
to the Shack to purchase one and initially blamed it on the new purchased
mike. He tried the shack one with another in the store and it sounded fine.
Receive on the Motorola however, was muffled. I decided at that point to buy
a second (or 3rd) depending on your mindset.

> I guess you finally decided I wasn't giving any of mine up, eh? :)
>
I finally came to the conclusion that I was not going to pry any of those
away from you. Both purchased have all 14 channel and all 32 tone capability.
Whatever everyone decides on for a channel and tone will work on this end.
We'll need it if we field trip out to an air show this year (hint, hint).

From: yorkfd@juno.com
Topic: 136 Message: 136

Well folks, it's a scanninst's dream at my house tonight.

About 1350 I got called out at work to meet the police department in the 800 block of Fahs Street. This is about a block away from out monthly meeting place.

It seems that they have a stand-off with a gentleman in a house in the neighborhood, and they wanted one of our vehicles to use as a command post. I had the unit meet me at the scene, and had him set up for the police department. I had to deal with a few other things relating to this incident until I got off work at 1700.

I got home about 1720, and fired up the scanners. Since the incident is only about two blocks from my home, I expected to ba able to pick up some good comms.

I am happy to report that I have crystal clear reception of the QRT members since then. Their comms are in the clear, and have been quite interesting.

It's about 1920 right now, and their preparing for their operations to continue past dusk.

Just a few words that I've heard thus far ... gas, throw phone, bean bag gun, bullhorn, cover ... what a night!

Greg

137. stand-off update

Yahoo group: CPMA
Date: 2000-06-30 02:35:46 UTC
From: yorkfd@juno.com
Topic: 137 Message: 137

Around 2100 they moved a first alarm assignment from the fire department into the area. Around 2115 they started launching gas rounds into the dwelling. I could hear the rounds being fired from my living room, which were almost immediately confirmed by the scanner.

At 2200, I tuned in to Fox 43 News to watch the coverage of the incident. Just before they went live to the scene the police fired two more gas rounds into the building. While the live report was going on, the suspect left the dwelling and was taken into custody. Fox 43 News was not in a position to film or report that.

As I type this (2230) FD is picking up equipment, deconning QRT members that entered the building, and ventilating the dwellings involved (attached homes). PD is wrapping up their operations.

That's all for now - quite a listening event!

138. Fw: [4phun-scan] I-20 Road Trip

Subject: [4phun-scan] I-20 Road Trip

Is it me or is highway law enforcement getting really lax? I can remember back in the 55 mph days the interstates would be crawling with cops. These days they're few and far between. I'm figuring speed traps aren't as lucrative nowadays since speed limits have caught up to how fast people actually drive. Also north-south interstates tend to be favored by drug runners versus the east-west interstates. Perhaps states are putting their resources on the north-south routes? I left Atlanta around 10 PM EDT on the night of the 4th. Seems there would've been more cops for DUI checks and such.

I saw ZERO marked Georgia State Patrol cars the entire time I was in the metro Atlanta area. I-20, from the Perimeter to the state line, was like a dragway. I was flooring a fully loaded UHaul barely keeping up.

I did see two state troopers in Alabama, but neither were actually on the interstate. One was off I-459 near the Riverchase Galleria giving some poor chump a DUI test. The other I saw from I-20/59 on another road. Lindsay Blanton's web site is right about the Alabama DPS EDACS system. I did hear it a couple of years ago in the Mobile area, but the freqs assigned to Birmingham and Tuscaloosa are not active. Both state patrol cars that I saw had VHF whips. It was too dark to see if they had 800 MHz antennas.

About two years ago I broke down on I-10 in Mississippi. I hit the highway patrol call box and two-and-a-half hours later a trooper pulled up. He told me he was the only trooper on I-10 in Mississippi. I was lowering my van on the jack when he pulled up asking if I needed help. I was thinking, "Yeah... two hours ago you doughnut scarfing $@#!". I'm thinking I-20 has equal numbers of troopers. A native Mississippian at work tells me Mississippi paves their roads with the smooth side down. I was hard pressed to drive much faster than 70 mph without rattling my teeth out and sending my wife and son bouncing all over the cab. So maybe radar guns are superfluous in a state whose roads don't allow fast travel.

Then there's Louisiana! In defense of the Bayou State, I broke down again between Slidell and New Orleans on that same trip in my van (I'll share the entire story sometime). I walked down to the state police call box, hit the button, and the wrecker beat me back to my van. Also when I broke down for good a third time in downtown New Orleans, the people of the Crescent City went out of their way to help me. I-20 was crawling with state police and parish units and it was the usual pissed off looking "suspect" standing with his arms crossed while the cops searched the car from bumper to bumper. Every stop I saw, the trunk was open, the doors, and two cops were searching the vehicles. I want to know how they get away with it? I've heard Louisiana's French based law makes it easier for police to search. However the federal 4th amendment still applies! I know cops get a cut of goods and money the seize and it's not uncommon for cops to rake in $100K a year.

I was not unhappy to see Texas. The only DPS unit I saw was a circa 1989 Chevy Caprice used by the drivers license testing people near Waco.

During my entire drive, the scanner was relatively quiet, even in counties/parishes using VHF and UHF. Strange.

John

FOR AGENDA - IRAC Doc. 31061/2

FOR INFORMATION - AH-214 Ref. Doc. 31061/1

REF: AH-214-051

April 21, 1999

MEMORANDUM TO: Executive Secretary, IRAC

FROM: Convener, Ad Hoc 214

SUBJECT: Proposed Changes to the NTIA Manual for a VHF/UHF Public Safety Interoperability Plan.

Ad Hoc 214, in cooperation with the Federal Law Enforcement Wireless User's Group (FLEWUG) has developed a recommended plan for interoperable law enforcement and incident response operations in the 162-174 MHz and 406.1-420 MHz bands. These frequencies are to be available for assignment to all Federal Government agencies to satisfy intermittent law enforcement and public safety incident response requirements. Non-Government entities may use these frequencies only in cooperation with agencies of the Federal Government.

Ad Hoc 214 has approved the attached proposed changes to the NTIA Manual and forwards them to the IRAC for approval.

Attachment

4.3.X Plans for Interagency Law Enforcement and Incident Response Operations in the Bands 162-174 MHz and 406.1-420 MHz

CONDITIONS FOR USE

1. The frequencies shown in this plan are available for assignment to all Government agencies to satisfy intermittent law enforcement and public safety incident response requirements. Non-Government agencies may use these frequencies only in cooperation with agencies of the Federal Government. Federal agencies will provide written certification to non-Government agencies indicating that the non-Government operation is necessary. Non-Government entities will be advised in the written certification that under Federal law they are required to obtain a license from the Federal Communications Commission (FCC) for such operations, and that the FCC File Number for the license, once obtained, will be provided to the Government agency providing the written certification. A copy of this certification will also be submitted to the NTIA Public Safety Program Office. Federal agencies shall comply with the requirements of Section 2.3.12 of this Manual. The frequencies are available on a shared basis and will not be authorized for the exclusive use of any one agency.

2. All Government operations shall be authorized in accordance with Chapter 9 of this Manual. The FCC will submit all non-Government applications to the Frequency Assignment

Subcommittee (FAS) for approval.

3. Base stations are authorized use of the mobile transmit frequencies for access to fixed stations, e.g., repeaters. Mobile stations are permitted to use fixed station transmit frequencies for talk-around communications.

4. The following restrictions apply:

(a) the minimum ERP necessary to support the intended use shall be employed;

(b) the maximum base or mobile transmitter output power shall not exceed 125 Watts; and

(c) the gain of the base station antenna shall not exceed 6 dBi.

5. Exceptions to the above restrictions will be considered by the FAS on a case-by-case basis.

LAW ENFORCEMENT PLANS

1. Frequencies 167.0875 MHz and 414.0375 MHz are designated as National Calling Channels for initial contact and will be identified in the radio as indicated in paragraph 2 below. Initial contact communications will be established using analog FM emission (11KF3E). The agency in control of the incident will assign specific operational channels as required for incident support operations.

2. The interoperability frequencies will be identified in mobile and portable radios as follows with Continuous Tone-Controlled Squelch Systems (CTCSS) frequency 167.9 Hz and/or Network Access Code (NAC) $68F:

VHF PLAN

Mobile Mobile

Identifier Transmit (MHz) Receive (MHz)

Natl Call 167.0875 (Simplex) 167.0875

Inop 1 162.0875 167.0875

Inop 2 162.2625 167.2500

Inop 3 162.8375 167.7500

Inop 4 163.2875 168.1125

Inop 5 163.4250 168.4625

Inop 6 167.2500 (Simplex) 167.2500

Inop 7 167.7500 (Simplex) 167.7500

Inop 8 168.1125 (Simplex) 168.1125

Inop 9 168.4625 (Simplex) 168.4625

UHF PLAN

Mobile Mobile

Identifier Transmit (MHz) Receive (MHz)

Natl Call 414.0375 (Simplex) 414.0375

Inop 1 418.9875 409.9875

Inop 2 419.1875 410.1875

Inop 3 419.6125 410.6125

Inop 4 414.0625 (Simplex) 414.0625

Inop 5 414.3125 (Simplex) 414.3125

Inop 6 414.3375 (Simplex) 414.3375

Inop 7 409.9875 (Simplex) 409.9875

Inop 8 410.1875 (Simplex) 410.1875

Inop 9 410.6125 (Simplex) 410.6125

3. All applications using these allotted frequencies shall be affixed with Record Note Sxxx - This assignment is for a joint law enforcement requirement pursuant to Section 4.3.X of this Manual.

INCIDENT RESPONSE PLANS

1. Frequencies 169.5375 MHz, paired with 164.7125 MHz, and 410.2375 MHz, paired with 419.2375 MHz, are designated as the calling channels for initial contact and will be identified in the radio as indicated in paragraph 2. Initial contact will be established using analog FM emission (11KF3E). CTCSS will not be used on the calling channels to ensure access by stations from outside the normal area of operation. The agency in control of the incident will assign specific operational channels as required for incident support operations.

2. The Interoperability frequencies will be identified in mobile and portable radios as follows:

VHF PLAN

Mobile Mobile

Identifier Transmit (MHz) Receive (MHz) CTCSS

VHF Calling 164.7125 169.5375 None

VHF 1 165.2500 170.0125 As required

VHF 2 165.9625 170.4125 As required

VHF 3 166.5750 170.6875 As required

VHF 4 167.3250 173.0375 As required

VHF 5 169.5375 (Simplex) 169.5375 As required

VHF 6 170.0125 (Simplex) 170.0125 As required

VHF 7 170.4125 (Simplex) 170.4125 As required

VHF 8 170.6875 (Simplex) 170.6875 As required

VHF 9 173.0375 (Simplex) 173.0375 As required

UHF PLAN

Mobile Mobile

Identifier Transmit (MHz) Receive (MHz) CTCSS

UHF Calling 419.2375 410.2375 None

UHF 1 419.4375 410.4375 As required

UHF 2 419.6375 410.6375 As required

UHF 3 419.8375 410.8375 As required

UHF 4 413.1875 (Simplex) 413.1875 As required

UHF 5 413.2125 (Simplex) 413.2125 As required

UHF 6 410.2375 (Simplex) 410.2375 As required

UHF 7 410.4375 (Simplex) 410.4375 As required

UHF 8 410.6375 (Simplex) 410.6375 As required

UHF 9 410.8375 (Simplex) 410.8375 As required

3. All applications using these allotted frequencies shall be affixed with Record Note Sxxx - This assignment is for a joint incident response requirement pursuant to Section 4.3.X of this Manual.

From: Peter Kirk
Topic: 140 Message: 140

I would like to ask all people to try out IPN
IPN sends reports on breaking news events directly to your alpha-numeric pager or email address 24 hours a day, 365 days a year. Our international team of dispatchers sends out information on major police, fire and rescue incidents as they are happening, and in most cases, long before you'll see it on the news.
If you want or need to know what's happening in your area or across the nation, subscribe today. You'll get your home area absolutely free. If you want expanded, nationwide coverage (including Hawaii & Canada), premium subscriptions start at only $3.00 a month! Best of all, you don't need to buy a pager from us because IPN can send notifications to your existing alpha-pager in most cases.

Thank You for Your Time

141. Reminder of CPMA club meeting on 7-16-00

Yahoo group: CPMA
Date: 2000-07-15 18:16:44 UTC
From: Steve
Topic: 135 Message: 141

Hello,

Just a reminder that the CPMA club meeting
is this Sunday. Mike said he will try to
make it this Sunday to give his PCR-1000
demo. This is a black box shortwave, vhf/uhf
receiver that can be controlled by computer.

We will also be planning for the picnic this
meeting which will be held in August.

Steve

142. New York area Police Department

Yahoo group: CPMA
Date: 2000-07-20 00:12:36 UTC
From: Steve
Topic: 140 Message: 142

Article in todays York Daily Record talks about the new police department has a result of a merger between York Township and Windsor Township.

The new department will be known as "York Area Regional" The new department has a total 35 officers. They have a new uniform and new patch. The patrol cars will have a new logo. New radio calls were assigned.

Each township had previously had their own frequencies they used in addition to county control frequencies. There may be some changes on how they are uses.

Windsor Township

154.085
154.835

York Township

153.755
155.805
159.435

If anyone hears and changes post them to the list.

Steve

143. Mortola to install computers in PSP cars.

From: Steve
Topic: 135 Message: 143

Friday July 21 it was announced that Motorola was
selected to install computers in State Police Cars.

The computers will be used for dispatching, reports,
registration information, operator license information,
and wanted person checks. Also will secure messaging
car-car and car-base.

Harrisburg Troop H will be part of the testing procedure.
For more information check out

http://db.state.pa.us/ctc/data/20000721.008.htm

We're not even finishing the testing of the digital
system and will be starting testing of computers
in the patrol cars. Wonder if we're going to
run into problems like so many other counties and
states with the new digital and trunking systems.

Steve

Motorola Selected to Install Computers in Pennsylvania State Police Cars

07-21-00 12:51 PM EST | HARRISBURG, Pa. /PRNewswire/ -- On behalf of Pa. Gov. Tom Ridge, State Police Commissioner Paul J. Evanko today announced the selection of Motorola (NYSE: MOT) to install computers in State Police patrol vehicles as the first step in a wide-ranging project to enhance Pennsylvania's use of computer technology to fight crime.

Evanko said that, after more than a year of research and analysis by a group of State Police field and headquarters personnel, Motorola Corp. was picked as the prime contractor for what is known as the Initial Mobile Office (IMO) project. He said contract negotiations will begin immediately, and a contract signing is expected later this year.

Implementation of the IMO project is the first step in creating the department's new Criminal Investigative/Traffic Safety Incident Information Management System (IIMS).

"Motorola will install Motorola MW520 computers with wireless data capabilities in patrol vehicles," Evanko said. "This will make national and state vehicle registration information, operator license information, and wanted person checks available to the troopers using the Statewide Public Safety Radio System wireless transport network."

The mobile computer will provide access to various tools that will help troopers better serve the public. These tools include Microsoft Word for in-vehicle report preparation, a mapping tool to assist in locating incidents, and car-to-car and car-to-station messaging to allow secure communications, Evanko said.

"The addition of the IMO will make each trooper more efficient than ever before," Evanko said. "We estimate that a trooper now spends about four hours completing paperwork for each hour of incident assignment. With IIMS in place, the amount of time spent on paperwork will be cut by half

or more. That means troopers will spend more time enforcing the law and fighting crime."

Completion of the IMO project will provide the basis for the continuing development of the next phases of the IIMS program, which include computer- aided dispatch, records management, and evidence bar-code scanning, Evanko said.

The IMO project will be implemented in three major steps:

-- Step 1 consists of placing the computers into five working prototype

vehicles equipped with the Mobile Office solution;

-- Step 2 consists placing the computers into about 20 vehicles assigned

to Troop H, Harrisburg; and

-- Step 3 consists rolling out the mobile computers to the rest of Troop

H. After a successful troop rollout, the final roll out will be

coordinated with the deployment of the Statewide Public Safety Radio

System.

"This selection was based on a design specification produced by field personnel, taking into consideration the specific needs and concerns of the trooper on patrol," Evanko said. "The Mobile Office will allow the Pennsylvania State Police to remain the leader in the law-enforcement technology arena."

Motorola, headquartered in Schaumburg, Illinois, is a $29 billion company with about 145,000 employees worldwide, including 1,200 in Pennsylvania. The contract with the State Police would fall within Motorola's Communications Enterprise Sector, under the Commercial Government and Industrial Solutions Sector (CGISS).

Evanko said the Mobile Office Team, as part of an innovative procurement process, worked with the competing vendors "to provide the Pennsylvania State Police and the Commonwealth of Pennsylvania with the optimum solution. The solution was developed as a collaborative effort between Motorola and the Pennsylvania State Police Mobile Office Team."

The collaboration included the design of the screen and keyboard mounts, and the inclusion of an on-screen keyboard using the touch-screen capabilities.

"The driving factor in the Mobile Office Team's decisions was always officer safety, and consideration of ergonomics necessary to function comfortably and efficiently in a patrol vehicle environment," Evanko said.

Evanko praised Gov. Ridge and the General Assembly for recognizing the need for the IIMS project and providing the funding.

"This is the largest step the Pennsylvania State Police have taken since we moved from the horse to the car," Evanko said. "The newfound freedom that this technology will provide has limitless possibilities in allowing for improvement in State Police service to Pennsylvanians."

From: yorkfd@juno.com
Topic: 146 Message: 146

OK folks, the time is near for the annual CPMA picnic, which will be held on Sunday, August 20, 2000 in York.

Those wishing to attend need to provide a head count of those attending (you and your family) and what item you will be bringing.

The cost is $5 per person which provides the burgers/dogs and fixins and the beverages.

So far we have Dick Heintzelman bringing macaroni salad, and Dave Bortzfield bringing chips/pretzels.

Who else is coming, and what are you bringing? Also, does anyone remember what time we usually start? 12:00?

At the last meeting, several of you asked me for the URL for the Emergency Health Services Federation's hospital status page. The address is:

http://hospitals.ehsf.org

For those of you unfamiliar with the page, it shows the status of all the hospitals in the southcentral Pennsylvania area. Any hospitals currently on any type of divert status are shown on the page.

The page was designed for access by the regional 911 centers to provide the information to the EMS units in the field, but the page is accessable to the public via the world wide web.

Subject: [phlscanner] PA'S 800 MHZ SYSTEM

As some of you know Pa is building a state wide 800 mhz digital system--The cost has risen from 179 million to nearly a quarter of a BILLION dollars--and thats before they bought the base/mobile and portable radios which will add about another 25 million to the price tag--
Anyway I got a copy of the Document which the state sent to interested companies to build the system. The following is an example of some of the hoops they had to jump through----

Bob

Vendors are encouraged to provide detailed explanation for any or all Gate III Functional Requirements in their Gate II proposal.

1. The system must support the user agencies field operations as they currently exist, without requiring material changes in agency structure or function in order to provide the desired communications ability.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

2. A mixed voice and data system must provide both voice and data capability without requiring interruption of one use to access the other.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

3. The system must provide multipoint to multipoint voice communications directly between any number of mobile and/or portable units, and/or any number of dispatch points, simultaneously and without operator intervention other than selection of the desired talk group.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

4. The system must allow the users to select from among an available pool of talk groups, and must recognize that the individual user is now part of that talk group (user registration/de-registration)

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

5. The system must allow for direct portable and/or mobile unit-to-unit communications without the need for a support infrastructure ("talk-around") with a minimum range of 1.5 miles.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

6. The system must be accessible using a single mobile or portable unit regardless of location in the state.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

7. The system must accommodate priority access specifically for Commonwealth of Pennsylvania users over all other users and entities, and allow for automatic ruthless preemption of other users as needed to accommodate Commonwealth user demand and emergencies.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

8. The radio system must allow the user to select and sequentially automatically monitor talk groups other than his/her current selected talk group, while optionally maintaining monitoring of the current selected talk group (priority and non-priority scan of talk groups).

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

9. Vendors shall identify all conditions under which system switching, handoff, or cell changes shall result in any delay, interruption, or loss of communications to any traffic in progress. Conditions shall be identified under at least, but not limited to subscriber unit transmitting and subscriber unit receiving while crossing any site cell, or regional architectural boundary.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

10. Total access delay time plus latency time between two subscriber radios in any two or more cells of the system must be less than 700 milliseconds from PTT to reception and passage of voice information. Vendors shall

provide detailed information and calculations on total delay times.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

11. Delay of voice information (speech delay or latency) must be less than 200 milliseconds total round trip from unit to unit. This includes vocoder delay, digital encoding, and digital encryption time.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

12. Total access delay time plus latency time between two subscriber radios in the same cell of the system must be less than 500 milliseconds from PTT to reception and passage of voice information.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

13. The supplied system shall meet the performance for Grade of Service, throughput and growth as defined in the RFQC specifications.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

14. Mixed-band system proposals must provide for interoperability system to system for internal Commonwealth agencies. Single band system proposals must provide for, and describe, system interfaces capable of providing multi-band interoperability.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

15. Infrastructure systems and compatible subscriber units must support the display of unique Unit ID and plain English alias conversion.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

16. Infrastructure systems must use Electronic Serial Number (ESN) validation or an equivalent for system accesses.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

17. The system shall be supplied with an Emergency Call feature and an Emergency Call button on each subscriber unit.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

18. Initially 50,000 users must be supported; with at least 5,000 subscriber radios simultaneously involved any one talkgroup. Final system capacity shall support 150,000 unit ID’s.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

19. Vendors shall provide information on system architecture, infrastructure capacities and capabilities as well as site/cell configurations, and channels/base stations functionality as related to the system design.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

20. The system shall meet all loading capacity as defined in this RFQC document. Vendors shall define migration growth path for the anticipated number of potential future users.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

21. The voice and data system(s) shall be digital as defined in this RFQC document.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

22. The system shall support spectral efficiency goals such as narrowband operation or multiple talk-paths per channel bandwidth as describe in the RFQC specifications and consistent with the FCC rules, mandates and future efficiency goals. All 821 MHz frequencies employed in the system design must follow the NPSPAC Regional plans as defined by inter- and intra-regional agreements (Region 08, Region 20, Region 28, Region 30, Region 33, Region 36, Region 44, Region 42, Region 55).

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

23. The voice radio system shall provide digital encryption using DES or an equivalent approved by the Commonwealth.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

24. Multiple keys for code insertion shall be provided with the digital encryption offering.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

25. The system shall support Over The Air Re-keying (OTAR) of encryption codes.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

26. Vendors shall provide multiple "tiers" of voice and data subscriber units as described in the RFQC specifications. Tiers differentiate radio unit models by capabilities, feature sets and significant price points.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

27. Voice radio vendors shall provide console systems interface for control of the radio and data systems (wire-line consoles).

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

28. Vendors shall provide a logging recorder interface capability.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

29. The Data system shall interface to multiple host computers and local area networks.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

30. The Voice and Data system shall include a network management system as described in this RFQC document.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

31. Voice and Data system equipment is required to interface with the digital microwave system at a DS1 interface and shall allow DS0 level grooming on channel bank equipment.

Comply ____ Do Not Comply ____ Not Applicable ____

Explanation:

32. Any single point(s) of failure in the system infrastructure shall be identified that may result in the absence of communications with any user. The system design shall provide options to protect identified single points

of failure.

Comply ____ Do Not Comply ____ Not Applicable ____

Subject: [4phun-Radio] RadioShack's plan for older PRO 92 Upgrades

RADIOSHACK to upgrade older PRO 92 radios for a fee.

From:Rich Wells

More good news arrives for all current PRO-92 owners. The recent release of the "PRO-92A" has created quit a stir amongst current owners who are trying to figure out how they can get their radios upgraded. It seems that RadioShack will be happy to oblige and is now working on such a program!

While the details are not cast in stone at this time, it seems that owners will be able to send in their PRO-92s to have the circuit baords upgraded to the PRO-92A level. It's likely the cost will be the usual fee associated with sending in a radio for work (I believe that's in the $50 - $60 range). RadioShack is also working on a way so that even though you switch out the internals, owners won't loose any of their programmed data!

The PRO 92 will go on sale again around christmas.

Bill Cheek, editor of the
"Experimenters Workshop"
column in Monitoring Times
and author of a series of books
on scanner modifications has
died.

Though always a controversial
figure, there is no disputing the
fact that Bill devoted his life to the
love of radio and technology. We
at Monitoring Times are deeply
saddened at the loss of our friend
and colleague. We will have more
details on Bill's amazing life and
further information on how you can
help the family in the upcoming
issue of MT, as well as here on the
website (as information becomes
available).

Time: 9:05:47 PM

Comments
I HAVE REPLACED IC-5 ON THE CPU PCB ON MY VER 1.0 MODEL PRO-92 AND NOW HAVE VER 3.25. THE RADIO SHACK PART NUMBER IS MX91070 AND COST $53.99 (US). I HAD TRIED CLONING UNITS WITH NO LUCK. THE IC IS VERY SMALL DON'T TRY IT W/O GOOD SOLDERING EXPERIANCE. THE COMPLETE BOARD IS ALSO AVAILABLE, IT IS RS PT # XB-91521 (FOR VER 3.25) AND COST 219.99. HOPE THIS HELPS SOME ONE, BEST OF LUCK TOM......

Re: REPLACING IC-5 GIVES VER 3.25 ON PRO-92 PRE DATE CODE 04A00
From: John H.
Date: 7/27/2000
Time: 11:27:06 PM

Comments
If the part costs $53 and the labor is the standard $49, then the total cost of an upgrade would be $102.

Note...

I believe that the shack will upgrade old PRO 92 for merely the service charge.

155. ACTIVE FEDERAL FREQUENCIES IN PENNSYLVANIA

Yahoo group: CPMA
Date: 2000-07-30 06:04:47 UTC
From: John T. Bohn
Topic: 155 Message: 155

Does anyone have any lists of active federal freqs. especially fbi,dea,atf,uscs,usms that are in use in pennsylvania, I am attempting to make a very detailed fedgov database covering pa. repeater locations, long/lat, pl/dpl tones,unit numbering ect ect.. Any help would be greatly appreaceated, I will share info with the people that send me accurate detailed info..

156. picnic

Yahoo group: CPMA
Date: 2000-08-10 20:40:13 UTC
From: yorkfd@juno.com
Topic: 156 Message: 156

Well, we're a little over a week away from the annual CPMA picnic, and here's what I have so far:

I'll be there of course, I'm hosting it. I'll have the burgers and dog and fixins, as well as beverages, plates, napkins, etc.

Dick is coming down from the northern reaches, and he's bringing macaroni salad. I presume he is attending alone.

Dave (KPA3MT) is coming from the east, and he's bringing potato chips. He is a single.

Steve B. is coming from just up the street, and he's bringing chili. He is confirmed, and may be bringing his son and wife.

Steve H. is coming from slightly north, and he's bringing something oin the dessert line. He is a single.

The other Dave, if I remember correctly, is out of town.

So, we're at 5-8 attendees, and I haven't heard from anyone else.

From: yorkfd@juno.com
Topic: 157 Message: 157

A repeater has been installed at the York City Fire Headquarters building, and is operating off of an antenna mounted on the 60' tower that was installed earlier this year. It is currently being tested on a set of borrowed frequencies until the licensing is completed.

Repeater input is 159.1875, and output is 153.7925. PL is 7Z.

158. Picnic items

Yahoo group: CPMA
Date: 2000-08-14 04:04:46 UTC
From: David R Bennett
Topic: 158 Message: 158

I will be going to the picnic. I am single. I was thinking of bringing some cottage cheese. That is good at picnics. It would be my first choice.

Or getting some baked beans at the deli. Macaroni and cheese is also good at picnics.
As far as beverages go some beer would be good. As long as you don't drink it right before you leave.

Let me know if there is some item you would like. I don't cook.

161. York County 700Mhz

Yahoo group: CPMA
Date: 2000-08-14 22:24:34 UTC
From: Steve
Topic: 159 Message: 161

There is an article in todays York Daily Record
Monday the 14th about the Towering Project for
the county. It talks about the plans for the
county and possible use of 700mhz for communications
in 3 or 4 years. The article mentions that
all the vhf and uhf frequencies are used up
in the area. Doesn't mention if the new
system will be using 700mhz for general
communications or just the tower links.

The article is in the inside section on page
100.

162. WEATHERBUG

Yahoo group: CPMA
Date: 2000-08-15 02:09:54 UTC
From: yorkfd@juno.com
Topic: 162 Message: 162

Found this in "Neat Net Tricks" and thought some of you, the Steves especially, might be interested in this:

03. WEATHERBUG. Particularly during periods of potentially disastrous weather, a weather alert radio is a handy thing to have. You can have the computer version in WeatherBug at http://www.weatherbug.com . There's no version for Mac or locations outside the U.S., but otherwise, it places a dynamic icon in your tray to display the current temperature. If a weather watch warning is issued, WeatherBug will "chirp" for 5 seconds and blink to advise of an alert, then display the alert message. A nice display shows temperature, wind direction and speed, other current readings, forecast, etc., to include the inevitable banner ads that keep the service free. The only problem I noted is in this program's persistence to restore an Internet connection. You'd have to disable it if you wish to work offline, certainly not a consideration if you use other than a dial-up connection.

168. Frederick

Yahoo group: CPMA
Date: 2000-08-17 00:02:06 UTC
From: David R Bennett
Topic: 168 Message: 168

Thanks Richard I did find that message useful. I am planning on going to Frederick on Saturday. Usually civilian performers use the Airboss and Discrete frequencies. Occasionally they will have their own frequency. I usually search for the civilian frequencies. They change from Airshow to Airshow. The Confederate Air Force will definitely be there. It is their show. The Six of Diamonds and Tora, Tora, Tora may be there. Both acts fly WW II era aircraft. The Shockwave Jet Truck will be there. I did not see any other modern plane civilian performers listed on their web site.
There is going to be an A-10, AH-64 Apache, F-14 and possibly an F-117 Stealth fighter flyby. The F-14 will probably take off from Martinsburg, WV because the runway at Frederick is too short. So I will monitor the UHF Approach frequencies for the F-14 and F-117.
Last year at Frederick the Airboss frequency was 120.95. The discrete was 122.775 and a UHF Approach/Departure frequency of 384.9 was active. I did not find a UHF Airboss frequency. At Martinsburg 297.0 is listed for Air National Guard. 124.3 and 236.6 are Tower frequencies at Martinsburg.
The most common VHF frequencies I have found for Airshows are: 122.725, 122.775, 122.925, 123.05, 123.15 and 123.475. 123.475 will only be used when the Golden Knights are not there. It is their regular frequency.

170. Annual picnic

Yahoo group: CPMA
Date: 2000-08-20 22:41:59 UTC
From: Greg Halpin
Topic: 170 Message: 170

Our annual picnic was once again a great success, with eight members/guests in attendance. As usual, we had much more food than we could eat, and everyone seemed to have a good time.

As a follow-up to what we discussed at the picnic today, I checked the
eGroups settings, and I cannot open up the chat area to anyone. A person must be subscribed to the group to access the chat area.

In other news, it was decided today that we will not be holding a meeting per se next month, but will instead be attending the hamfest in York on September 17th from 8:00 am to 4:00 pm.

Our organization has been given a table to set up a display at the hamfest. Everyone please feel free to stop by and see us at the hamfest. Additional information on the hamfest can be found at http://www.yorkhamfest.org/

Greetings,

It is my unfortunate duty to relate a Line of Duty Injury:

Officer Tim Roche of the Derry Township Police Department was critically injured early Thursday morning during a vehicle pursuit. Tim was attempting to lay down "stop sticks" on the roadway when he was struck by one of the vehicles being pursued.

He remains at University Hospital/Hershey Medical Center in critical condition, but is improving. He has undergone several operations to help heal injuries to his legs and face. Becuase of this, I am asking for your help.

Tim has needed a great deal of blood, and will need more. If you wish, you may donate
blood at the Central Penn Blood Bank. Please indicate that it is for Tim Roche at the Hershey Medical Center. Any blood type is fine. If you don't have access to the Central Penn Blood Bank, please donate locally to help someone else who may need it. Your help is greatly appreciated.

I also ask that you keep Tim and his family in your prayers and thoughts as he recuperates and recovers. Please also think of those fellow officers and emergency services personnel who responded and dealt with a situation involving one of their own.

Those who want to send good wishes, etc., can do so by using DTPD's web site at www.derrycops.com. The site is checked daily for messages because of the incident. Click on the "EMAIL" icon at the bottom of the left-hand frame. If it's easier, the email address is <derrycops@...>.

For those not local, I just ask for a prayer and a thought for Officer Roche as he mends. I (and the DTPD) appreciate any and all support through this difficult time.

Gordon

172. mIRC Now Installed and Operating

Yahoo group: CPMA
Date: 2000-08-23 11:02:16 UTC
From: kpa3mt@aol.com
Topic: 172 Message: 172

To Whom it may concern;
I just wanted to let everyone know that I re-installed mIRC and it is operational. As per the discussion at the picnic on Sunday regarding not being able to cut and paste using the egroups chat area, I would be more than willing to change location. Since we have 4 possible meeting places available ie. egroup chat area, ICQ, AOL Instant Messenger and mIRC. I would vote in order of preference:

1. ICQ
2. AOL Instant Messenger
3. mIRC
3 egroup chat area.

The only reason mIRC is so far down on the list is that from the past experience I had when we were using that, I pretty consistantly had difficulty logging on. Just a thought fellows. Catch you all Sunday night where ever it might be.

From: yorkfd@juno.com
Topic: 173 Message: 173

Just so you all know about it when the changes go into effect:

--------- Forwarded message ----------
From: newsletter-admin@...
To: eGroups-Moderator-News@egroups.com
Date: Thu, 24 Aug 2000 01:43:37 -0000
Subject: Important eGroups notification
Message-ID: <8o1uk9+em1a@egroups.com>

Dear eGroups Moderator,

You are receiving this notice because one or more of the groups you
moderate at eGroups will likely be affected by the changes described
in this notice. Please read on.

eGroups is committed to offering you a high-quality, easy email
group service. As a business, we have two choices in paying for this
service: one, charge members for its use, or two, include targeted
text and HTML banner advertisements within emails sent to group
members. eGroups members have shown an overwhelming preference
for a free, ad-supported service...and that's what we've provided.

To continue a high-quality, free, email groups service, we would like
to notify you about two modifications to these advertising policies:

1. Improved Ad Removal
eGroups already removes banner ads from message replies so they don't
'pile up' during email discussions. We've extended this technology
to remove text ads in addition to HTML banners. All members will
benefit from this improvement to the email group experience.

2. Movement of ads to the top of messages
eGroups already inserts ads at the top of message digests, within all
announcement-only and certain discussion groups. We are extending
this policy to include all groups.

Both of these changes will go into effect early next week.

For group owners who do not wish to have ads in messages to their
groups, eGroups continues to offer a "No Advertising Option." For
$4.95 (US) per month (payable in a single annual payment of $59.40),
we will exclude all ads from the messages for your group. For more
info on this option, please see:

http://www.egroups.com/info/noads.html

Sincerely,

The eGroups Customer Support Team

CPSC, Firms Announce Recall of Weather Radios

Oregon Scientific Media Contact: Jesse Rotman at (847) 948-5948

PRODUCT: Weather Radios - Oregon Scientific Inc., of Tualatin, Ore., is recalling about 10,000 desktop weather radios. These All Hazards Weather

Radios use S.A.M.E. technology to receive local weather warnings broadcast by the National Weather Service. The radios also function as AM/FM clock radios and have model number WR-122 printed on the bottom. Writing on the radio reads "NOAA Weather Radio" and "OREGON SCIENTIFIC."

The radios have two rectangular screens which display both a standard clock and a dot matrix display of weather forecasts and warnings of severe weather, such as tornadoes and hurricanes. Also, there are five black buttons on the right side of the radios that read "NOAA," "MESSAGE," "AM/FM," "PRESET" and "VOLUME." The unit measures about 6.75 inches long by 5.25 inches wide. The weather radio can be placed upright on a table or mounted on a wall. Office super stores, mass merchandise, home and hardware stores, catalog, and web sites sold the radios from December 1999 through July 2000 for about $70. Only radios with model number WR-122 are part of this recall.

PROBLEM: The radio can fail to decode certain signals broadcast by the National Weather Service or can provide incorrect warnings of severe weather that puts lives and property at risk.

INCIDENTS/INJURIES: The firm has received 12 reports from consumers that

did not receive an emergency signal broadcast by the National Weather Service. No injuries have been reported.

WHAT TO DO: Consumers should not rely on the recalled weather radios to

receive emergency information. Call Oregon Scientific for instructions on returning the radio to receive a free replacement. Oregon Scientific will reimburse consumers for postage. Consumers can call Oregon

Scientific at (800) 869-7779 between 9 a.m. and 5 p.m. PT Monday through Friday, or go to the firm's web site at http://www.websitetoday.net/osi.

This solves the Banner Ad problem.

Announcing AdsOff! v2.0

AdsOff! v2.0 works in the background to accelerate page loading, protect your privacy against profiling , and make browsing more enjoyable while you are connected to the Internet. By filtering unwanted and unneeded content such as advertisements, AdsOff! v2.0 significantly decreases the amount of bandwidth you use. AdsOff! works seamlessly with any browser on Windows 95/98/NT4/2000 and is fully customizable with optional filtering for annoying pop-up windows, cookies, and animations.

AdsOff! includes FemtoFast! technology that actively prevents all interactions with known ad servers. This technology prevents both IP and cookie tracking, increasing your privacy and accelerating page loading even further.

No matter how fast your connection is, AdsOff! v2 will make browsing the web more enjoyable, faster and more private. Try it and you won't go back!

Looks fine to me. Just opened it up, so you should be OK to delete it on your end.

Of course, it's going to look awfully lonely unless others come through with some articles today, which is the deadline for articles. I'll fill the front page as usual, and will probably write an article for inside, but other than that, I have the one you sent me.

I'm counting on Steve to come through with something today though.

> Catch you tonight on the Chat?

Sorry ... I'll be protecting the City this evening. Busch promised to appear in my place, but if he shows up to chat and produces an article for the newsletter I'm gonna start building an ark!

I'm taking the liberty of forwarding this from the Sony Wavehawk list.

Date: Wed, 06 Sep 2000 00:03:08 -0000
From: remler@...
Subject: Hearing Weird Aircraft Signals with your Sony SC1 Scanner

Hearing Weird Aircraft Signals with your Sony SC1 Scanner

A Revised Repost from the SonySC1 eGroup per Wavehawk eGroup Request

If you want to hear some unusual signals while exercising the 1000+
MHz capabilities of your Sony SC1, try punching up the following
frequencies and mode:

1090.000 MHz, AM mode
1030.000 MHz, AM mode

The receiver works just fine at these frequencies with its supplied
rubber ducky antenna. You should unsquelch the SC-1 to hear the
target signals, and keep the antenna vertical.

What you should hear, if you're anywhere near an airport and listen
really carefully, is a bunch of short bzzt bzzt sounds, almost like
the SC1 is receiving static bursts. You may also hear an occasional
tone or whistle-like burst in amongst the others. On the 1090 MHz
frequency all these signals will be much more prevalent than on 1030.

On 1030 MHz, if you're close enough to an airport, you may hear the
bzzt's every five or ten seconds, with a few of those musical
tone-bursts thrown in at random times. You can confirm that you're
really receiving these signals by either removing the antenna or
tuning a few MHz off these frequencies -- the buzzies will disappear
in either case.

What are you listening to? Every commercial and nearly every private
aircraft in the U.S. is equipped with a transponder -- a device that
responds to a coded bunch of pulses sent from the ground, sending
back a reply that's also a coded burst of pulses. The ground
transmitter has a directional antenna that swings around every five

or ten seconds, "interrogating" all the aircraft transponders in the vicinity. All the aircraft transponders within 60 to 200 miles (depending on the ground station) reply with a coded aircraft ID and if so equipped, the aircraft's altitude. The ground station can then display to air traffic controllers where an aircraft is (it gets the range by measuring the time between an interrogation and a reply, and the azimuth by knowing the direction its antenna was pointing during the exchange). The ground interrogator can also track an aircraft by its ID code.

The airborne transponders transmit their burst of pulses, using a peak power of some 250 watts into an omnidirectional antenna, on 1090 MHz. That's why you'll hear more activity on this frequency -- aircraft are generally high in the air and have a good line-of-sight path to you, there are lots of them, and they may be replying to more than one ground interrogator. Ground interrogators operate on 1030 MHz and their antennas swing around every five or ten seconds, so you'll hear a periodic bzzt whenever you're in their beam and aren't too far away from a fairly large airport.

But on both frequencies you'll hear that tone-like whistle burst as well. These are the signals from aircraft equipped with the latest air traffic control transponders called "Mode S." Whereas the older transponders only allow for 4096 ID codes assigned by the air traffic control system and dialed in by the pilot, every Mode S-equipped aircraft has its own unique code tied to its airframe, and the pulse burst supports millions of codes. In addition, the Mode S interrogation-reply sequence is much better coordinated than with the older transponders, so that there is much less interference on the channel. Finally, Mode S equippage makes possible the collision avoidance system now in use by all commercial airlines (called TCAS). It's the airborne TCAS units tweeting at each other that you're hearing on 1030 MHz in addition to the ground interrogators.

It's amazing to me that the Sony AM detector can even respond to these pulses -- each pulse is on the order of 1 microsecond long! It's more likely that the receiver is demodulating the burst (rather than the pulse) envelope, consisting of a string of many pulses, and which has frequency components in the audio range. The Mode S pulse trains are so long that they can sound a bit musical.

A friend of mine tried this same reception trick with his fancy Alinco wideband handheld, and heard nothing but receiver noise. I was successful in hearing the transponder traffic on an AOR 3000A receiver, but that's a base station scanner that costs more than 10 times what most of us paid for our SC1's. It's a real tribute to the Sony designers that the SC1 easily lets the scanner enthusiast eavesdrop on the sounds of our air traffic control system.

-- Rick Ferranti
remler@...

July 20, 2000 revised September 6, 2000

Footnote regarding digital demodulation of these signals:

Unfortunately, there's no hope for
decoding these transponder signals with a sound card or a
discriminator tap. The pulses are from 0.5 to 1 microsecond long,
which means that you need to have a receiver bandwidth of at least 1
to 2 MHz to receive them without smearing one into the next. The 10
kHz AM bandwidth of the SC-1 is much too narrow - it smears the
pulses so badly that what you hear is really the long burst trains,
and not the pulses. Even the WFM bandwidth is too narrow, and you
can't demodulate these on-off pulses with an FM detector anyway.
When I used the AR-3000A as a receiver, I tapped its i-f before the
filters, and even then the pulses were pretty rounded off. If you
could get to a wideband tap point in the SC1, you would still have to
log detect the pulses, and then sample them at about 2 MHz with an
A/D, which is pretty exotic stuff. Finally, you'd need a decoder to
unscramble the pulse coding.

What you'd get wouldn't be very pretty - just a jumble of aircraft
ID's and altitudes pouring out of your computer screen. Plus a lot
of garbled junk as the replies "step on" each other....remember, the
real ATC interrogator is a narrow beam system and descrambles all the
replies out there by careful timing of its multiple interrogations
and the replies.

Oh well, the idea I'm trying to put across is that the Sony can at
least hear these unusual signals, something that most receivers,
particularly ones costing under $100, can't hope to do.

184. newsletter

Yahoo group: CPMA
Date: 2000-09-07 04:18:43 UTC
From: yorkfd@juno.com
Topic: 184 Message: 184

Well folks, I have put together the information that I have received for the latest issue of our newsletter, the Central Pennsylvania Communicator.

However, I'm not really proud of this issue. Currently, it only contains four pages, and I have written over two pages of it myself. I received one article each from Steve Hancock and Dave Bortzfield, but that's all.

Normally, our newsletter are six pages long, except for original issue, which had eight pages.

So, I guess this is a plea for more articles. I can't write two more pages of articles for this issue, I'm drained out. Anyone care to come through with some more for this issue within the next couple of days? I'd like to have a nice newsletter to hand out at the Hamferst on the 17th.

Greg

Greg

--------- Forwarded message ----------

Considering that it is over budget and behind schedule, my guess is that it
is not working correctly. I have heard little activity on the system thus
far, and none south of Dauphin County. Cumberland, Fulton, Adams, Perry,
and Franklin have all been silent. There have been white vans w/ multiple
antennae on them at some local repeater sites. They look like the PSP commo
vans, but could be something else. Also, some really weird stuff came
across the 154.28 Fire/EMS mutual aid channel last night. A local police
department had apparently purchased some new surveillance transmitters that
just happened to come programmed on that freq. Cumberland County Control
contacted Franklin County Control and got the situation taken care of. The
comms consisted primarily of units giving their positions and the other
units giving the signal quality, in other words, just testing out the new
equipment. One unit was heard speaking of taking it up the hershey highway,
however I have no idea what that had to do w/ anything. From what I
understand, the equipment will be reprogrammed immediately, so as to avoid
this happening again. Did anyone else hear this? Our Comm Center got it on
tape. I assume Cumb. Co. also has it recorded.

194. Delaware State Police Dispatch now online

Yahoo group: CPMA
Date: 2000-10-24 21:16:29 UTC
From: yorkfd@juno.com
Topic: 194 Message: 194

Found this on the SCAN-DC mailing list. Quite interesting that the State of Delaware actually runs this site. Imagine Pennsylvania doing live Internet broadcasts of PSP dispatches!

Greg

--------- Forwarded message ----------
All-
The DSP now has their dispatch channels online at:
http://www.state.de.us/emergenc.htm

For the unfamiliar, Delaware has a statewide digital trunked system, which
renders normal scanner listening impossible. . .

Subject: RE: FIRE-L: Question about this GPS Unit by GARMIN:
StreetPilot
Message-ID: <0.1700006937.838236144-212058698-973346270@...>

I own several GPS units, all Garmin. By far, my favorite and the most
useful is the GPS III+. The Streetpilot is big, very big and requires
memory sticks to swap maps. The color Streetpilot sucks up batteries.
You
can upload directly to the III+.

The GPS III+ is reasonably sized, you can upload maps and use the NEMA
format string for other purposes, such as vehicle position reporting via
radio. It has it's own display.

I buy my units from http://www.gpscity.com. I'm not affiliated with
them,
they are several states away. I've found their prices to be reasonable
and
the service excellent. You can call them on the phone and have a real
discussion.

Here is a great resource page http://joe.mehaffey.com/ If you want to
make
your own cables, save on the high cost of Garmin produced cables and
ends,
buy your own ends here, much cheaper

197. Pozilla Software

Yahoo group: CPMA
Date: 2000-11-16 01:17:02 UTC
From: k2epm@aol.com
Topic: 197 Message: 197

I just thought you all should be alerted to a possible problem. I picked up a copy of Pozilla's WinScan SC Ver 2.0 from ScannerMaster nearly two weeks ago. The day the software arrived (11/3) I installed it on a new Compaq 5000 series desktop. When I tried to run the program I immediately got a "runtime error" and the program shut down.

I called Pozilla that afternoon at the tech support phone number that was listed on the CD jewel case, I was greeted with an automated response system that directed me to a voice mail. I left a message. At the same time I sent them an e-mail.

I have called 3 more times, the latest being today. Pozilla has still not returned any of my calls.

I asked around and tried to troubleshoot the problem on my end. Compaq tech's had me go as far as reformatting my hard drive and reinstalling Win 98; even that did not solve my problem....and again...Pozilla does not respond.

The odd thing, is I did get the software to operate on an older computer and the shame of it is...it is a real nice package for programing the Sportcat 200. I must admit that it is a vast improvement over Ver 1.0.

Last night I spoke with a fellow in St Louis who happens to be a regular columnist for Popular Communications; he to was having installation problems with a version he has for a review.

At this time, until I can get some explanation as to why Pozilla does not provide technical support, I urge all of you to stay away from purchasing their products.

Message-ID: <c6.dbb2038.274dd2cb@...>

LOCAL AIRFIELD PROFILE

WEIDE AAF AIRPORT

Location: 2 miles south of Edgewood Arsenal, Maryland (3923N/7617W)

Units:

Maryland National Guard Helicopter Unit

Aircraft:

AH-1 Cobra

UH-1 Huey

Callsigns:

Guard ###or Guard #####

261- AH-1 Cobra
326-poss UH-1
382 UH-1
452-poss UH-1
480-UH-1
860
900
15228
15257
15259
21750
21927
21929
23444 UH-60
24052 poss AH-1
24066- AH-1 Cobra
016353- UH-1 Huey
22427-

I believe the 1#### helos are UH-1s and the 2#### helos are AH-1s

According to a MD NG member, the AH-1s will sometimes use the callsign
Sabre
and the UH-1s will use Beast. The Sabre callsign is taken from the
cavalry
sabre which is on the squadron patch.

FREQS:

126.2 Tower & VFR advisory
241.0 Tower & Army common
229.4 Weide Ops
38.4 Weide Ops
242.4 NG Common
246.8 MD NG interplane

121.3 MARTIN STATE TOWER
119.0 BALTIMORE APPROACH
119.7 BALTIMORE APPROACH
124.55 BALTIMORE APPROACH
128.7 BALTIMORE APPROACH
125.525 BALTIMORE APPROACH (used during maintenance test flights)

Runways: 01/19

Weide Army Airfield is the home of the Maryland National Guard's
Aviation Unit. They fly Tues-Fri between 0800-1600, Tues & Weds 1600-2230
and
on most weekends.

The unit area of operations includes Maryland, Virginia, West
Virginia,
Pennsylvania, Delaware & New Jersey. The use ranges at Ft. Dix, NJ and
Ft.
A.P. Hill Virginia.

Subject: [Scan-DC] Profile- Phillips AAF
Message-ID: <3c.3ea7eb2.274dd20c@...>

All,

Here's one of a series of unit profiles that I compiled for my own use.
Thought some of you might be interested:

LOCAL AIRFIELD PROFILE

PHILLIPS AAF AIRPORT

Location: 2 miles south of Aberdeen Proving Ground, Aberdeen Maryland

Units:

Parent command is the US Army's Test & Evaluation Command

29th Inf Div Light Aviation Unit

Aircraft:

UH-1 Huey
UH-60 Blackhawk

Callsigns:

PAT ###
JOSA ###
Guard ### or Guard #####

FREQS:

126.15 Phillips Tower
241.0 Tower & Army common
229.6 Phillips Ops
242.4 NG Common
246.8 MD NG interplane
121.9 Phillips Ground

121.3 MARTIN STATE TOWER
119.0 BALTIMORE APPROACH

119.7 BALTIMORE APPROACH
124.55 BALTIMORE APPROACH
128.7 BALTIMORE APPROACH
125.525 BALTIMORE APPROACH

Runways: 04/22
08/26
17/35

As home of the Test & Evaluation Command, Aberdeen (Phillips)
receives
regular visits from both PAT (Priority Air Transport) and JOSA (Joint
Operational Support Aviation) aircraft. Phillips also serves as an
alternate
airfield for the MD NG helicopter units based at Weide AAF.

Subject: [Scan-DC] Profile-Martin State Airport
Message-ID: <9a.c64fa13.274dd243@...>

LOCAL AIRFIELD PROFILE

MARTIN STATE AIRPORT

Location: 9 miles east of Baltimore, Maryland (39-19-32N 76-24-49E)

Units:

175th Operations Group 104th Fighter Squadron

Aircraft:

A-10s, OA-10s

Callsigns:

COLT
RAVEN
AXEMAN
PHASER
WARDOG (OA-10S WHEN IN FAC ROLE)
SPORT (WHEN IN TRANSIT)

FREQS:

34.4 CHNL 1
34.6 CHNL 2
36.8 CHNL 3
40.15 CHNL 4
41.45 CHNL 5
41.4 CHNL 6
41.95 CHNL 7

143.8 Supervisor Of Flying (SOF)/OPS (also called Raven Ops)
347.2 RAVEN CP UHF # 1
297.2 MARTIN STATE TOWER
228.4 BALTIMORE APPROACH
231.6 BALTIMORE APPROACH
287.1 BALTIMORE APPROACH UHF # 9
325.8 BALTIMORE APPROACH UHF # 8
307.9 BALTIMORE APPROACH

135TH Airlift Squadron

Aircraft:

C-130H

The 135th is currently being refitted with new C-130J models. The first C-130J was delivered in May 1999.

Callsigns:

WITCH ##
MIZZEN ## (Sometimes used on deployment/overseas flights)

FREQS:

121.3 MARTIN STATE TOWER
119.0 BALTIMORE APPROACH
119.7 BALTIMORE APPROACH
124.55 BALTIMORE APPROACH
128.7 BALTIMORE APPROACH
125.525 BALTIMORE APPROACH
385.9 WITCH CP
343.0 WITCH Air-to-Air

Their flight activity is a little sporadic. I haven't been able to pinpoint any true pattern. Seems they like to fly on Weds & Thurs mostly in
the afternoons, as well as on Sat.

The A-10s will practice in the Patuxent River NAS (PAX) restricted areas (R-4005, 4006) and use the PAX Advisory freqs 354.8/270.8 as well as the Washington Center freqs 281.4/256.8

The A-10s also will practice air-to-ground attacks at either the Warren Grove
MOA (286.2) just outside of Philly or the Kiowa MOA (237.2) just outside of
Harrisburg at Ft Indiantown Gap.

The C-130s tend to practice navigational flights in the local area and will
occasionally fly to Andrews or over to Harrisburg or Dover for practice ILS
approaches. They have also been noted practicing night drops over at Phillips
AAF at Aberdeen.

Other Martin State Frequencies:

ATIS: 124.925
GROUND: 121.8
253.4

Runways: 15/33

Martin State Airport is also the home of the Maryland State Police
Aviation Unit. Their Hqs is at Strawberry Point at one end of the
airfield.
The MSP aircraft use the callsign TROOPER and refer to their landing area
as
"the Point" or the " Bear's Den." The unit flys the SA-365 Dauphin
helicopter
as well as a Cessna 172 (Trooper 9) and a King Air C-90 (Trooper 10).

Martin State also houses the Baltimore County Police aviation unit
flying
helicopters using the callsign COUNTY AIR 1 & 2. They also use the
Strawberry
Point landing area.

207. Fw: [Scan-DC] Article about Carroll County trunked radio coverage

Yahoo group: CPMA
Date: 2000-11-29 22:33:01 UTC
From: yorkfd@juno.com
Topic: 207 Message: 207

Found this on the SCAN-DC list ...

--------- Forwarded message ----------
From: "Bryan Costin" <bcostin@...>
To: <scan-dc@...>
Date: Sat, 25 Nov 2000 15:17:58 -0500
Subject: [Scan-DC] Article about Carroll County trunked radio coverage
Message-ID: <LGEEIPGHGOGDOHHPCEJNGEAPCJAA.bcostin@...>

Here's an article that appeared in the November 23, 2000 issue of the Carroll County Times. It's in regard to a recent fire and the difficulties posed by the ongoing 800MHz coverage problems in the Lineboro area of Carroll County.

Gap in county communications hampers efforts to battle blaze

LINEBORO - Volunteer firefighters battling a woodstove blaze at a 19th-century River Valley Ranch machine shop Wednesday said the scenario was a perfect example of how poor radio coverage in the area makes their job more difficult.

Lineboro volunteer fire company Second Assistant Chief Dave Dickmyer got to the scene on Grave Run Road just before 10 a.m. Wednesday and said he didn't know what to expect.

``The messages I was getting weren't clear,'' Dickmyer said after the fire was under control.

Because of a dead spot in the coverage of the county's 800 megahertz radio system, Dickmyer said companies had to switch to old low-band radios, ones that some companies, such as Hampstead, no longer have. That meant sometimes firefighters needed the low-band radio in one hand and the 800 megahertz radio in the other.

The county switched to a modernized 800 megahertz system in 1997. Since the firefighters reported problems in the $8 million radio system's coverage

in
the Lineboro area several years ago, the county has been trying to find a site for a new radio tower in the area.

Dickmyer and Lineboro fire company President John Warner said Wednesday's fire showed how difficult it can be for fire companies to communicate in the
Lineboro area without a new tower there.

Fire companies from New Freedom, Glen Rock, Manchester and Hampstead responded to the fire, with a total of about 40 firefighters and 12 fire trucks.

Officials at the scene said the fire started in a woodstove at River Valley
Ranch's machine shop. River Valley Ranch, located near Lineboro, is a summer
camp for children.

Firefighters pointed out that the situation could have involved more peril
if it had occurred in the summer, when the camp serves about 225 kids per week.

Greg Doran, River Valley Ranch director of operations, said that there were
only about six staff members at the facility Wednesday.

Calling it an ``unfortunate accident,'' Doran said the camp inspects its buildings monthly. He said the machine shop was built around 1850 and is used as a place to repair lawnmowers and other equipment at the camp.

The fire burned the roof off the shop, but there were no reported injuries.

Although firefighters got the fire under control in about 10 minutes, Warner
said the radio situation made it difficult to figure out what other companies were doing at the scene. When his firefighters wanted to tell Hampstead firefighters to bring a hose further up the road near the burning
building, for instance, he said they couldn't use the radios.

``You have to make hand signals,'' Warner said. ``We didn't have any confirmation as to what their actions were.''

Warner said he is getting impatient about the radio problem in Lineboro and
wants to find a way to force the county to build a tower in the area.

Buddy Redman, director of the county's Office of Public Safety, said the county is still working with the state to find a site for a $750,000 tower

near Lineboro. He said the county will build a tower one way or another
and
that construction could begin by April.

During Wednesday's fire, he said, the county's Emergency Operations
Center
did not report any communications problems.

``If you get on the scene and the radio doesn't work, you should
switch,''
Redman said. ``But I can't second-guess what they're doing on the
scene.''

210. 142.325 MHZ WHERE IS IT LOCATED? WHO OWNS IT? WHAT IS IT USED FOR?

Yahoo group: CPMA
Date: 2000-12-07 13:16:00 UTC
From: John T. Bohn
Topic: 210 Message: 210

There is constant data being transmitted on 142.325 mhz, I had reports that it is located near lancaster, pa possibly near the susquehanna river area. I've been hearing this signal for aprox. 4 years now and I would really love to know exactly where it is located and who it belongs to and what it is used for? I think that it may have something to do with the susquehanna river? I live in pottsville, pa and the signal here is about s-3 sometimes it's even stronger s-5 or better. I tried to decode it using my pk-900 tnc but had no luck. I hope someone out there can help id this signal!!!!

I'm sure that Dave, our Lancaster County monitorer extraordinaire, will be plugging that into his scanner and filing a report.

I know that the USGS has river monitoring stations all along the Susquehanna, perhaps this is one of their stations sending data back to them. Visit http://wwwpah2o.er.usgs.gov/rts-cgi/gen_tbl_pg?PAGE=2 for details on their rivir stations.

I just popped it into my scanner, and I'm getting nothing in York.

218. METROPOLITAN EDISON Edacs system for York County

Yahoo group: CPMA
Date: 2000-12-12 23:59:40 UTC
From: Steve
Topic: 217 Message: 218

I been playing with the Pro-92 I picked up a couple
weeks ago. It has some quirks but works very well as a
conventional scanner. No opinion as a turnking scanner
yet.

I started to look for trunking systems in the York area to
test the scanner on. He is what I have on the Met Ed
Edacs system so far.

Frequencies:

856.7625
857.7625
858.7625
859.7625
860.7625

Talk-IDs:

0545
0546
0558
0578

I haven't IDed what/were the Talk-IDs are yet.
It may be the four areas for assigned these
freqeuncies. Red Lion, North Zions View, Hanover and Dillsburg.

If anyone else has anything else for this system or have ID's and
frequencies
for other York area trunking systems in the area please let me know.
I have found one other EDACS system but haven't entered it yet.

Steve

230. Chase firetrucks online at the Seattle Fire Department's Web site, in real time

Topic: 230 Message: 230

Chase firetrucks online at the Seattle Fire Department's Web site, in real time

by Bernard McGhee
The Associated Press

Life has gotten easier for ambulance chasers.

A new feature of the Seattle Fire Department's Web site lists real-time information about 911 calls, letting people get the city's emergency information while sitting at their computers.

The site is already being credited with cutting down on calls to emergency dispatchers, according to Leonard Roberts, information-systems director for the Seattle Fire Department.

The system, which is maintained by the Seattle Fire Department, was first used during the riotous World Trade Organization conference last year, Roberts said. It allowed authorities to monitor what emergency-response crews were doing throughout the city without having to leave their desks.

Now, anyone with Internet access can go to the site and see what the Fire Department is doing throughout the day.

The site gives viewers a list of dispatch calls that tell them the location, time and type of call, and the incident number.

But the Web site serves a purpose beyond simply sating voyeuristic desires to look over the shoulders of firefighters.

If people can find out about dispatch calls by going to a Web site they'll be less likely to tie up the department's phone lines with calls asking for information, Roberts said.

Roberts said he doesn't know how many people have visited the Web site, but since it got off the ground, dispatchers tell him they're getting fewer calls from people asking about incidents.

Even emergency personnel keep their computer browsers on the emergency site, which updates every minute, Roberts said. For them, the site acts as a police scanner that doesn't make any noise.

And the Web site has started getting attention outside Seattle.

The chairman of the zoning and planning commission in Justice, Ill., in the Chicago suburbs, would like a similar Web site put in place there.

"It's really kind of neat the way it works," said John Bruce. "You could look at it possibly as the next phase from a scanner."

But so far, efforts to establish a similar Web site in Justice have been hindered by the amount of money needed to get it off the ground, Bruce said.

Roberts plans to add more features to the Seattle Web site.

For example, besides a list of dispatch calls, Roberts would like to see a feature that would allow attorneys and insurance agents to get information about accidents such as incident numbers. This would speed things up when people are trying to get accident reports for court cases or to handle insurance claims, Roberts said.

He also plans to post other online-request features and even photos.

But will the site make it easier for ambulance-chasing lawyers to find clients?

"I'm sure people will do that," Roberts said.

Hi Brad,

I also picked up the Pro-92
over the holidays. I'm from
the York area. Have all the
York local stuff programed in.
Been playing with some of the trunking
systems in the area. Found 3 or 4
EDACS systems and one Motorola system.
All business and utility companies. If
no one else posts Jackson Township I
will look it up when I get home.

When I get some more ID's for the
Trunking stuff I will post it to the
list. Met-Ed EDACS trunking system
was very interesting to listen to
during the last winter storm.

Have anyone else on this list map
trunking systems for York, Dauphin,
Lancaster area?

Trunker software seems to do a good
job of mapping it. I just started this
trunking stuff and been using the
Optocom/OS535 combo and the Pro-92.

You have to be fairly close to LA to pick it up... The control frequency for the "good" trunk moves around every night and is usually on 856.9875, 857.9875, 858.9875,or 859.9875 Other possibility is either 855.9875 or 860.9875, but like an idiot, I can't remember where the trunk starts and stops...lol There is also another 5 channel trunk for local operations, but I never even monitor it since I can't pick it up in EP.

Lower Allen Twp is a Motorola type II system
using the following channels ending .9875 ie
856,857,858,859 and 860. The control channels
change once each 24 hours being 859.9875 and
860.9875. Good Luck Dick

248. York City Fire Radio

Yahoo group: CPMA
Date: 2001-01-05 00:00:57 UTC
From: yorkfd@juno.com
Topic: 248 Message: 248

Testing has begun on one of the York City Fire Department's radio repeaters.

The repeater at the county's "Queen Street" site is now on-line on the main fire channel. All portable radios have been set up to transmit through the repeater.

The eventual plan is to have the county's "Pleasureville" site repeating the main fire channel (154.190 MHz output) and the "Queen Street" site to repeat the operations channel (154.235 MHz output). The "Queen Street" site will be able to be switched over to Fire Main should a problem occur at the "Pleasureville" site.

Three additional channels will be repeated at the Fire Headquarters tower site, a 60' tower erected behind the Fire Headquarters building in downtown York. I suspect that most people outside of the metropolitan area will not be able to copy those repeaters.

We are still awaiting final licensing from the FCC. Frequency/PL info will be forwarded upon final approval by the FCC.

Please send any reception reports for portable radios operating on 154.190 MHz to me.

Greg

From: Dispatch
Topic: 259 Message: 259

National Incident Notification Network

Do you listen to police, fire, EMS radios? Do you like to know what is going on before hearing about it on the news?

Well NINN is for you then. NINN is a group of people from around the country that listen to police, fire, EMS and other radio frequencies to bring you the latest, and first hand report of what is going on in your area via Email, or by Alpha Numeric pagers.

Dispatchers and Administrators Needed

Do you want to make a difference in what the "people of your area hear??
Are you interested in working with a system, and group of people that want to make a difference?

Our system, and policies help you make that difference, so you can get the real news out there. NINN doesn?t have 1 person making the decisions; it has a board of directors of 5 persons making the decision, and many more on the support side of our program. No more weeks of waiting for an answer from support.
This is a Free Service, All You have to do is log on to http://www.ninn.net enter your email or pager address and start receiving Alerts
Immediately after entering your address, no forms, no approval, you will be Informed of in Progress Incidents as the happen,
NINN is in need of Dispatchers Throughout the United States, at this time all States are not in Active Status if you would like to become
A Dispatcher, a short Application form is available here http://www.ninn.net/dispapp.html
Dispatcher duties, Monitor Public Safety Communications via Scanner Radio or other device and when interesting events happen
Post the event to other members in your State, if you have any questions contact support@... and we will be happy to
Answer them. As NINN Administrative Support is Incredibly Efficient, within a brief period you will receive Your Dispatch ID # and then you become part of

the Action!
Links for NIMM egroups by Region are enclosed, to find
your Region click here http://www.ninn.net/regional/
Thank you for your time,
NINN Staff

Yahoo group: CPMA
Date: 2001-01-26 06:32:02 UTC
From: k2epm@aol.com
Topic: 260 Message: 260

If you know anyone looking for a basic, bare bones, hand held scanner....Walmart has the Uniden BC-45XLT on sale for $40 bucks, I think this may be a closeout.

The BC-45 XLT is a 20 channel, scanning receiver that covers 30-512MHz. It uses 4 AA batteries (not included).

As of 1/25 the Walmart in Uniondale (Long Island) had 4 of them left. I am told that the Walmart on SR 200 in Ocala, Florida has about 35 - 40 of them left. Walmart keeps these things near the automotive dept, usually with the car stereos.

262. eGroups to YahooGroups

Yahoo group: CPMA
Date: 2001-01-26 21:33:06 UTC
From: yorkfd@juno.com
Topic: 262 Message: 262

Last night, eGroups (formerly OneList) was converted over to YahooGroups.

Apparently the change didn't go smoothly, as list users are currently unable to access their mailing lists. I cannot even access the sites for the lists that I own/moderate.

Please hang in there for a day or two to see if the folks at Yahoo straighten it out. If it doesn't get fixed in a timely manner, we'll have to take a look at some alternate mailing systems.

From: yorkfd@juno.com
Topic: 263 Message: 263

Thanks to a fellow user (thanks Gary!) I have now found the page we all need to go to in order to convert our settings to the new Yahoo Groups.

Please visit the following we page - http://groups.yahoo.com/convwiz - and follow the instructions. If you are already registered as a Yahoo user (email, games, shopping, etc.) make sure you have your Yahoo user name and password ready. If you are not a Yahoo registered user, you'll need to register with them.

It's all pretty much quick and painless, it just wasn't conspicuous. Please take a few minutes to update your information and you'll be able to access the sites as you could before.

Subject: [Scan-DC] DIGITAL Scanners on the Horizon
Message-ID: <c4.f57853c.27ac92a7@...>

I have been contacting Uniden Corporation concerning whether they have
any plans on the drawling board concerning digital trunk-tracking
scanners.

Last week I received a brief email from one of their technical people.
She stated that there is already plans to release one in 2001. I pressed
her for any details but she was adamant about not discussing the details
citing the desire not to release "trade secrets" to their competition.

It seems my friends that there may be light at the end of the tunnel
afterall for all of us who may be frustrated with the current move by
public safety agencies to digital radio communications.

Of course, I would expect encrypted radio traffic to still remain secure
for those agencies who use them such as the FBI and Secret Service.

Date: 2001-02-03 04:13:11 UTC
From: kpa3mt@aol.com
Topic: 269 Message: 269

Greg; I checked out and downloaded the Scanner Recorder. It's missing one very important feature that Rec-All-Pro has and that is setting a limit to the length of recording time. I personally use a 30 minute total record time. That's about what I would get anyway out of my VOX "tape" recorder. Good thought though. David H. Bortzfield Central Pennsylvania Monitoring Association North American Monitoring Association - NAMA862 CPMA Home Page (http://members.aol.com/cpmaclub/) ICQ # - 58683915 [Non-text portions of this message have been removed]

Thanks again to all you fellows who helped me out. I am from Long Island and on March 7, 8, and 9 I will be meeting up with two buddys to hang out in the Lancaster, Strasburg, Intercourse area. Wew'll probably hit the Rail Road museum and do a lot of eating. Mike-AC4XS is from Kentucky and Tom-WA8PYR is from Ohio. On the 10th we will be heading over to the Winter Shortwave Festivale in Kulpsville, PA. The fest actually starts on the 9th.... but we plan on leaving Lancaster in the early morning hours of the 10th.

We will be giving a lecture on scanning at the Fest on Saturday. For more information about the fest visit the following web page:
http://www.trsc.com/winterfest.html

Want to try LTR with the Pro-92 scanner.
Only trunking type I haven't tried.

CUMBERLAND COUNTY, PA is the FIRST non-state agency to join the PENNSYLVANIA Statewide Radio System provided by MA/COM.. Cumberland County will be upgrading from TDM Modular to "The RESOURCE" on an ORBA-NET CPP platform and adding positions to their center. The sale is a result of a M/A-Com PURCHASE ORDER under which Orbacom is manufacturing communications consoles and switch interfaces for their OPEN SKY (tm) network. More info at: Orbacom News! (http://www.orbacom.com/orbanews.htm)

Does anyone know what radio frequencies PP&L POwer uses?

I periodically enter PPL frequencies, and the active ones in Lancaster County
are as follows: 37.460 37.60 37.62 37.74 37.76 37.82

No guarantee of course whether they will be active in your area but give them
a try.

302. FM Stations

Yahoo group: CPMA
Date: 2001-03-27 00:20:47 UTC
From: Steve
Topic: 300 Message: 302

I came accross a list of FM stations withing York listening area.
There are a couple stations I did not know about.

W204AG 88.7 8 watts York, Pa
W214AC 90.7 19 watts York, Pa

Anyone know who they belong to?

I haven't heard anything on them yet.

Thanks for the reply Chris. I have York College as

WVYC 88.1 36 watts

Ask your brother if they have any other stations or know
of anyone else that has low power.

I'm receiving both of them on my PRO-2006 here by the computer. I'll see if I can pick up IDs while I'm sitting here.

88.7 sounds like it might be religious music. 90.7 sounds like jazz.

I listened to this one for at least half an hour. It's definitely religious programming. ID'd as "Instructional Ministry of Family Radio" and later I heard "WKDN, Camden, Philadelphia" so apparently they were rebroadcasting programming from a different station.

I'll try listening to this one during the day some time to see if I get a different ID on it.

I listened to 90.7 a bit more today. It is broadcasting Temple University radio. Perhaps they have a new simulcast transmitter in the York area.

I also listened to 88.7 again. They once again identified as "Family Radio" with religious programming.

From: Greg Halpin
Topic: 313 Message: 313

Well, one of them is solved. Caught the address for their web site today (www.wrti.org) and popped in to check it out. Found the following info on the "Control Room" page:

Temple University Public Radio
TUPR, Temple University
Annenberg Hall (011-00)
Philadelphia, PA 19122
215-204-8405

WRTI
90.1 FM - Philadelphia
97.7 FM - Reading
97.1 FM - Allentown
WRTQ
91.3 FM/Ocean City
WJAZ
91.7 FM - Harrisburg
90.7 FM - Ephrata-Lebanon
90.7 FM - York
WRTX
91.7 FM - Dover
WRTY
91.1 FM - Mt. Pocono
94.9 FM - Wilkes-Barre
99.1 FM - Pottsville
105.9 FM - Scranton

314. FM Station - 88.7 - Family Radio

Yahoo group: CPMA
Date: 2001-03-28 22:35:03 UTC
From: Greg Halpin
Topic: 314 Message: 314

And now the other one is solved as well.

Did a search for "Family Radio" and came up with a link to "Family Radio World Wide" (www.familyradio.com) and dug around their web site a bit.

Seems they have quite a network of transmitters and translators. Found the following info for Pennsylvania:

Pennsylvania Stations

Erie 88.1 FM WEFR
Johnstown 88.9 FM WFRJ

Pennsylvania Translators

Altoona/Bedford 90.7 FM WFRJ
Bellefonte 88.7 FM KEAR
Berwick 90.3 FM WKDN
East Stroudsburg 97.3 FM WKDN
Emmaus/Allentown 88.7 FM WKDN
Freeland/Hazleton 89.3 FM WKDN
Harrisburg/Carlisle 101.7 FM WKDN
Lebanon/Lancaster 97.7 FM WKDN
Muncy/Williamsport 90.9 FM KEAR
Nanticoke/Wilkes-Barre 89.5 FM KEAR
Palmerton 105.9 FM WKDN
Reading 89.3 FM WKDN
Scranton 103.9 FM KEAR
Stroudsburg 88.9 FM WKDN
West View/Pittsburgh 97.7 FM WFRJ
York 88.7 FM WKDN

Just heard them ID the local transmitters as being operated by "New Life Broadcasters" and listed the following transmitters/translators in Pennsylvania:

Emmaus 88.7, Carlisle 101.7, Lancaster 97.7, Reading 89.3 and York 88.7

(from the Scan-PA List)

ROHN Awarded Additional $20 Million For Final Phase of Statewide Radio Network

PEORIA, Ill., March 29 /PRNewswire/ -- ROHN Industries, Inc. (Nasdaq: ROHN), a leading provider of wireless infrastructure equipment for the telecommunications industry, announced today that it has reached a supplemental agreement with the Commonwealth of Pennsylvania, Governor's Office of Administration, to construct radio tower sites in two additional regions of the state. These tower sites are part of a pioneering, statewide radio network linking Commonwealth agencies and offering enhanced emergency communications capabilities. This supplemental agreement brings the total expected revenues under the contract, initially $40 million in July 1999, to $60 million.
ROHN is currently working with the Commonwealth of Pennsylvania to build a network that allows enhanced radio communications for state agencies with mobile employees in the field. The Company was previously awarded a contract for completion of site-development work in four out of six regions; this new agreement assigns ROHN the responsibility of completing the site development work in the last two remaining regions.
"We are delighted by the Commonwealth's decision to expand our contract," said Jud Pearson, Vice President of ROHN Construction. "Over the past year and a half, ROHN has worked in conjunction with the Commonwealth of Pennsylvania to develop a technologically advanced and comprehensive network for the benefit of all Commonwealth employees.
The new agreement is a strong indication of their confidence in our ability to meet the demands of such a large-scale and complex project, and I am proud that the Commonwealth of Pennsylvania recognizes our commitment to

excellence."
"Our partnership with ROHN has been a tremendous resource in upgrading
public safety communications throughout the Commonwealth," added Charles
Gerhards, Pennsylvania's Deputy Secretary for Information Technology. "This
new network will connect all state agencies with one another and will replace
outdated equipment with an innovative 800 MHz radio system. ROHN has been a
first-rate partner, and I am pleased with the progress we've made thus far."
ROHN Industries, Inc. is a leading manufacturer and installer of
telecommunications infrastructure equipment for the wireless and fiber optic
industry including cellular, PCS, fiber optic networks for the Internet, radio
and television broadcast markets. The Company's products and services include
towers, equipment enclosures/shelters, design and construction, cabinets,
poles and antennae mounts. ROHN has manufacturing locations in Peoria,
Illinois; Frankfort, Indiana; Bessemer, Alabama; Casa Grande, Arizona; and
Mexico City, Mexico.

Statements in this press release include "forward-looking statements"
within the meaning of the Securities Exchange Act of 1934, the Private
Securities Litigation Reform Act of 1995 and other related laws, and include,
but are not limited to, those statements relating to sales and earning
expectations, expected demand and other statements of outlook. The actual
results and effects could differ materially from those currently anticipated
in our forward-looking statements. Factors and risks that could cause such
differences include, but are not limited to: wireless and fiber optic
communications industry capital spending; the ability of our customers to
secure adequate financing; elections by customers to terminate or delay
previously placed orders; the effects of competition, particularly on pricing
and margins; our success in expanding our Casa Grande, Arizona enclosure
facility and starting-up our Peoria, Illinois pole facility; our
implementation of our growth objectives in foreign markets; our indebtedness,
which could restrict our operations, making us more vulnerable to adverse

economic conditions and making it more difficult for us to implement our business strategy; our Commonwealth of Pennsylvania construction project staying on its currently anticipated schedule; and regulatory changes affecting our industry. The cautionary statement contained in Exhibit 99.1 to
ROHN's Form 8-K, filed on March 8, 2001, is incorporated herein by reference.
In providing forward looking statements, ROHN is not undertaking any duty or
obligation to update these statements publicly as a result of new information,
future events or otherwise.

Here are some Dauphin Co business trunking systems.
Appreciate any updates you may find.

Steve

Business SMR System (Dauphin County Area)

Motorola Type I

851.2625
852.2125 Control Channel
852.4625

Block Size Map 8
Block 0 (S1)
Block 1 (S1)
Block 2 (S2)
Block 3 (S2)
Block 4 (S3)
Block 5 (S3)
Block 6 (S4)
Block 7 (S4)

ID's so far.

001-1 ?
008-1 ?
012-1 ?
201-0 Tow Trucks (Actually interesting at times)
400-0 ?
400-4 ?

Met-Ed EDACS System (Dauphin County Area)

Control channel does change regularly

Channel Order

1-856.3875
2-857.3875

3-858.3875
4-859.3875
5-860.3875

Haven't had time to log any ID's for
this system yet.

Business EDACS System (Dauphin County Area)

Channel Order

1-857.6125
2-858.6125
3-859.6125
4-860.6125
5-862.7875
6-861.6875
7-862.6875
8-863.6875
9-864.6875
10-865.6875

Seems to be a very busy system with a lot
of ID's. Havent had time to ID any of them.

319. PSP consolidating dispatch points

Yahoo group: CPMA

From: Greg Halpin
Topic: 319 Message: 319

Forwarded from the SCAN-PA list:

--------- Forwarded message ----------

According to a story in the Sunday (4/8) Harrisburg Patriot-News newspaper:

Title: State cops to consolidate 70 dispatch centers to 5
Sunday Patriot News - Sunday, April 8, 2001

My brief abstract:

Pennsylvania State Police will consolidate their 70 dispatch points(one at each barracks) into five statewide dispatch centers. The new centers will be located near Erie, Scranton, Harrisburg, Pittsburgh, and Philadelphia. PSP touted this move as helping to put another 165 or so troopers on the road (instead of on desk duty). The article also mentioned that upgraded computer equipment and automatic vehicle locating systems would be implemented with this change. According to the article, the first center will likely open in Philadelphia. END

I'm thinking this is part of the statewide radio project. I guess we'll see.

322. York County plans 700 MHz system

Yahoo group: CPMA
Date: 2001-04-17 17:21:38 UTC
From: Greg Halpin
Topic: 322 Message: 322

The following article appeared in the April 15, 2001 edition of the York Sunday News:

A new system for 911
County may replace low-band radio with high-tech high-band
By WENDI HIMMELRIGHT
Dispatch/Sunday News

After years of complaints from emergency workers, county officials have decided to replace the
area's 911 emergency low-band radio system with a high-band system.

County commissioner Shirley Glass and Pat McFadden, director of York County Emergency
Services, both said yesterday the county will have a new high-band radio system in place within
five years.

"We are looking into the future. I think I can safely say the whole board is committed to
improving that system, and when I say improving I mean replacing," Glass said of a high-
band radio system. 'We have to keep up with technology. And from everything I have heard,
that's the route to go."

Better quality: McFadden said a high-band system will offer clearer communication and a wider
coverage area with fewer "cut out" pocket areas. It will also allow all emergency personnel to
communicate with one another instead of using separate frequencies, as they do now.

A high-band system transmits radio signals directly from tower to tower - called "line-of-sight."
Low-band frequencies spread the signal out, thus weakening it as it travels. High-band
frequencies start at 450 megahertz, McFadden said. York County Control currently operates on
three frequency levels; the fire service on 33.7 megahertz, the police service on 155, and the
ambulance/medic service on 400.

If the new system follows the recommendation of a study conducted last year by
Harrisburg-based SSI Services, Inc., it would operate on at least the 700 megahertz frequency

level. McFadden said the new system will cost $40 million to $50 million.

Recommended improvement: The county has refused to release the entire SSI study without a
promise not to publish current cellular tower locations even though the locations are on the FCC
Web site.

But parts of the study made public paint a picture of an outdated emergency communication
system. Almost none of the towers are grounded, and tower sites are in need of shelters and
fencing, generators, air conditioning, heating, lighting and electrical outlets.

The study recommends numerous technological upgrades in addition to adopting high-band
technology, including the addition of seven more towers sites and the relocation of some of the
existing 16 towers.

The total estimated cost for all the improvements is $5 million.

McFadden said the county budgeted $2 million this year for the improvements, paid for from the
$1.25-a-month telephone fund.

According to the study, all of the recommended improvements would be compatible with a
high-band radio system.

Failure to communicate: Emergency workers have long complained about the current low-band
radio system. Medical, fire and police personnel are on different frequencies, making
communication among them impossible unless they have two radios.

It's difficult to get replacement parts for the aging system, as more and more manufacturers move
on to newer technology - and there is a fear that companies could quit making replacement parts
all together.

"I think it's long overdue," said Skip Ruppert, the president of the York County Firefighters
Association. "Everyone has been asking for it for a long time. The low-band system that we are
on right now is getting to the point it's unsupportable."

McFadden agreed and said maintaining and upgrading the current 911 system - as the SSI study
recommended - will happen concurrently with plans for the new system. "I am going to the

next level, but in the interim I have to maintain our current system and bring it up to speed," he
said.

No satellites: Still, at least one ambulance service provider doesn't think a high-band radio
system will lead to more reliable communication because of the area's hilly terrain.

Hal Garrett, a member of the board of directors of Tri-Community Ambulance in Seven Valleys,
said he thinks the move to a high-band radio system would be a mistake. Until satellite systems
become affordable, the county should stay with and make improvements to the current low-band
system, he said.

"The higher the frequency, the more it depends on the line of sight. If the transmitter can't see the
receiver, then communication is not reliable," Garrett said. Many of the problems experienced
by ambulance personnel - who have complained about radios and beepers that don't work - exist
because the ambulance companies are on a higher frequency than the fire departments, Garrett
said. He said York County is too hilly to depend on a line-of-sight system.

"That's why peoples' little digital cell phones drop out so much. It's because the antenna on the
cell phone can't see the antenna on the tower," Garrett said.

McFadden said the line-of-sight issue will be taken into consideration when a frequency is
selected and may require the installation of more towers.

He said a satellite system is not under consideration because the county would have to rent
satellite capability from the government or a private business.

"It becomes a question of who owns the satellite, who repairs it. If one tower goes down, I still
have all the other towers. If the satellite goes down, I lose all of my communication. That would
be a problem," he said.

Paying the bill: McFadden said the county would issue a bond to pay for the new system. Part of
the cost could be covered by a proposed monthly fee on cellular phone lines. "Land lines" are
currently assessed a $1.25 monthly surcharge to help cover County Control operations, but the

1993 state law enabling that tax exempts cell phones. A bill to allow the same charges on cellular
phones has been introduced in the state legislature by Rep. Keith McCall, D-Carbon County.

So far the county has solicited only one proposal to prepare a report outlining the requirements
for a new system - the first step in replacing the system.

McFadden said the report, proposed by Emergency Services Consulting Group of Wilsonville,
Ore., would cost $93,000, plus up to $15,460 in expenses. But he said he thinks the cost will be
lower if county employees perform some of the work and if results of a previous study of the 911
system are considered.

After a proposal is accepted, the subsequent report will include a step-by-step plan to switch the
county's 911 communications over to a high-band system, cost estimates of the project, an
analysis of what frequencies are available from the FCC and information on how to obtain
federal grants for the undertaking.

323. PA DEP Drill

Yahoo group: CPMA
Date: 2001-04-18 17:21:42 UTC
From: Greg Halpin
Topic: 323 Message: 323

Caught a DEP radiation drill today on 151.385MHz in the late morning.

"Harrisburg Radiation Control on Annandale" was contacting field teams
and sending them to various locations (ie: South 3) to take readings.
Early in the exercise team members were IDed by last name to "Harrisburg"
and "Harrisburg" sent several drill messages to the teams.

I haven't heard anything recently, so I presume that the drill is
completed.

I just plugged this frequency into the scanner a month or so ago and this
is the first action I've caught on the frequency.

Greg

It was announced as a drill during one of the first transmissions from "Harrisburg" and many of the messages were followed by the announcement "this is a drill."

In addition, they were instructed at times to "simulate" an action, such as taking iodine pills.

Funeral Arrangements Announced for New Jersey Firefighter

Interact: Post/View Condolences

Firehouse.Com News

Courtesy News Channel 12

Al Tirado

Passaic, NJ Firefighter Al Tirado, who served more than eight years in his fire department, lost his life while trying to save others.

The Passaic Fire Department has set up a fund for donations to the firefighter's family. People can send donations to the Evelyn Tirado FMBA Assistance Fund at:

Banco Popular
122 8th Street
Passaic, New Jersey 07055

Tirado's wake will take place from 2-4 p.m. and 7-9 p.m. on Saturday, May 12 and Sunday, May 13 at the Bizub-Quinlan Funeral Home at 1337 Van Houten Ave. in Clifton, NJ.

The funeral will be on Monday, May 14 at St. Nicholas Catholic Church at 153 Washington Place in Passiac. The fire department requests that NO fire apparatus be involved Monday.

Rooms are available for out of town firefighters at the Ramada Inn on Route 3 West in Clifton, NJ and at the Howard Johnsons on Route 3 East in Clifton, NJ.

Another digital system--the same type which is being installed for the Pa
State Police..

Orbacom will install its OrbaNET T5 Communications System in the
newly-renovated Cumberland County (Penn.) 911 Communications Center,
as part of the facility's 800 MHz MA/COM OpenSky radio system. The
OrbaNET systems consists of the paging, vehicle ID, external time
sync Interface, statistics management, universal CAD control
interface, eight video-based console positions and 120 radio
channels, including trunked and conventional. The county held a
ribbon-cutting on May 5th for the facility and radio upgrades, which
has a $10.5 million budget.

I am doing spring cleaning in the shack and have decided to liquidate some items:

1) The first is a newly released book by the ARRL: "Antenna Zoning for The Radio Amateur; everything you and your attorney need to know to obtain a permit for your antenna-support system"; by Fred Hopengarten, K1VR. ISBN-0-87259-821-7

This book is brand new still in the shrink wrap and comes with a CD-ROM, the ARRL gets $49.95. I am selling it for $30 + 5 shipping.

2) Scanner Master Massachusetts Frequency Guide ISBN 068534567X, USED but like new condition. $10 + 5 shipping.

3) World Radio & TV Handbook 1998: Like New Condition $8 + 4 Shipping, lists all of the names and contact numbers for radio and TV outlets world wide.

4) 1997 Amatuer Radio Almanac by CQ publications: New condition. ISBN: 9780943016160 $4 + 3 shipping.

Topic: 343 Message: 344

I will have to watch for your call on the network. I been looking at getting a tnc for the house to hook the old 2-meter mobile rig to. Looking at the Kantronics KPC III+ I had sold my old TNC before I got into APRS :(I want to try WINAPRS Plus with Street Atlas.

Steve, N3FWE

> << At this Sunday's meeting I will give a demo of APRS using
> the Kenwood TM-D700 and Garmin III Plus. If your curious
> about APRS check out these sites. >>
>
> I would love to see that! But, being this Sunday is Dad's
> day...and I am in
> NY...well, I can't make it. I have been trying to get WinAPRS
> to work but the
> Baypac modem is a bit hard to configure.

345. Reminder - CPMA Monthly Meeting

Yahoo group: CPMA
Date: 2001-06-16 17:02:01 UTC
From: CPMA@yahoogroups.com
Topic: 97 Message: 345

We would like to remind you of this upcoming event.

CPMA Monthly Meeting

Date: Sunday, June 17, 2001
Time: 1:00PM - 3:00PM EDT (GMT-04:00)

Monthly meeting of the CPMA will be held at the White Rose
Senior Center, 1059 Kelly Drive, in York.

346. Help needed identifing the following stations (part-1)

Yahoo group: CPMA
Date: 2001-06-16 22:22:35 UTC
From: John T. Bohn
Topic: 346 Message: 346

THIS IS A LIST THAT I PUT TOGETHER OVER APROX. A 10 YEAR PERIOD. THE FOLLOWING STATIONS MOST OF WHICH I COPIED MYSELF, SOME OF THE INFO WAS PASSED ALONG TO ME BY FRIENDS AND SOME OF THE INFO I GOT OFF OF THE INTERNET. MOST OF MY MONITORING ACTIVITES ARE FROM LOCAL HILLTOPS IN AND AROUND THE POTTSVILLE, PA--SCHUYLKILL COUNTY AREA, MANY OF THE STATIONS ARE LOCATED IN AND AROUND THE NORTH AND SOUTH EASTERN PENNSYLVANIA AREA.. ANY HELP IDENTIFING THEESE STATIONS WOULD BE GREATLY APPRECIATED!!: (PART-1 OF 5)

This is York City Fire Rescue, main frequency, transmitting from a tower site at Pleasureville, Sopringettsbury Township, York County. This frequency just went repeated this year, so you should now be receiving both base and mobile comms.

There are a number of other FD users that you may be receiving with different PLs, including DC Fire, FDNY (don't remember which borough) and other agencies.

Dick;
This will enhance the use of the acars decoder. Once you have a
flight identified go to:
http://www.trip.com/ft/home/0,2096,1-1,00.shtml

You can see where that flight is it's altitude, speed etc. Thought
you might enjoy that

Dave

357. Lancaster Co. 800 mhz Radio

Yahoo group: CPMA
Date: 2001-06-19 16:51:37 UTC
From: Peter Kirk
Topic: 357 Message: 357

This is the experience happening as one county plans on "piggybacking" onto Pa's new digital 800 mhz system. The system for the state costs 240 million dollars, does not follow Project 25 "modulation" and is expected to be online
this time next year----------

Volunteer fire company chiefs across the county say plans for a new countywide emergency radio network will leave them scrambling for money.At a meeting of the Lancaster County Fire Chiefs Association in Neffsville Wednesday night, fire officials aired their views about the overhaul of Countywide Communications.

http://www.lancnews.com/intell_news/radiosj1.htm

Volunteer fire chiefs alarmed by cost of new radios

Say county is sticking them with grievous expense
Thursday, June 14

Radios: Costs alarm fire chiefs

Volunteer fire company chiefs across the county say plans for a new countywide emergency radio network will leave them scrambling for money.

At a meeting of the Lancaster County Fire Chiefs Association in Neffsville Wednesday night, fire officials aired their views about the overhaul of Countywide Communications.

In December, county commissioners awarded Tyco Electronics a $20 million contract to build the infrastructure for a new radio network that will enable all county emergency workers to communicate with each other and connect with the state's emergency network.

Volunteer fire companies are angry at the county for leaving them to buy their own radios.

Robert Devonshire, president of the chiefs association, said 32 of the county's 82 volunteer fire departments responded to a survey about the new system.

Devonshire said it would cost $2.1 million to buy new radios for those 32 companies alone. Of the 32 companies, 19 did not expect to have funding for the new system in place in two to five years, while 13 said they would. Twenty-four companies expected funding problems. Only two companies reported local or municipal financial support to buy radios.

Hempfield Fire Company Chief Mark Hansen said that at the current price of portable radios _ $2,800 apiece _ it would cost his outfit about $200,000.

"Who has $200,000 to spend on a new radio system?'" Hansen said. "(The county) told us to start putting money away 2 years ago, and the only price that was ever mentioned for a portable was $1,000."

But Mike Weaver, director of Countywide Communications, said the volunteer fire chiefs signed on to the idea of an integrated state-county-municipal radio system when a county commissioner-appointed task force issued a report on the system in 1989.

Weaver said that if the county is going to spend millions for radio-system infrastructure, it's not out of line for commissioners to expect municipalities to "pony up'" funds for volunteer squads.

Weaver added that some of the fire companies complaining the loudest about the radios are those that are spending hundreds of thousands of dollars on other top-of-the-line equipment.

For example, Gap Fire Company has asked Salisbury Township to consider funding the purchase of a $500,000 ladder truck. Township manager Lester Houck told the fire company it needs to prioritize its purchases, especially given the cost of buying new radios.

The state, which also is contracting with Tyco for its part of the new radio system, is concerned about the cost of new radios, which the firm promised it could provide at about $1,000 a piece.

Weaver said the state is withholding 5 percent of its $348 million contract with Tyco until it delivers affordable radios, and the company has said it will deliver.

By the time the new network is ready and volunteer companies need to buy radios, Weaver said, more affordable radios will be available.

"So everybody can just chill out a little bit,'" Weaver said.

358. NEW GROUP BEING STARTED "SCHUYLKILL COUNTY RADIO MONITORS"

Yahoo group: CPMA
Date: 2001-06-20 04:45:34 UTC
From: John T. Bohn
Topic: 358 Message: 358

Hello Everyone,

Currently a friend and myself are starting a scanner monitoring group called "Schuylkill County Radio Monitors" this group covers Federal Government as well as Non-Government frequencies and communications, voice as well as digital modes, our goal is to PRIMARLY cover Schuylkill and the surrounding counties but we are also planning to include coverage for the entire state of Pennsylvania. Everyone is welcome and encouraged to check out the group and HOPEFULLY join it, as well as upload and download files. Right now its in the very early stages of construction
but depending on the ammount of input it receives from people from around the state, it will HOPEFULLY become a very active site packed with files and information for the radio monitoring community to enjoy. Please stop by and check it out!

About the AOL & YahooGroups Mail Problem.

I got this msg from YahooGroups Status List that I am a Member on. This list is for any type of Problems with YahooGroups / eGroups / OneList ..... All the Tech Support and Operators are on this List.

As many of you know, recently AOL email users have been having trouble
receiving email from Yahoo! Groups. The problem should now be fixed.

What happened:
We recently changed the IP addresses on a number or our servers. AOL didn't recognize the new numbers and because of the volume of incoming email, they thought we might be spamming them, so they blocked the email coming from us. They updated their list of accepted IPs last night at 6:30 PM PST, so all should be fine.

More information here:

http://news.cnet.com/news/0-1005-200-6651241.html?tag=mn_hd

James
(Y! Groups Producer)

Hope this helps.

366. UNIDENTIFIED HIGH ALTITUDE AIRCRAFT MONITORED

Yahoo group: CPMA
Date: 2001-08-09 19:47:52 UTC
From: John T. Bohn
Topic: 366 Message: 366

Over the last few weeks I've been hearing an aircraft identifing itself as "AC-1" talking with what I assume is a ground station which I have not been able to hear,identified as "CCS-1" This aircraft was flying near Hagerstown,MD and in Pennsylvania. The frequencies to listen on are 151.505 Mhz 151.4hz pl tone and on 464.500 Mhz with a 151.4hz pl tone and also on 25.250 Mhz USB. I'm not shure if this is some sort of military aircraft or what? Usually the comms are heard in the afternoon hours around 2pm and 4pm. I live in Schuylkill county Pennsylvania and can hear the signal rather well, so' I guess this aircraft is flying at very high altitude,when the pilot is talking I can hear him breathing thru an oxygen mask. ANY help identifing theese comms would be GREATLY appreceated!!
73's John

367. Inidentified Aircraft

Yahoo group: CPMA
Date: 2001-08-12 16:00:59 UTC
From: David Bennett
Topic: 367 Message: 367

My guess is that it is a civilian aircraft doing construction or industrial work. 151.505 and 464.5 are intinerant. They would be used by someone not in a permanent location such as a construction crew. 25.25 Mhz. is an odd one. I don't know what that is. If it were just 464.5 I would say it might be a hot air balloon.

Date: 2001-08-12 18:43:45 UTC
From: David Bennett
Topic: 370 Message: 370

I see 25.24 and 25.26 Mhz. is listed under Petroleum Radio. So this seems like this aircraft is an industrial operation.

Just a little correction to the calendar reminder......

The meeting this month is the annual picnic meeting, which will be held at 12:00 noon at Steve Busch's house. Do we all know what we're bringing???

I'll be there early to start deep-frying the turkey. See you all there around noon!

Greg

...A DENSE FOG ADVISORY IS IN EFFECT THROUGH 10 AM...

AFTER THE RAINFALL AND HIGH HUMIDITIES OF SUNDAY...CLEARING SKIES
AND VERY LIGHT WINDS HAVE ALLOWED FOG TO FORM...AND BECOME DENSE
ACROSS MUCH OF CENTRAL PENNSYLVANIA THROUGH THE NIGHT.

THE FOG WILL STAY DENSE IN MANY AREAS THROUGH THE MORNING COMMUTE
HOURS...BEFORE BEGINNING TO LIFT BETWEEN 9 AND 10 AM. AREAS THAT
RECEIVED SIGNIFICANT RAINFALL YESTERDAY...AS WELL AS VALLEY
LOCATIONS...WILL STAY FOGGY THE LONGEST.

A DENSE FOG ADVISORY IS ISSUED WHEN DENSE FOG WILL SUBSTANTIALLY
REDUCE VISIBILITIES...RESULTING IN HAZARDOUS DRIVING CONDITIONS IN
SOME AREAS. MOTORISTS ARE ADVISED TO USE CAUTION AND SLOW DOWN...AS
OBJECTS ON AND NEAR ROADWAYS WILL BE SEEN ONLY AT CLOSE RANGE. USE
YOUR LOW-BEAM HEADLIGHTS TO ALLOW OTHERS TO SEE YOUR VEHICLE WITHOUT
BLINDING YOURSELF OR OTHER MOTORISTS.

387. Fw: Fwd: IIMS PROGRAM UPDATE: CONSOLIDATED DISPATCH CENTERS

Yahoo group: CPMA
Date: 2001-08-21 02:31:08 UTC
From: Greg Halpin
Topic: 387 Message: 387

Got this off of another list I'm on ... thought some of you might find it interesting:

--------- Forwarded message ----------

IIMS PROGRAM UPDATE: CONSOLIDATED DISPATCH CENTERS

The Pennsylvania State Police (PSP) and Lockheed Martin Management & Data Systems, a leading global systems integrator, are implementing the Criminal Investigative Traffic Safety Incident Information Management System or IIMS Program to apply today's advanced technologies to all PSP activities. This ambitious multi-phased project will improve the security and services offered to the citizens of the Keystone State.

One major component of the IIMS Program is the Consolidated Dispatch Centers (CDC) Project. This project will consolidate taking calls and dispatching functions from 81 current locations down to five geographically dispersed centers throughout the state. Each center will implement a Computer Aided Dispatch System (CAD). CAD System components will include Geographic Information System (GIS) mapping capability to effectively direct troopers to a crime scene, as well as Automatic Vehicle Locators (AVL) to identify the position of the closest patrol car to an incident, along with the quickest and most direct route to the destination. County 911 Centers will now be linked to the Consolidated Dispatch Centers rather than individual stations for emergency calls.

The areas where the five Dispatch Centers will be located and order of rollout is as follows:

1st Harrisburg Area (Super Core)

2nd Philadelphia Area (Core)

3rd Scranton Area

4th Pittsburgh Area

5th Erie Area

Two of these centers will be known as core centers, and the other three centers will be known as remote centers. The first core center, known as the Super Core, will be the primary network operations center. It will be located in the Harrisburg area. The other core center will be located in the Philadelphia area. It will be a backup operations center to the Super Core. Both core centers will contain redundant system capabilities for disaster recovery purposes and will also have the ability to assume

operations for any remote center.

PSP will implement an Initial Operating Capability (IOC) at the Harrisburg Area Dispatch Center in the autumn of 2002 which will have the functionality listed below:

? Computer Aided Dispatch (CAD)
? Limited Geographic Information Systems (GIS)
? Automatic Vehicle Locations (AVL)
? Initial Mobile Office
? Voice Dispatch

The Initial Operating Capability at the Harrisburg Area Dispatch Center will assume dispatch responsibility for Troop H Harrisburg Station, Troop H Lykens Station, Troop J Lancaster Station, and Troop L Jonestown Station.

After a successful time period of approximately six months with IOC, the rollout of the other four centers will commence and begin operating with Final Operating Capabilities (FOC). Final Operating Capabilities will include the below:

? Computer Aided Dispatch (CAD)
? Geographic Information Systems (GIS)
? Automatic Vehicle Locations (AVL)
? Mobile Office Environment
? Data and Voice Dispatch

Exact locations for each consolidated dispatch center are still being evaluated and studied and will be forthcoming. Full implementation of all five dispatch centers is expected by the year 2004. For more information on the IIMS Program and the Consolidated Dispatch Center Project visit www.pspiims.com or www.psp.state.pa.us.

Ananova, the Virtual News Babe, could not be reached for
comment (CGC #386, <http://www.ananova.com/>).

389. Fw: Hanover Area Hamming Association Swap Meet

Yahoo group: CPMA
Date: 2001-08-25 05:40:46 UTC
From: Greg Halpin
Topic: 389 Message: 389

Got this off of a Unsenet newsgroup:

--------- Forwarded message ----------

The Hanover Area Hamming Association is holding a ham radio and computer swapmeet Sunday August 26 at the Pleasant Hill Volunteer Fire Company 6 miles South of Hanover PA on PA Rt 94. Admission is only $3.00 a carload and vendors who have stuff to sell are let in Free!! To be honest, this is our first hamfest in a while, and we would like to build for the future, so making money on it is secondary this year. If you have some priceless electronics treasures, or even just that old radio or computer you want to peddle, come on up and see what you can trade it for.

The Pleasant Hill Volunteer Fire Company will provide food and drink for the event, and their food is pretty good and prices are very reasonable by hamfest standards. The gates will open at 8 AM and it will run until whenever, so plan on coming early and snatch up the bargains. Hope to see you there and 73.

Bruce N3LSY

Hello Ron, and welcome to the list.

You'll find that traffic here is not overly active, but we get some
messages out now and then.

The core group is from the York/Harrisburg/Lancaster area, but the
subscribers to the list are from all over.

Look forward to your input on the list!

CPMA Monthly Meeting

Date: Sunday, September 16, 2001
Time: 1:00PM - 3:00PM EDT (GMT-04:00)

Monthly meeting of the CPMA will be held at the White Rose
Senior Center, 1059 Kelly Drive, in York.

393. York Fair

Yahoo group: CPMA
Date: 2001-09-10 02:00:42 UTC
From: Greg Halpin
Topic: 393 Message: 393

Well folks, for those of you in the area, the York Interstate Fair is once again in operation, so those of you that are close enough, fire up your scanners!

Fire service at the fairgrounds is provided by the York Fair FD, using an engine leased to the Agricultural Society by the City of York and staffed by personnel hired by the Ag Society. They will primarily operate on York City Fire frequency of 154.190 MHz as York Fair Unit. If an incident occurs on the grounds, you can expect them to operate with West York FD (county Station 1), West Manchester Twp. FD (county Stations 2 and 5 and Chief 50) and York City Fire. 33.90, 33.88 and 33.48 are the county freqs to monitor there.

Medical assistance is provided by the York Chapter of the American Red Cross, with assistance from West York EMS (Ambulance 1) and York Hospital ALS (Medic 97). Med 10 is their primary communications channel with 911.

Police service is provided by the York Fair Police Department, which consists of sworn personnel from various police departments, corrections officers, prison guards, etc. They can normally be found operating on 154.570 MHz. York City, West York Borough and West Manchester Township, the three municipalities that the grounds are located in, all have police departments operating on 156.570 MHz and 156.330 MHz.

In addition, Schaad Detective Agency provides overnight security for the grounds. York City Fire Police (154.335 MHz) work around the grounds directing traffic.

Maintenance crews can be found on 154.540 MHz, and parking personnel can be found on 154.600 MHz. In addition, many various itinerant frequencies, FRS frequencies, etc. are in use by various vendors, visitors, etc.

Happy listening!

Greg Halpin

394. Fw: [Scan-DC] Observations

--------- Forwarded message ----------

There are Langley F-15s, Langley F-16s (ND ANG deployed) and DC F-16s all

fully armed flying CAP above DC. All supported by KC-10s from McGuire;
KC-135s from Pittsburgh and AWACS (Bandsaw) off the coast.

NJ ANG F-16s have also been scrambled to the area. Supported by Maine ANG

KC-135s operating out of McGuire.

VA ANG F-16s are also operating in the DC area. Huntress is overall
controlling authority.

Andrews is warning all aircraft that they are closed and all intruders
will
be shot down.

1st Helo Sqdn UH-1s are extracting VIPs from the Pentagon and the air
around
here is loaded with medevac helos and MD NG medical evac helos.

Something I thought I'd never see in this country.

395. Disaster Fighter Frequencies

From: David Bennett
Topic: 395 Message: 395

I received a list of Disaster Frequencies on the Grove
EMail list.
Here is a modified list of active frequencies.

124.2 DC F-16s
125.65 DC F-16s
228.9 Huntress
303.0 McGuire Tankers over DC
364.2 Awacs
293.7 Pittsburgh KC-135 Tankers
138.425 (AM) NJ ANG F-16s

I added:

127.275 DC F/A 18s

I can hear both sides of the conversation on
303.0, 138.425 and 127.275

396. 9-11 Patch for NYFD Fallen Heroes By David Kearney

Yahoo group: CPMA
Date: 2001-09-13 20:57:28 UTC
From: Peter Kirk
Topic: 396 Message: 396

****
IPN ALL MEMBER and Non Members NOTICE
THURSDAY, SEPTEMBER 13, 2001
****

Dear IPN Members:

Firefighter and graphic designer David Kearney has designed a patch in memory of the firefighters lost in the WTC tragedy. These patches are being sold for $6.00 each, $5.00 of which will go directly to The New York Fire 9-11 Relief Fund set up by Firehouse.com and the IAFF (International Association of Firefighters). The remaining $1.00 of each patch will go to pay for the manufacture of the patch itself ($0.68 each) and postage ($0.34 each). IPN has agreed to cover any additional expenses, including all credit card processing charges. Absolutely no profit will be made on the sale of these patches!

We feel that this patch is a great way to contribute to the families of those lost heroes, and will serve as a lifetime memorial to commemorate the bravery and heroism displayed by the FDNY throughout this terrible tragedy.

The patches can be purchased at http://www.incidentpage.net (just click on the picture of the patch to go to the secure credit card processing server) for $6.00 each, and we would encourage those who can afford to buy more than one to do so. These patches are available to everyone, members and non-members alike, so please feel free to forward this message to anyone and everyone who may be able to help out.

If you need any further information, please feel free to contact us at support@....

Thank you!

404. Unindentified Frequency Operations...462.6125 or 462.600

Yahoo group: CPMA
Date: 2001-10-02 03:18:48 UTC
From: railchase@hotmail.com
Topic: 404 Message: 404

I stumbled across a repeater last night broadcasting Cumberland and Dauphin County Fireground Channels. Does anyone know who is utilizing this? I found it on a Triple Conversion and rechecked it with a Dual Conversion. It seems to be clearer on 462.6125 but that comes back as an FRS frequency if I am not mistaken. Is it actually on 462.600? If anyone can confirm, I would appreciate it.

Cuervo~

From: Cuervo Jones
Topic: 404 Message: 406

I checked it for PL and it seemed to indicate 203.5, so this would be consistent with a Dauphin County based system. From the 12:00 check last night, it seemed to be scanning...46.060, 33.800, 33.860...most likely 33.84 but I couldn't confirm it, and possibly 33.880. I just wish I knew this repeater was there before! Whatever radio is on the other side gets great reception! I have added it into my daylight program for the scanner broadcast for the time being. From: Ed Muro
Topic: 417 Message: 417

It is really an interesting event to atten and I have always enjoyed myself.
You probably can find me at the All Ohio Scanner Club's booth.

It is off the North-east extenssion of the PA Tpke, maybe 10 - 15 minutes
north of the main-line tpke. From Long Island it takes me about 2.5 hrs
depending upon traffic getting out of Brooklyn & Staten Island.

Lasy year I spent a few days in Lancaster and then drove back.. from
Lancaster it was about an hour's ride.

If anybody is looking to stop off for a day in Lancaster, there is a place
called the Soudersburg Motor Inn, it isn't fancy but it was clean...they run
Winter Internet specials for about 35 bucks a night.

Peter,

I have a hand drawn map at home that shows what the distircts used as base/mobile channels a few years ago. There are several car-car freqs. When I get home, I will pull out my list and post it. I don't know if I have all the PL's or not. Down my way, at least, the base mobile combo has been all but dead for months. The car-car freqs are used occasionally by road crew trucks. I suspect that when the snow falls, things will come to life again. I'm figuring cell phones and or/Nextel are the primary communication choice in the warm weather, when the need for a dispatcher/coordinator is less important.

NEWINGTON, CT, Dec 6, 2001--Volunteers from the Tulsa Amateur Radio Club helped to restore police and fire dispatching service in Collinsville, Oklahoma, after flames destroyed the city's radio gear and disrupted 911 service December 1. The early-morning fire badly damaged the 88-year-old Collinsville City Hall, which housed the Collinsville police and fire departments and other city offices.

"The city's communication system was functioning, but 911 calls were re-routed to a nearby city, because all the dispatch equipment was lost in the fire," said Oklahoma ARRL Public Information Coordinator Mark Conklin, N7XYO. "Consequently the city had to find a temporary home for police and fire dispatch." The fire also toppled the dispatching center's radio tower.

Collinsville, a community of some 4000 people, is located about 12 miles north of Tulsa on US Highway 75.

Conklin says Collinsville made arrangements to set up its dispatching center from the Collinsville Rural fire station, located just south of the city line and nine blocks from City Hall and the main fire station that burned.

Area amateurs alerted to the devastating fire quickly responded to help, and ARRL Oklahoma Section Manager Charlie Calhoun, K5TTT, was notified. TARC Public Service Liaison Dan Lamoreaux, WG5Z, rounded up Gregg Wonderly, W5GGW, Dave Smith, KD5OIJ, and Tom Roininen, KB5HMZ, as additional volunteers.

"Not knowing what communications needs the city may have, Tom brought along the club's portable repeater system, which was built with commercial radio equipment converted for amateur use," Conklin explained.

Conklin says the amateurs reprogrammed the "commercial" radio equipment--which had served as the club's portable repeater--for the police and fire departments to use as an emergency dispatch radio. Adding to the already-difficult circumstances was the fact that critical information about the city's operating frequencies and CTCSS tones had been lost in the fire.

"After some research, which included Tim's taking apart some pagers to look for information on tones, frequencies and codes, a dispatch center was set up inside the Collinsville Rural Fire Department," Conklin said.

In addition, new telephone lines were run, and individual telephones were installed for the 911 system to receive calls.

"By 9 o'clock that evening all systems were totally operational and police and fire dispatching was being handled though the club's loaned radio equipment," Conklin said.

Established in 1924, the Tulsa Amateur Radio Club is the state's oldest ham radio club. It operates the W5IAS linked repeater system and its members are active in public service.

911 backup passes test
The Sunday morning test at the Pleasureville site went off without a 'glitch.'

By JIM LYNCH
Daily Record Staff
It's here! And just in time for the holidays!
It's a working 911 backup center for York County residents.

For the first time, perhaps since it was built a few years ago, county emergency officials tested their backup dispatching center Sunday morning.

The results, according to Patrick McFadden, York County's director of emergency services, were encouraging.

"It worked even better than I had anticipated," he said following a three-and-a-half hour test Sunday morning. "We did not, to my knowledge, have one glitch."

From 8 a.m. to 11:30 a.m., all 911 calls were routed to the backup site in Pleasureville instead of the main dispatching center at Pleasant Acres in Springettsbury Township. Dispatchers at the backup site, who volunteered their time to participate in the drill, handled 37 calls during that stretch, including a foot pursuit involving police officers in York and a suspected structure fire in the city.

All in all, McFadden said, a decent test of the backup site's capabilities.

Problems concerning the site arose in September - slightly less than a year after McFadden moved from the county's human resources department to emergency services. McFadden had wanted to test the backup site, but was told by officials at Verizon, which handles the county's phone lines, that it might not work.

In the event of an emergency where dispatchers had to be evacuated from the main center at Pleasant Acres, the county had thought it could simply switch 911 calls to its backup site. Commissioners said they were unaware the site did not work and blamed former emergency officials for failing to keep them informed.

They also ordered McFadden to get the backup site running. In mid-November, Verizon informed the county the backup site, housed in a trailer near Camp Penwood, was ready to go.

Sunday was the first test of the site.

Several dispatchers remained on duty at Pleasant Acres in case the switch-over failed to work as planned.

"They ended up just having to sit there," McFadden said. "They didn't have to do anything."

Inside the trailer are several workstations and more than 10 telephones - all kept in a climate-controlled environment. There are still several items on McFadden's wish list for the site, including a television and radio, and soundproofing for the trailer's walls.

Members of the emergency community have decried the state of York County's emergency communication system for years. A combination of decades-old equipment - some items dating back to World War II - and the area's topography have resulted in a system that many firefighters, emergency medical technicians and police officers don't feel confident in.

In the last year, York County has taken steps to bring that system up to minimum operating levels. In the proposed budget for 2002, commissioners have indicated they will spend $100,000 for a professional study of the communication system that will generate a blueprint for a complete overhaul.

President Commissioner Chris Reilly said he expects the same type of turnaround in emergency communications that took place last year in Children and Youth Services. After a series of failed state inspections, commissioners funneled more money into the operation, which now appears to be on solid ground.

Now, the board is promising a communication system that will make York County the standard in Pennsylvania.

"When we say we're going to do something," Reilly said earlier this month, "we do it."

But this project will likely cost much more than Children and Youth Services did. McFadden said he believes the final price tag will be between $30 million and $50 million.

The changes would be on a large scale.

Pleasant Acres, now York County's main dispatching center, might one day be the backup site.

"A new main center may have to be built . . .," McFadden said, "a place where we can bring 911, the Emergency Management Agency and the other disciplines together."

439. Uniden Debuts APCO 20 Digital Scanner

Yahoo group: CPMA
Date: 2002-01-06 17:59:07 UTC
From: Greg Halpin
Topic: 439 Message: 439

Press Release

Date: 1/8/02

Title: UNIDEN DEBUTS NEW APCO 25 DIGITAL SCANNER MODELS

SubTitle: Electronics Giant to Sell Software to Customize Monitoring Experience

Synopsis: Uniden lifts the curtain on its long-anticipated APCO 25 digital scanner models.

Body: LAS VEGAS (January 8) - Uniden America Corporation today unveiled its new digital scanner line for 2002, including the consumer electronics leader's much-anticipated base and handheld APCO 25 digital scanning models. Speaking at CES, product manager Scott Carpenter showcased the new scanner products, underscoring the company's commitment to keeping its customers at the forefront of scanning technology. "Our retailers have been pushing us for a Uniden APCO 25 product for months, and our new BC250D handheld and our BC785D base/mobile scanning unit represent the fulfillment of our promise," Carpenter said. "With the ability to monitor conventional, trunked and APCO 25 conventional and trunked systems these models are state-of-the-art radio scanners. According to Uniden representatives, the Bearcat BC250D and the Bearcat BC785D models, which are slated to hit shelves in late 2002, offer 1,100 channels, 10 banks and a frequency range of 25MHz - 1300MHz. The BC250D comprises all of the features of Uniden's market-leading BC780 XLT in a handheld model, plus adds APCO 25 capability and an additional 600 channels. Users of both models must purchase an APCO 25 card, the BCi25D, separately. "We're pleased to be bringing these great Bearcat APCO 25 units to market," Carpenter said. "We expect more big cities to migrate to the APCO 25 digital technology, like Los Angeles did this past year, to ensure agency interoperability among police, fire, EMTs and the like - and we know news organizations, businesses and consumers will want to monitor their signals." Uniden officials stressed that APCO 25 digital scanning technology simply gives users the ability to monitor the day-to-day activities and signals of standard city and government service departments - but in no way allows users to monitor encrypted signals from national and local security organizations. In a separate announcement Uniden also announced its plans to market its own easy-to-use scanner programming software, which it is demonstrating in its booth at this winter's annual Consumer Electronics Show in Las Vegas. The software will allow the users of all Uniden scanners with data ports to easily program frequencies into the channels and banks of their scanner.

About Uniden

Uniden America Corporation, the North American subsidiary of Japan based Uniden Corporation, manufactures and markets wireless consumer electronic products including cordless telephones, business telecommunications
systems, multimedia communications devices, scanner radios, CB radios, FRS, Marine radios and other wireless personal communications products. Based in Fort Worth, Texas, Uniden sells it products through dealers and distributors throughout North, Central and South America. # # #

440. York PA 1/12/02

Yahoo group: CPMA
Date: 2002-01-12 05:34:07 UTC
From: Greg Halpin
Topic: 440 Message: 440

On Saturday, January 12, 2002, several groups of white supremacist organizations are scheduled to hold a "meeting" in a room at the Martin Memorial Library in downtown York.

As a result of the above groups coming to York, several anti-white supremacist groups are planning on attending to protest against these groups.

Some of these groups (both sides) have been known to cause and/or incite violence.

What is reported to be the largest police force ever deployed in York City will be on duty tomorrow to help keep these groups under control. They will include local, state and federal law enforcement personnel.

Media coverage will be heavy during this incident.

This most likely will provide a LOT of radio traffic for local enthusiasts to monitor.

Please DO NOT plan on travelling to the vicinity of the library, as this area will be under extreme scrutiny. There is already a police presence in the area.

Keep your ears on --- this could either be a big flop or a large event.

Greg

Hi,

I am new at receiving trunked system and need a little help.
I am using a BC235XLT to receive the Hershey, PA trunked system
and have received and stored about three dozen IDs.

However, when I go to scan, I don't receive any stations.

Any idea what I am doing wrong?

Thanks,

Tom

443. York PA 1/12/2002 - Final comments

Yahoo group: CPMA
Date: 2002-01-13 18:13:00 UTC
From: Greg Halpin
Topic: 443 Message: 443

Yesterday had to be the most intense two hours of listening I've ever had since getting into the hobby.

Over 200 (my sources say over 300) law enforcement officers were on duty in the area around the library, where the white supremacist meeting, and related pro- and anti- protesters eventually clashed, eventually causing at least six persons to be treated at area hospitals, 25 persons (17 from out of state) to be arrested, and a number of vehicles (mostly those of white supremacists) vandalized.

What was truly amazing was that almost all communications were on 155.475, with the exception of an occasional switch of specific units to a different channel to relay information without tying up the op channel. From listening, there were also cell phones and Nextel phones in use, as "Smith to Jones on Nextel" transmissions occurred occasionally.

The PSP helicopter proved invaluable to the troops on the ground, as they were able to provide excellent reconnisance on group movements, vehicle locations, and status of officers engaged with protesters. PSP mounted units were apparently very effective in moving persons when other methods failed.

In hindsight, I should have considered taping the event, but unfortunately didn't give that any thought prior to it happening.

Spoke to several co-workers last evening who never heard a peep from the scene, primarily becuase they don't listen to tactical and national frequencies on their scanners. This definitely proved why they should be in your scanner, as I knew early that day what to listen to. People listening to City PD F1 heard almost nothing about the events downtown.

Personally, I hope I never have the opportunity to listen to a similar event.

Greg

I suspect that they used national because the officers from all the different agencies could operate on it using their own radios. I'm not sure exactly where PSP had their command post set up, but I saw it pulling into town Friday afternoon.

York City Police alone had 73 officers on duty. They all have their own portables and I believe they are programmed with 155.475.

Greg

P.S. Where you able to receive them at home, or did you move closer to town to listen?

You have all seen me post the what, where, and when info before. But, if you need more info on how to register for the Fest, etc visit: www.swlfest.com

The fest is held in Kulpsville, PA about 30 minute north of Philly and about 2 hours from NYC.

Here is the tentative forum schedule:

2002 SWL WINTERFEST
Tentative Forums/Events/Speakers Schedule (as of 2/2/02)
(Please note: Register Early! Seats for Luncheon and Banquet are Limited!)

Thu. 7 April
1900 - Registration Table and Hospitality Room* Opens
2100 - Registration Table Closes (to reopen Fri. 0815)

Fri. 8 April
0815 - Registration Table Opens
0900 - Forum: Not For Beginners Only -- Donna Ring
1030 - Inside Your Radio: Basic DIY -- Skip Arey-N2EI
1100 - Morning Registration Closes
1315 - Registration Table Reopens
1330 - SWLing and DXing--European Perspectives -- Risto Vahakainu
1445 - Afternoon Registration Closes
1500 - Who Needs Shortwave? (When You Have DBS) -- Joe Buch
1630 - to be announced
1900 - Swap Meet Opens

Sat. 9 April
0815 - Registration Table Opens
0900 - Weird Propagation Tricks: Aurora DXing -- Phil Gebhardt
1000 - Silent Auction Opens
1030 - Scanning in Emergency Situations -- the Scanning Fraternity (against their vigorous protests, they've been upgraded)
1100 - Registration Closes
1200 - Pizza Luncheon. Remarks by Bob Zanotti, formerly of SRI
1330 - The Story of Jazz and Shortwave -- Marie Lamb
1500 - Broadcasters' Forum: The Year in Shortwave -- Group Discussion
(1615 - End of Forums)
1630 - End of Silent Auction/Time Reserved for Club and Organization Meetings
1800 - Cocktail Hour
1900 - Banquet. Speaker: Kim Elliott, VOA.
2100 - Le Grande Raffle! (time approximate)

(*Hospitality Room closed during all forum sessions.)

From: Greg Halpin
Topic: 448 Message: 449

Thanks for the info and link, Ed.

Just a correction (which the link helped me solve), these events are in
MARCH, not April.

Greg

I'm putting together a file for Kulpsville for the AFS780
software for those of us with 780s. I need to know:

1. Has the fire departments joined the Montogomery County TRS yet?

2. Does the sheriff use any vhf anymore?

3. Is Philadelphia on their digital 800 MHz TRS yet,
and are the vhf fire channels still active?

4. Does anyone remember the hotel frequency?
I think its 151.745.

As soon as I get it done I'll send a copy to anyone
who wants it.

452. 453.125 Med-Evac Use

Yahoo group: CPMA
Date: 2002-02-05 18:02:59 UTC
From: WA3YSU
Topic: 452 Message: 452

I noticed that both Geisinger Life Flight and Hershey Life Lion recently licensed 453.125 in several locations. Does anyone know if this is a shared 'operations' or 'flight following' area-wide frequency, or is it just a coincidence they are the same? Anyone have PL/DPL confirmed for either helicopter on this frequency?

453.125 is used by Hershey Med Center as a Pager freq... You can here
Life-Lion Paged out to the bird on this freq, but mostly it is the paging of
Doctors and Nurses and Hospital Admin to call bla bla bla. ect......

From: WA3YSU
Topic: 455 Message: 455

Ben - You are correct! It seems that the original poster forgot to mention the fact that this article is in regards to Middletown CONNECTICUT before he posted it all over the PA boards for us to assume it was in PA and waste our time researching it.

-----Original Message-----
From: Ben Russell [mailto:benrussellpa@...]
Sent: Tuesday, February 05, 2002 4:48 PM
To: SCAN-PA@yahoogroups.com
Subject: Re: [SCAN-PA] INTERFERENCE

This story is absurd.

Outside of the fact that Middletown operates on UHF and the PA DEP/DCNR radio system is VHF-Hi, I'd also like to point out that neither of the "DEP" staff mentioned in this article work for PADEP. So, unless they are talking about NJDEP, which also uses a VHF radio system, this story makes no sense. I also cross checked the names mentioned as being from the state with DCNR and there's nobody there with either of those names. PADCNR maintains the VHF-Hi network that they share with PADEP (since we used to be one big happy agency).

Also, I spoke with one of the Emergency Response staff in my office (since we are in the eastern part of the state, as mentioned in the story) and he has never seen any memo of such a problem...interesting since he is regionally in charge of getting radios repaired.

457. Info on PA SW 800 Sysytem

Yahoo group: CPMA
Date: 2002-02-10 16:59:35 UTC
From: Peter Kirk, IPN-PEN Admin
Topic: 457 Message: 457

New statewide radio system coming online in 2002 will dramatically improve Commonwealth's emergency response capability

Funding proposed for 'Imagine PA' will support streamlined government business operations beginning this year

HARRISBURG, Pa., Feb. 5 /PRNewswire/ -- Pledging that Pennsylvania will remain a leader in technology, Gov. Mark Schweiker today proposed as part of his 2002-03 budget broad new investments in technology geared to enhance Homeland Security and improve state government operations.

Gov. Schweiker's budget proposal includes an additional $11.2 million to deploy and transition state agencies to an advanced, statewide public-safety radio network linking mobile state employees and improving readiness and coordination for emergency responders.

Gov. Schweiker also proposed continued funding of $72 million to begin the rollout of his far-reaching "Imagine PA" initiative.

"Perhaps more than any other single factor, technology will help keep Pennsylvania competitive well into the 21st century," Gov. Schweiker said.

"Imagine PA will put all of us in state government on the same page, slashing red tape that slows us down, and making us more responsive to customers. And our Statewide Radio Network makes our emergency preparedness the best it can be. It instantly links state agencies like PEMA and the State Police with mobile response crews.

"Technology represents a profound investment in Pennsylvania's future -- let's keep it going."

The completion of the new Public Safety Radio Network will provide statewide coverage and advanced wireless voice and data communications unrivaled by any other state. Planning for the radio project began in 1996, and construction soon after, with 125 of the total 250 radio towers already completed. The system is using existing state tower locations wherever possible.

Once online, the new radio system will replace multiple existing

radio
systems used by state agencies, many of which are more than 25-years-old
and
difficult to maintain. The system will become operational a region at a
time,
beginning in Southeast Pennsylvania.
"Our new public-safety radio network will be the most advanced
statewide
radio system of its kind in the nation," Gov. Schweiker said. "While we
began
work on this project well before the Sept. 11 attacks, those tragic
events
re-
emphasized the necessity for reliable wireless communications to aid
rapid
response by state agencies.
The new radio system will provide state agencies with a single
network
for
handling wireless communications for all their mobile workers --
something
not
available now. It will provide digital voice and data communications
across
the Commonwealth, which is not available in any other state. Plus, it
will
use advanced 800 MHz radio equipment developed by M/A-COM offering
special
features and improved reliability over existing VHF radio equipment.
"For instance, an extremely useful feature of the state's new radio
system
is its ability to communicate with existing radio equipment being used
by
local governments," Gov. Schweiker said. "So, older equipment is not
rendered
obsolete and wireless communications are maintained between state and
local
agencies. This is a tremendous advantage to local governments, since
they
will not have to purchase new radios to continue to communicate with
other
state and local authorities."
Wherever excess radio capacity exists, local governments are being
invited
to piggyback on the new radio system. This will minimize their initial
costs
while bolstering the emergency readiness of state and local response
teams.
The new technology also supports Global Positioning System (GPS)
tracking.

This could be used by PennDOT or State Police, for instance, to track the
location of snowplows or police cruisers. Also, the new M/A-COM radios are
software-based, not hardware dependent. This means that new features can be
added by making changes to the system software, avoiding expensive alterations
to the actual hardware in the radios, saving time and money.
Gov. Schweiker's proposed budget also includes $72 million for Imagine
PA,
which will deploy new software for better management of the state's
accounting, budgeting, payroll, human resources and procurement functions.
Imagine PA will establish Pennsylvania as a leader among states in the use
of
enterprise resource planning (ERP) software, which many corporations now use
to improve their customer service and global competitiveness. No other state
has implemented ERP software on such a far-reaching scale as is being
undertaken by Pennsylvania with the Imagine PA initiative.
"Many companies have recognized the value of this specialized software
for
improving their business practices and, in turn, making them more
competitive," Gov. Schweiker said. "We are doing the same by using the
Imagine PA project to make Pennsylvania a model state government for the 21st
century."
Imagine PA will dramatically streamline state government's business
operations. For instance, state business managers currently receive budget
status reports on a monthly basis. Through Imagine PA, officials will be
able
to view their true budget status daily, and they will be offered various tools
for analyzing their budget performance. This will help state agencies to
better manage their annual funding.
The new software will support streamlined business practices, cutting
bureaucratic red tape and providing Commonwealth officials with real-time
access to vital business data. For instance, the new software will let
employees purchase routine office supplies without going through a lengthy

approval process. Authorization and oversight will be built into the system
to provide accountability while workers are empowered to more easily request
the supplies they need. Employees also will be able to file travel
reimbursements online and make changes to their personnel accounts for changes
to personal addresses, beneficiaries and more, speeding processing and
reducing paperwork.
The first Imagine PA improvements are on schedule for implementation in
July 2002, and changes in all five business areas will be completed by January
2004.
In his 2002-03 budget, Gov. Schweiker also proposed $5.7 million for
education technology initiatives. Among other programs, this investment
includes funds to enable Pennsylvania's three Digital School Districts to
continue to serve as high-tech education centers and models for schools
nationwide.
The Administration's Digital School District initiative is transforming
three Pennsylvania school districts into 21st century education centers that
incorporate technology into every aspect of learning, dramatically improving
the way children learn. Selected last year, the three Digital School
Districts are: Carlisle Area, Cumberland County; Quaker Valley, Allegheny
County; and Spring Cove, Blair County.
The Administration has made technology a key component of Pennsylvania's
economic-development efforts by such measures as: launching the nation's
first-ever Tax-Free PC shopping week to encourage home computer use; signing
legislation to make Pennsylvania the first state to enact a uniform Electronic
Transactions Act; eliminating the 6 percent sales tax on computer services;
creating the research-and-development tax credit; putting the state's Web
address on Pennsylvania's new license plates; leading technology trade
missions abroad to increase high-tech exports and high-tech jobs for
Pennsylvania; launching the Technology 21 initiative to catapult Pennsylvania
into the top 10 states for high-tech business; creating the "Made-in-PA"
database of Pennsylvania-made products; and expanding the Net Operating Loss
carry-forward provision to give technology startups a tax deduction.

Received the following re: a planned Yahoo outage - please plan ahead!

--------- Forwarded message ----------

Dear Yahoo! Groups Members,

The Yahoo! Groups service will be down for scheduled maintenance Friday, March 15, 9:00 PM PST (GMT-8) as we move our servers to a new facility. We expect the service to be restored the morning of Sunday March 17.

During this time the web site will be unavailable and email will not be delivered. (Some users may experience email non-delivery notices while the service is down, but all email should be delivered once service is resumed.) Please note: once the service is restored, there will be email delays due to backlog. We expect these delays to last no longer than 1 day. Please do not re-send email to your group as this will only add to delays.

We apologize for any inconvenience this may cause.

462. Yahoo junk mailings

Yahoo group: CPMA
Date: 2002-03-29 16:32:23 UTC
From: Greg Halpin
Topic: 462 Message: 462

Yahoo may have reset all of our "marketing preferences" settings, resulting ineach of us receiving additional unsolicited e-mail, etc. To set your preferences to not receive unsolicited e-mails, follow these steps:

1: go to groups.yahoo.com/mygroups and click on "account info" at the top right hand corner of the window
2: verify your user ID and password if you have to
3: scroll down and click on "marketing preferences"
4: change your settings to "no" and save the changes

I have been unable to confirm or deny the changes, but it doesn't hurt to change these setings to "no."

463. Additional info re: Yahoo marketing preferences

Yahoo group: CPMA
Date: 2002-03-29 22:12:37 UTC
From: Greg Halpin
Topic: 463 Message: 463

After doing a bit more research on the subject, it appears that Yahoo has, in fact, made changes that will result in users receiving more unsolicited e-mail if they do not change their marketing preferences.

Wednesday March 27, 10:15 pm Eastern Time
New Yahoo Privacy Policy Expands Sharing Of User Data
By: Peter Loftus

<snip>

In another change, Yahoo says it displays targeted advertisements that are based on personal data. Advertisers don't receive individual personal data each time a user views an ad. But advertisers might assume that the viewer of a specific ad meets certain targeting criteria, such as being a woman between the ages of 18 and 24, the policy states.

One policy change will require Yahoo users to take action. Previously, users were able to click only once to decide whether to receive promotional e-mails from both Yahoo and its partners. Under the new policy, Yahoo users must visit a section of the Web site called "Edit Marketing Preferences." There, they must choose separately whether to receive more than a dozen categories of special offers and marketing e-mails from Yahoo, such as "managing personal finances."

For most of the categories, the default option is to receive the promotional e-mails. So, if users don't want to receive any of them, they must click "No" for each option. The only category where "No" is the default option is "Yahoo! Delivers," which features special offers from Yahoo's business partners.

The setup raises the possibility that Yahoo users who don't edit their marketing preferences will begin receiving Yahoo promotions, even if they had previously opted out of such services.

The company is essentially using this requirement to promote its newer services. For instance, users who signed up for Yahoo two or three years ago -- and who opted out of promotional e-mails at the time -- might not be aware that Yahoo has upgraded its job-listings service with the recent acquisition of HotJobs Ltd., Ms. Srinivasan said. Now, when they edit their marketing preferences, they can decide whether to receive information about "finding a job or an employee."

Ms. Srinivasan pointed out that users will have 60 days to edit their preferences. Also, she said it was the first time Yahoo has required users to edit preferences in company history.

<snip>

To edit your marketing preferences

1. Goto My Groups and click on Account Info,
2. Verify your password if it asks you to
3. When your Yahoo ID card comes up - Click on 'Edit your Marketing Preferences'
4. Change all those Yahoo Yes's back to No's!
5. Click Save Changes

465. privacy policy

Yahoo group: CPMA
Date: 2002-03-30 03:31:09 UTC
From: cpma0150
Topic: 465 Message: 465

Hello to all...

Off-topic, but for those who have a Yahoo account, they updated the privacy policy (added an additional line to it) :)

But what you may want to do is go to the privacy policy screen on the main page, & go to marketing preferences... there you find everything turned on, which means if you have an email account w/ Yahoo, you are going to get blasted with junk mail...turned all of them off, & submit, & you should be in good shape.

I was watching TechTV's Screen Savers, & learned about this.

Also, free email accounts will end in April, in case you didn't know.

May decide to keep mine here - 20 a year is not bad at all.

Mike, KB3GPX

466. Long Island /NYC Hamfest Sunday June 9th: Rain or Shine

From: Greg Halpin
Topic: 469 Message: 469

I got this message from another mailing list. The information is
interesting .... caveat emptor!

Greg

--------- Forwarded message ----------
From: William Rossiter III <RadioGuy101@...>
To: Scan-DC <scan-dc@...>
Date: Mon, 08 Apr 2002 17:55:14 -0400
Subject: [Scan-DC] FRS In Times Square!
Message-ID: <HPECIBJCCNEJIMPONGDHAECECAAA.RadioGuy101@...>

Hello all. I just got back from a 4 day trip to New York City. This was
my
first time in the Big Apple, and I stayed on the 40th floor of the Double
Tree Suites in Times Square. I didnt bring my scanner with me, but I did
bring my TalkAbout 280 FRS radio (which has an FRS scanner built into
it).
I am writing to inform everyone what the FRS life is like in Times
Square.

-95% of all people using FRS radios in New York City, use CTCSS tones.
-During the daytime, if you press MONITOR on the radio, one can hear
somebody on probably about 400 of the total 532 channels (14 X 38).
-During the night time, one can hear somebody on almost all the FRS
channels.
-A large amount of businesses use FRS in Times Square. I heard 2 limo
companys using them. 7 different hotels use them. And numerous street
shops using them.
-Believe it or not, there are FRS repeaters set up in NYC. I dont know
if
they are llegal or illegal, but they definitly exist. They work on an
input
channel/output channel system. I counted 3 different repeaters in total.
Two repeaters were used for limo companies, and 1 was being used for the
dance club "Barcode".

The limo repeaters went like this:

Input: Channel 14 - CTCSS 28
Output: Channel 3 - CTCSS 28

Input: Channel 10 - CTCSS 13
Output: Channel 2 - CTCSS 13

The dance club repeater went like this:

Input: Channel 5 - CTCSS 22
Output: Channel 6 - CTCSS 22

- The limo repeater is excelent. I took a taxi down to ground zero, while
my brother stayed in Times Square. I called him on the cell phone and told
him to transmit on the input channel.
I then listened to both channels. The input channel was totally silent, but
on the output channel I heard my brother!
- I am guessing that they get away with using repeaters because so many
channels are constantly being used, that it would be extremely difficult for
the FCC to track down FRS pirates. It kinda reminds of CB Channel 6.

Anyway, that was my FRS experience in NYC. I encourage everyone who goes
there in the future, to monitor all the FRS channels.

-Bill

473. York action - 4/20/02

Yahoo group: CPMA
Date: 2002-04-20 11:51:52 UTC
From: Greg Halpin
Topic: 473 Message: 473

York is once again in a state of heightened alert, as the Aryan Nation is expected in York today to commemorate Adolph Hitler's birthday.

There is a strong police presence, possible even more than the January incident. Several downtown blocks have been closed to vehicular traffic, and the fire department has beefed up staffing.

In January, 155.475 was the main operation frequency for police ops related to the event. I suspect that the same frequency will be in use today.

Other freqs that may be of interest:

York City Police 1 - 156.570
York City Police 2 - 156.330
York County EMA - 453.600
York City Fire Main - 154.190
York City Fire Ops - 154.235
York City Fire Admin - 154.250

DO NOT go downtown if you are in the area.

Sorry, but I do not have a live feed set up for the event.

474. York activity - update

Yahoo group: CPMA
Date: 2002-04-20 13:25:51 UTC
From: Greg Halpin
Topic: 474 Message: 474

Just an update on the activities in York.

155.475 is definitley the operations frequency for police operations in downtown York. In addition, 158.940 (county police zone 5) is being used by a second operation in the Springettsbury Township.

The Aryan Nation had requested to use a county park in Springettsbury Township, and they were refused that request as well. Rocky Ridge Park in Springettsbury Twp. and John Rudy Park in Manchester Twp. are closed in anticipation of possible activity at either of those venues.

My notes show the following:

City Police using DPL 026 on F1 and F2, and PL 4B on their Tac channels. Our FD radios are programmed to receive carrier squelch on police F1 & F2, so the DPL may not be in use yet, or perhaps just to access the repeater and not to receive.

County Police using DPL 023 on Zone 2, DPL 032 on Zone 3, and 7A on Zones 4, 5 & 6.

City Fire uses PL 5Z on Main and Ops, 6B on Admin, fire police use 3A on their channel, and 1B on the Public Safety repeater. These should all be active PLs.

Date: 2002-05-08 12:07:40 UTC
From: Ed Muro
Topic: 477 Message: 477

I want to let you guys in on a great chance to win some awesome prizes. The local ham radio club (LIMARC: www.limarc.org) is running a fund raising raffle. The maximum number of tickets being sold is 100.

The prizes are:
First Prize: ICOM 756 PRO
Second Prize: Icom 706 MK II-G
Third Prize: W&W Batteries- Master Charger 1A with a charging cup of your choice.

The odds of winning are better than anywhere else. The cost of a ticket is 50 bucks, but when you think...all it really is, is the cost of a cup of coffee every day for 10 weeks...I don't see how you can pass on an opportunity like this.

I happen to have two tickets left, so if you are interested in one let me know ASAP.

Looks like AOR is coming out with a new receiver-Ed

The A.O.R. Company, one of the world leaders in full coverage DC to daylight portable and tabletop receivers has announced the August 2002 release of it?s new receiver, the A.O.R. AR-ONE.

This very compact unit (157(W) x 58(H) x 270(D) mm. or 6.2(W) x 2.3(H) x 10.8(D)inches cover 10 kHz. to 3.3 GHz., with no gaps! It is a triple-conversion unit and weighs a mere 2.2Kg (4.9lbs). It comes with 1000 memory channels, computer controlled capabilities, 10 VFOs and two RS-232 control ports. In fact, up to 99 of these units can be controlled by a sole personal computer. To check out the specifications & features, or to see a photograph and to download a AOR AR-ONE catalog, please check out A.O.R.?s special web page for this unit at:

Tired of being nagged by your old hag to mow the lawn on Sunday morning? Wanna get away from the nagging kids who either want you to take them to Great Adventure or just have their hand out looking for some dough. I've got the answer....get up early and sneak out of the house...Come on down to the next LIMARC Hamfest....

Sunday, September 15th...rain or shine.
Located at Briarcliffe College on Stewart Ave in Bethpage, Long Island.

General admission is $6 and if you want, you can even bring your sweetheart in for free as long as she (or he) isn't a licensed amateur radio operator. If they have a ham license, well...then they gotta pay the 6 bucks too. The gates open at 8:30 AM, there is NO VE session.

Hey, sad to say...winter is right around the corner.... why not make some space in the garage and clean it out? Bring down your unwanted items and take a tailgate spot for $15? No advanced registration is required, just show up at 6:30 AM and pay your 15 bucks. It would be really cool if you had radio hobby related items or services for sale, but you can sell just about anything as long as it is not a weapon or pornographic. You will need to supply your own table & chair.

For more information, call our 24-hour info line at: 516-520-9311 or visit our web site at: http://www.limarc.org.

Are you a LIMARC member and do you want to get in for free? Well, all you have to do is volunteer for an hour or more and you'll get in to the hamfest for free. I know, 6 bucks for an hour's work isn't such a great wage, but you will really be helping out the club. If you have some time to spare and want to take advantage of getting in for free please e-mail us at: hamfest@....

488. Mass Casualty Drill

Yahoo group: CPMA
Date: 2002-08-10 14:13:04 UTC
From: yorkfd@juno.com
Topic: 488 Message: 488

For those of you that may be within range, there is a mass casualty drill that just started at the York Fair Grounds (York Expo Center). There will be a lot of comms involving injured subjects at the grandstand.

It is a wide area drill, as I know that Gettysburg Hospital is one of the participants in the drill.

Yes gang, it's that time of year again.

Next Sunday is the annual CPMA picnic right here in York.

Please let me know if you are planning on attending, and let me know what dish you're bringing.

Don't forget your $5 to cover the cost of burgers, dogs, and etc.

491. Fwd: NYC / Long Island Hamfair September 15th 2002

Yahoo group: CPMA
Date: 2002-08-20 15:40:01 UTC
From: Ed Muro
Topic: 491 Message: 491

Dear Friends:

On behalf of LIMARC, I would like to thank you for all your support over the years with promoting and participating at our hamfests. As you may be aware, LIMARC has an extensive repeater system, offers numerous educational opportunities for students, is always there in times of disaster for the public service community, and has excellent member benefits that many ham radio clubs just can't provide anymore. Our hamfests supplement our dues income, without this income we could not continue to provide the level of service that the ham radio community has become accustomed to. Therefore, we hope you will continue to promote our events in the future.

I thank you with all sincerity.

Sincerely,
Ed Muro K2EPM - LIMARC Hamfest Chairman / Director.

LIMARC will be holding a Hamfest on Sunday, September 15th at Briarcliffe College on Stewart Avenue in Bethpage, New York; rain or shine.

The gates open at 6:30 AM for vendors, no pre-registration is necessary. The general public will be let in at 8:30AM.

Tailgate spots are $15 which includes admission for one person, additional people as well as general attendees is $6.

For more info visit the LIMARC web site at: http://www.limarc.org or call the 24-hour info line at: 516-520-9311

Hello- Because of the inclement weather, the LIMARC Hamfest that was scheduled for today has been rescheduled for Sunday Nov 10th, 2002.

Note the new time: Vendor setup will begin at 7:30AM and NOT a minute earlier. The gates will open for the general public between 9-9:15AM.

Anyone who attended today's event should save their admission stub; this will cover your admission at the November event.

A flyer with all of the particulars has been attached* in MS Word format, Thank you for your support...Ed-K2EPM

* Certain yahoo groups will not allow file attachments, if you are receiving this e-mail via a Yahoo Group Reflector, look for additional information to be posted on the LIMARC Web Page in several days.

498. Ed's Virtual Hamfest

Yahoo group: CPMA
Date: 2002-09-22 14:17:50 UTC
From: Ed Muro
Topic: 498 Message: 498

Hello Friends, sorry for the intrusion, if you have no interest in my online garage sale hit delete now.

I have not been able to set up a table at the hamfest in quite some time since I have been running the LIMARC Hamfests (www.limarc.org) for 3 years now and I have a small collection of stuff that I would like to sell. I may try to take a table at the October hamfest in Lindenhurst, but for the time being I have put the following items on eBay.

Aside from the eBay items I have:

1-A like new Uniden BC144XL, 16 channel programmable scanner that I would take $65 for. Picture and specs available at:
http://www.uniden.com/productsupport.cfm?product=BC144XL

2- Brand new mens navy blue ball cap bearing the logo NC on the left, and American Flag in the middle, and PD on the right. $10

3- A NEW universal cell phone hands free kit that retails for $39.99, fits most Nokia phones - $20

4- Mens Fruit of the Loom 50/50 XXL T-shirt depicting the historical Hyde Park NY Rail Road station. $5

5- New in the box: UNION 8 channel, MS800 VHF/UHF crystal scanner with 162.550 MHz crystal. Yep, this classic has been stored away in a warehouse for years. According to Gerry at G&G Communications, it uses standard Regency type crystals. I have a picture available upon request. $30

If you are local I will deliver the above items or ship them and you pay the appropriate postage.

Here's my eBay items:

Radio Shack Pro-2021 Scanner:
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1383097092

Bearcat 250 Scanner:
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1383101922

The Juice Master Juicer:
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=2056277486

Got the following from the SCAN-DC list. Usual caveats apply....

--------- Forwarded message ----------
From: "William D. Rossiter III" <RadioGuy101@...>
To: "Scan-DC (E-mail)" <scan-dc@...>
Date: Mon, 23 Sep 2002 16:09:02 -0400
Subject: [Scan-DC] FRS Fun
Message-ID: <000001c2633d$109a0780$684e3144@cp47609b>

I got this little article off of a google group for FRS radios. The
reason
why I am not gonna copy and paste it into this posting is because it does
have some mild language in it. I didn't want to offend anyone in
SCAN-DC.
The article is about how you can take a set of FRS radios and downkey on
both of them to jam someone's car stereo system. I doubt it will work,
but
it is worth a good laugh.

501. club repeater project

Yahoo group: CPMA
Date: 2002-10-14 01:10:18 UTC
From: cpma0150
Topic: 501 Message: 501

In light of Busch's GMRS project, I thought I'd undertake the proposal for a 440 club repeater. For this, I aquired an Advanced Computer Controls RC850 controller. State of the art for it's time (mid 80's), this originally $2800 device will do alot of neat stuff.

. Synthesized speech w/ male/female voices.
. Autopatch & reverse patch for phone calls.
. 4 port links to other devices.
. Telemetry for signal reports, tempuature, voltage, etc.
. Electronic mailbox w/ time/date stamping.

I've been slooowly trying to learn the programming 'language'. It's daunting, but fun! Currently, I have enough of it programmed to give a demo of some of the features for the next meeting. I'm going to try to get it interfaced to a transmitter to really get the full effect of the sound of the controller. If successful, I'll post a test frequency here before the meeting date.
Now, back to the manuals!

Date: 2002-10-31 17:20:44 UTC
From: Ed Muro
Topic: 504 Message: 504

The following info was sent to me by the President of the Long Island Mobile ARC, Diane Ortiz. If you are an amateur radio operator, or just have an interest in Ham Radio, you won't want to miss this event. They have been having it yearly for a number of years now and it is very informative.

This is NOT a hamfest with vendors selling stuff. It is a day of forums and a gathering where hams can fraternize. I hope to see you there.

HAM RADIO UNIVERSITY 2003
American Radio Relay League NYC-Long Island Section Convention
Sunday, January 19. 2003 in Oyster Bay, NY

FOR IMMEDIATE RELEASE:

Oyster Bay, New York - On Sunday, January 19, 2003 at 8AM, the doors of the East Woods School will open for the fourth annual Ham Radio University. Ham Radio University 2003 is a day of education about Amateur Radio.

This year new forums have been added and the event is being held at a new location -- the prestigious East Woods School, a private school on 45 acres in Oyster Bay. There will be special forums geared to the non-ham as well as the experienced ham radio operator. The focus will be "hands on" with many demonstrations.

Come join us at the East Woods School, 31 Yellow Cote Road, Oyster Bay, Long Island, and learn about everything from satellite communications, low power operating using radios as small as a tuna tin and the latest in emergency communications. There will also be a VE session for those who would like to take an FCC exam and a Special Event Station set up and operational on HF.

HRU 2003 is sponsored this year by the Long Island Mobile Amateur Radio Club and is a cooperative effort between over twenty

clubs and organizations in the New York City- Long Island area. It is also the American Radio Relay League, New York City-Long Island Section Convention. Besides the forums, there will be tables set up with information about the different groups, ham radio classes, exam session schedules, public service and other activities.

Join us for a day of fun and education for the whole family! Admission is open to all - donation is $2 per person. (refreshments will be available)

TALK-IN on W2VL 146.850 -600 136.5 PL and 147.210 +600

For more information contact:
George Tranos N2GA, ARRL NLI Section Manager
631-286-7562 N2GA@...

The next meeting of the HRU 2003 committee will be Monday, November 11, 2003 at 7PM at the Babylon Town EOC, Babylon Town Hall, Sunrise Highway, Lindenhurst, NY. All interested parties are invited to attend.

STAT Med Evac is based in the Pittsburgh area , and covers an area roughly from the Cuyahoga Valley in Ohio to Baltimore, Maryland. You can find mor info about them in a Sunday News article

http://www.yorksundaynews.com/Stories/0,1413,137%257E10048%257E1090714,00.html

Or at their web site

http://www.statmedevac.com/

I have been given an operating frequency of 155.625 for them, which should be their STATCOM center at Mercy Hospital in Pittsburgh. According to a guideline issued by the county 911 center, all helicopter requests will now go through STATCOM, who will determine which aeromedical service is closest and dispatch that helicopter.

I have not yet heard any comms on that frequency.

Greg

I also found 2 other frequencies they have used outside the York area.

155.235 and 155.325

I plan on punching these 3 frequencies in and see if I get anything.

518. Stat Medevec frequency

Yahoo group: CPMA
Date: 2003-01-11 13:32:00 UTC
From: SteveH
Topic: 512 Message: 518

Friday while at work my computer logs showed about a dozen tranmissions on
155.265 with tone 103.5 I don't know if it was the York unit or not so
will record
it next time on tape.

Anyone else hear anything on Friday?

525. M/A Com AKA Tyco

Yahoo group: CPMA
Date: 2003-01-22 13:19:54 UTC
From: Ed Muro
Topic: 525 Message: 525

Gee, I wonder how many of the municipalities we live in are in bed with these folks. I wonder if the PA state system will ever get built right.

NEW YORK (Reuters) - Tyco International Ltd. (TYC), on Wednesday said its quarterly earnings fell nearly 50 percent, as the weak economy and higher costs ate into profit margins across its business lines.

The Bermuda-based company, which has been embroiled in controversy over the accounting practices of its former management, said its fiscal first-quarter earnings fell to $634.5 million, or 32 cents per share, down from nearly $1.2 billion, or 60 cents per share, the year before.

This met Wall Street expectations of 32 cents, based on estimates by research firm Thomson First Call.

Looking ahead, the company said earnings for the year are expected to be near the lower end of its previously announced range of $1.50 to $1.75 per share because of its recent debt refinancing activities and higher pension costs

539. cpma repeater project

Yahoo group: CPMA
Date: 2003-03-24 03:21:10 UTC
From: cpma0150
Topic: 539 Message: 539

Hello.

Just an update: the repeater is running through limited testing right now. You can try it out on 449.1375 - offset, no pl. I'm using this frequency combo to avoid any interference from other repeaters.

Was talking to Greg, KB3DCG today, testing the machine from his ht around town. Fairly good coverage west of center city, & parts east.

The repeater is only a temporary location, so coverage should improve significantly in time. Also, the repeater may be up or down from time to time for tweaking, so if you key up & hear nothing, you'll know! :)

I'll be monitoring it at home as well as work, so feel free to give a shout out!

The weather is slowing getting warmer, & will be better for a permanent installation.

A side note: The CPMA club will again be making a presence at the Timonium Hamfest on 3/29-3/30. Stop by & say hi!

Mike

Some of you may have seen my earlier messages for help in compiling this info.
For those of you who did, now is the time to stop by and check it out. For
those of you who never saw my earlier messages, feel free to stop by as well.

As always, any corrections or additions are welcome.

http://home.earthlink.net/~benandchrisie/medhelos.htm

The above site includes website links, ship locations/ID's, and
dispatch/operations frequencies for air medical evacuation programs in PA, NJ,
DE, MD, WV, OH, and NY. A map showing the locations of all the bases is also
included. Enjoy! LZ frequencies are not included since these vary greatly by
area and most of these helos have radios in them packed with hundreds of
potential frequencies.

If someone has a location update, please be patient with me updating the map.
The program I used to make the map is on my PC at work, not on my home
computer. Therefore, I cannot update the map as quickly as I can the
accompanying tables of info.

Yahoo group: CPMA
Date: 2003-05-11 19:31:34 UTC
From: scannertesting
Topic: 548 Message: 548

Only one question :-) Why is it nothing at the

"Central Pennsylvania Monitoring Association" web-page "Club Information"

http://members.aol.com/cpmaclub/club.html

"We are a new club and are trying to grow. For further information send us some email , or 717-846-6176 or mail CPMA, PO Box 7109, York Pa 17404"

Works???

We Sent e-mail and get back

"Your message

To: pro2006@...
Subject: Is it working yet??
Sent: Sun, 11 May 2003 14:37:17 -0400

did not reach the following recipient(s):
pro2006@... on Sun, 11 May 2003 14:54:27 -0400
The recipients name is not recognized *Unknown Recipient* Unknown User"

Try to call and get:

"717-846-6176" "Sorry the number you are trying to reach is no longer in service and there is no new number"

Send a postcard and it comes back:

"CPMA, PO Box 7109, York Pa 17404" "Return to sender not at this address" ???

Guys if everything on your Club Information web-page is bogus how can you grow??

"We are a new club and are trying to grow."

No one can reach you.... You need to fix that, i.e. it's been like that for over 1 1/2 months now... I'm just a PA guy trying to reach you folks to find out what your club is all about but it's been really tuff.. It does not say anywhere that you guys are a secret club :-)

Sorry George, it's not a secret society .... no secret handshakes,
decoder rings or anything like that.

The web site is suffering from some neglect, coupled with an access issue
with the host.

The phone number and post office box were both borrowed from a member's
business which is no longer open, and thus both have expired.

This list is currently the best way to contact not only our members, but
others interested in the hobby both from this area and beyond.

If you have an IRC client, you can join us on IRC Sunday evenings from
8:00pm Eastern to 9:00pm Eastern on #cpmaclub on an IRCnet server.

And, we still meet in person on the third Sunday of each month in York,
but our meeting place will be changing once again due to access issues.
We will not be meeting in April since a number of our members are
traveling out of town that weekend to other events.

So what would you like to know George, we'd be glad to talk radio with
you!

Greg Halpin

Hi George

Sorry George. I have had problems accessing the webpage to update it. I
been thinking
of a new location for the site or getting a domain for the club. We are
still around and meet monthly.
Like Greg mention if you have any questions feel free to email us or contact
us on the group list

Steve

Subject: [CPMA] Central Pennsylvania Monitoring Association

Only one question :-) Why is it nothing at the

"Central Pennsylvania Monitoring Association" web-page "Club
Information"

http://members.aol.com/cpmaclub/club.html

"We are a new club and are trying to grow. For further information
send us some email , or 717-846-6176 or mail CPMA, PO Box 7109, York
Pa 17404"

Works???

We Sent e-mail and get back

"Your message

To: pro2006@...
Subject: Is it working yet??
Sent: Sun, 11 May 2003 14:37:17 -0400

did not reach the following recipient(s):
pro2006@... on Sun, 11 May 2003 14:54:27 -0400
The recipients name is not recognized *Unknown Recipient* Unknown
User"

Try to call and get:

"717-846-6176" "Sorry the number you are trying to reach is no longer
in service and there is no new number"

Send a postcard and it comes back:

"CPMA, PO Box 7109, York Pa 17404" "Return to sender not at this address" ???

Guys if everything on your Club Information web-page is bogus how can you grow??

"We are a new club and are trying to grow."

No one can reach you.... You need to fix that, i.e. it's been like that for over 1 1/2 months now... I'm just a PA guy trying to reach you folks to find out what your club is all about but it's been really tuff.. It does not say anywhere that you guys are a secret club :-)

George

Jack,

The MED radio frequencies are established nationally, but at the moment I can't recall what organization established them.

The MED channels are:

Med 1 - 463.000 and 468.000
Med 2 - 463.025 and 468.025
Med 3 - 463.050 and 468.050
Med 4 - 463.075 and 468.075
Med 5 - 463.100 and 468.100
Med 6 - 463.125 and 468.125
Med 7 - 463.150 and 468.150
Med 8 - 463.175 and 468.175
Med 9 - 462.950 and 467.950
Med 10 - 462.975 and 467.975

You'll note that the frequencies for Med 9 and Med 10 are lower than the other eight sets. Med 9 and 10 are typically command and control/dispatch channels. The lower frequency of the pair is typically base to mobile and the higher mobile to base. I think Med 4 was set aside as a nationwide calling channel (without PL) but it's been years since I dealt with the set-up.

569. Annual CPMA picnic

Yahoo group: CPMA
Date: 2003-08-13 18:46:51 UTC
From: yorkfd@juno.com
Topic: 569 Message: 569

Hello gang.

This is for those of you that attend the annual picnic in York.

As you all know, we usually hold the picnic during the August meeting date, but due to a number of conflicting schedules, and the unseemly weather we've been having, it was decided to move the picnic back one month to the September meeting date.

We still have to confirm that Steve B. will be hosting it in his yard, but otherwise we are on track for our picnic on September 21st at 12:00 noon.

Greg

573. PSP & GPS

Yahoo group: CPMA
Date: 2003-09-15 17:56:32 UTC
From: WA3YSU
Topic: 371 Message: 573

Has anyone else noticed in their areas that PA State Police (PSP) troopers are providing Global Positioning System (GPS) coordinates now for accidents?

I noticed last week that the troopers on I-95 out of the Trevose (Bucks County) Barracks now provide the GPS coordinates back to the station right after they arrive on location of each accident.

Anyone know the reason for this, or is it just an overall reporting improvement over the use of mile markers??

From: scannerdel
Topic: 576 Message: 576

I was in York PA this past week and confirmed the following:

464.550 Comfort Inn, located at 140 Leader Heights Rd. in York. It is their maintenance and housekeeping freq. Not sure if anyone really cares but I figured I'd pass it along anyway.

My other list of public safety for York and the surrounding areas was great. I got it from the CPMA site.

regards-
jm

Hey everyone, just want to let you know, that FireFeeds.Com has just finished it's test and trial period, and is now operational.

At this time we have the following live fire feeds:

CA - San Diego ---- The San Diego live feed is also covering the San Diego Major Brush fire operations.

FL - Orlando
MD - Baltimore
PA - Harrisburg
PA - Philadelphia
TX - Dallas

Coverage for the following cities is in the works, and will be featured soon on FireFeeds.com:

CA - Los Angeles (ETA - November 10th)
CA - San Francisco
DC - Washington
FL - Miami
GA - Atlanta
IL - Chicago
IN - Indianapolis
LA - New Orleans (ETA - October 30th)
MA - Boston (ETA - November 7th)
MI - Detroit
MI - Lansing (ETA - October 30th)
MN - Minneapolis/St. Paul
NJ - Newark/North NJ Metro (ETA - October 31st)
NV - Las Vegas (ETA - November 10th)
NY - Buffalo (ETA - October 30th)
NY - New York City
OR - Portland
TN - Nashville
TX - Houston
UT - Salt Lake City
VA - Norfolk
WA - Seattle

We are also still looking for Feed Providers for all major Cities, please contact support@... if you are interested in providing a 24/7 live fire feed. There are several benefits for our feed providers.

To Subscribe to FireFeeds.Com just go to our website and click on Subscribe Now! at the top or left side of the main page.

582. LIMARC WINTERFEST 2004

Yahoo group: CPMA
Date: 2003-11-23 16:17:28 UTC
From: Ed Muro
Topic: 582 Message: 582

You all have been very gracious and supported LIMARC's hamfest publicity efforts. I hope you will continue to support us again now and in the future. On behalf of the entire LIMARC board and membership, thank you.

Eddie Muro- Amateur Radio Station K2EPM
Long Island, New York
LIMARC Vice-President www.limarc.org
http://www.nat-com.org
http://www.aosc.org

For Immediate Release:

The date is Sunday, February 29, 2004 for annual Long Island Hamfair and Electronics Show Winterfest sponsored by the Long Island Mobile Amateur Radio Club (LIMARC).

The doors open 9:00 AM for buyers and admission is $6, children 11 and under are free. The location is Levittown Hall at 201 Levittown Parkway in Hicksville, NY. Complete directions are available on the LIMARC website at: http://www.limarc.org/fest.htm

Vendor info: All spaces are $20.00 for each table plus admission ($6.00) for each person. Each space includes one six foot table. Gates open 8 AM for vendors to set up. Advance Registration Only! (No day-of-sale spaces!) Limited selling space is available - only some have electric hook-ups! So, reserve your space now by sending your check to: LIMARC Hamfest, P.O. Box 392, Levittown, NY 11756-0392.

For more hamfest information contact the Hamfest Chairman, Brian Gelber at: WB2YMC@....

Talk-in on W2VL, 146.85 - repeater 136.5 PL

There will be a VE Test Examination promptly at 10 AM. If you are planning on taking any exams you will need to bring a photo ID with you. If you have any CSCE's (certificate of successful completion of exam)
you will need to bring them and a photocopy of each. You will also need your ham license if you have one, along with a photocopy. The test fee is $12.00. If you have any questions about LIMARC exam sessions you can contact the LIMARC VE Liaison, Al Bender W2QZ at w2qz@... or 516-623-6449.

585. Lebanon County Radio Upgrade

Yahoo group: CPMA
Date: 2003-12-21 18:26:29 UTC
From: Peter Kirk
Topic: 585 Message: 585

Commissioners OK $10.4M radio upgrade
By JOHN LATIMER

Staff Writer

Lebanon County's Emergency Management Agency dispatchers will soon be using a new system to communicate with emergency responders.

The county commissioners yesterday gave their unanimous approval to a $10.4 million plan to modernize the current system. Money for the project, which was first proposed about 21 months ago, was appropriated earlier this year when the commissioners issued a $16 million bond.

Work on converting to the new system will begin after contracts are signed next month and will take about a year to complete, said county EMA Director Daniel Kauffman.

"We should be able to go live by 2005," he told the commissioners.

The system will equip police, firefighters, fire police and medical technicians with upgraded portable and mobile radios for wireless communication with dispatchers and each other on a mid-frequency UHF band that will be more reliable and clearer than the current, low-frequency system, said communications consultant Fred Short. The system will also include pagers that provide written messages, eliminating the need for unreliable voice pagers

Communications will travel between seven cell-phone tower sites located throughout the county that will provide 95 percent coverage, including inside buildings, said Short.

The county already owns two cell towers and should be able to arrange space on five others at no cost or reduced rent, he said. The system will also be able to communicate with counties like Lancaster that use different systems, said Short.

The county's emergency responders are in favor of the system, said Kauffman.

"I've gotten very little negative feedback in the past couple of months about this," he said. "I think everybody has to realize, too -- and I'm speaking police, fire and EMS -- a lot of their radio equipment is going to be obsolete in another 10 years."

The equipment will be purchased by the county from M/A-Com Wireless Systems, a unit of Tyco Electronics. Purchase price for the equipment will be set using a state contract, said county administrator Jamie Wolgemuth.

M/A-Com has had trouble implementing a system called Open Sky that was purchased by the state, but the system Lebanon County will be purchasing uses a different technology called EDACS -- Enhanced Digital Access Communications Systems -- that has a much better track record, said Short.

Other suppliers were considered, including Motorola, but M/A-Com's system had advantages, said Short. Among them was analog-to-digital communications capability.

Although the M/A-Com system is digital, the new county radios will be able to communicate with analog equipment, according to Short. That is a feature that Motorola lacks and one that will benefit volunteer firefighters who want to purchase less expensive equipment, he said.

Police will want to use digital radios because their message can be encrypted, said Short. They will also be equipped with a "panic button" that an officer in distress can press and alert others to his location, he added.

Purchasing Motorola equipment also would have required expensive alterations to the console used at the county EMA's communications center, Short said.

The first step in converting to the new system will be to install the infrastructure, including the cell towers, said Short. Once the system is up and running, there will be a period of about six months during which emergency responders will be operating both the old and new systems while the kinks are worked out, he said.

Residents who like to listen to emergency communications on old scanners will be able to do for a while longer, said Kauffman, but eventually they will have to update their equipment.

"There is also some talk about simulcasting on low band for awhile, but I don't know how long that is going to be in place ... a couple years at least," he said.

Subj: Dear Bob: Comment to LDnews Article
Date: 12/22/2003 9:53:53 AM Eastern Standard Time
From: clint@leroy.com (Clint Le Roy)
To: worksntv@...

I first wrote this back on December 1st and sent it to the Newville Borough Manager who had asked the same questions and decided to go with the doomed system Lebanon is about to embark on. It does not work. This is a copy of the exact email I sent him !

“Dear Sir
  I am a RF Radio Repair Technician (currently out of a job) and an Amateur Radio Operator. Call Sign KB3EEQ, I understand your frustrations and am amused to see all those who seem to understand that the 800 system is doomed. Why because it is digital and the propagation of signal is direct rather more like a drop off then an old time signal like Analog. All Amateurs have used and appreciated analog signals for the almost amazing abilities to exist past normal broadcasting limitations. Where 800 MHz trunk systems fail quite a bit from the way the digital signal acts with natural surroundings, like hills and valleys. Analog signals can reflect off natural surroundings but 800 trunk systems cannot. Also 800 MHz systems cannot work in some metal buildings. Ma/Com was a wonderful farce with allot of trumpeting excitement with little realism. From experience in the last 20 years, I would not go much farther and return to a proven working system of analog signals and repeaters if necessary. Ask any Amateur Radio Operator and they will tell you the same as I have. I hope this helps in your decision.”

If you would like to speak to this gentleman I will give you more information if you reply to me!

Clint

596. You have $100,000 worth of radios and they don't work all the time

Yahoo group: CPMA
Date: 2004-01-07 18:10:00 UTC
From: worksntv@aol.com
Topic: 596 Message: 596

Sometimes, "we drop into an area where we have no coverage," he says. "We understood that when we went on line."

But Sherman thought the tower agreement would be in place long before now.

"It's frustrating. You have $100,000 worth of radios and they don't work all the time. The radios do work if you have the towers to support them," he says.

Middlesex police carry both the new radios and the old ones in their cruisers.

"I've got faith. I haven't given up," Sherman says. "As far as dealing with M/A-COM and Pat Slattery, their cooperation has been 100 percent."

But, he adds, "my patience is wearing thin."

From: worksntv@aol.com
Topic: 598 Message: 598

I recently spent 8 days aboard the Carnival Legend cruise ship---
http://www.carnival.com/Ships/ships.asp?select=LE
With scanner in tow here's what I found:

462.175-[unsure of use]
472.5375 [unsure of use]
468.3250 [maintenance people talking to room stewards]
467.575 [unsure of use]
457.575 [a lot of paging activity while at sea--all personnel have pocket pagers. they usually use a phone after getting paged]
457.575 [security talking to the bridge]
458.525 [unsure of use]
457.550 [cabin stewards]
469.950 [pursers]
464.275 [medical techs talking to doctor when a person in a wheel chair passed out, fell forward and literally hit the deck]
464.300 [unsure of use]
464.325 [unsure of use]

There was also comms within the ship on the Marine channels.

156.700 [bridge talking to "pilot" crew. These are the people who come aboard when approaching a port and pilot the ship to shore]

156.550 [Legend pursers]

All of these freqs are confirmed. Feel free to repost them on your favorite e mail reflectors and/or web sites.

601. scrap plans for an 800 megahertz system.

Yahoo group: CPMA
Date: 2004-01-16 13:51:35 UTC
From: worksntv@aol.com
Topic: 601 Message: 601

What I find interesting about this is 800 mhz radio vendors keep saying---"we've got to scrap VHF because there are no spare parts" Ummmm I wonder if Pa ever asked anyone to see what a VHF upgrade would cost--I figure abt 100 million compared to the system being deployed for 240 million----at last check.
Bob
==========

The law enforcement and advisory committees also decided Wednesday to scrap plans for an 800 megahertz system.
The law enforcement committee wanted an RFP for a VHF system to compare to a $4.2 million bid submitted by M/A Com Aug. 6, 2002 for the 800 megahertz system. Rufenacht said the committees felt Green County cannot afford the $4.2 million price tag and additional $250,000 in yearly maintenance fees.

ARLB003 ARRL to Propose New Entry-Level License, Code-Free HF Access

ZCZC AG03
QST de W1AW
ARRL Bulletin 3 ARLB003
>From ARRL Headquarters
Newington CT January 20, 2004
To all radio amateurs

SB QST ARL ARLB003
ARLB003 ARRL to Propose New Entry-Level License, Code-Free HF Access

The ARRL will ask the FCC to create a new entry-level Amateur Radio license
that would include HF phone privileges without requiring a Morse code test.
The League also will propose consolidating all current licensees into three
classes, retaining the Element 1 Morse requirement--now 5 WPM-only for the
highest class. The ARRL Board of Directors overwhelmingly approved the plan
January 16 during its Annual Meeting in Windsor, Connecticut. The
proposals--developed by the ARRL Executive Committee following a Board
instruction last July--are in response to changes made in Article 25 of the
international Radio Regulations at World Radiocommunication Conference 2003
(WRC-03). They would continue a process of streamlining the amateur
licensing structure that the FCC began more than five years ago but left
unfinished in the Amateur Service license restructuring Report and Order (WT
98-143) that went into effect April 15, 2000.

''Change in the Amateur Radio Service in the US, especially license
requirements and even more so when Morse is involved, has always been
emotional,'' said ARRL First Vice President Joel Harrison, W5ZN, in
presenting the Executive Committee's recommendations. ''In fact, without a
doubt, Morse is Amateur Radio's 'religious debate.'''

The entry-level license class--being called ''Novice'' for now--would
require a 25-question written exam. It would offer limited HF CW/data and
phone/image privileges on 80, 40, 15 and 10 meters as well as VHF and UHF
privileges on 6 and 2 meters and on 222-225 and 430-450 MHz. Power output

would be restricted to 100 W on 80, 40, and 15 meters and to 50 W on 10 meters and up.

''The Board sought to achieve balance in giving new Novice licensees the opportunity to sample a wider range of Amateur Radio activity than is available to current Technicians while retaining a motivation to upgrade,''
said ARRL CEO David Sumner, K1ZZ. Under the ARRL plan, current Novice licensees--now the smallest and least active group of radio amateurs--would
be grandfathered to the new entry-level class without further testing.

The middle group of licensees--Technician, Tech Plus (Technician with Element 1 credit) and General--would be merged into a new General license that also would not require a Morse examination. Current Technician and Tech
Plus license holders automatically would gain current General class privileges without additional testing. The current Element 3 General examination would remain in place for new applicants.

The Board indicated that it saw no compelling reason to change the Amateur
Extra class license requirements. The ARRL plan calls on the FCC to combine
the current Advanced and Amateur Extra class licensees into Amateur Extra,
because the technical level of the exams passed by these licensees is very
similar. New applicants for Extra would have to pass a 5 WPM Morse code examination, but the written exam would stay the same. Sumner said the Board
felt that the highest level of accomplishment should include basic Morse capability. Current Novice, Tech Plus and General licensees would receive lifetime 5 WPM Morse credit.

''This structure provides a true entry-level license with HF privileges to
promote growth in the Amateur Service,'' Harrison said.

Among other advantages, Sumner said the plan would allow new Novices to participate in HF SSB emergency nets on 75 and 40 meters as well as on the
top 100 kHz of 15 meters. The new license also could get another name, Sumner said. ''We're trying to recapture the magic of the old Novice license, but in a manner that's appropriate for the 21st century.''

The overall proposed ARRL license restructuring plan would more smoothly integrate HF spectrum privileges across the three license classes and would
incorporate the ''Novice refarming'' plan the League put forth nearly two years ago in a Petition for Rule Making (RM-10413). The FCC has not yet acted on the ARRL plan, which would alter current HF subbands.

The ARRL license restructuring design calls for no changes in privileges for
Extra and General class licensees on 160, 60, 30, 20, 17 or 12 meters.
Novice licensees would have no access to those bands.

See ''ARRL to Propose New Entry-Level License, Code-Free HF Access'' on the
ARRL Web site, www.arrl.org/news/stories/2004/01/19/1/, for the specific
subband allocations ARRL is proposing for each class. NNNN /EX

It seems to me that there is a rush on abandoning the
VHF/UHF spectrum in many of the larger metro areas.
Probably good news for the marketing company
(vendor) but I feel that those municipalities that are
being convinced that an upgrade is in order are being
pressured into the hi-tech features and hype on what
the new system could possibly deliver.

It's very frightening especially when many of these new
800MHz systems are reporting below par reliability
compared to what was experienced with the good old
fashion systems (VHF-LO/VHF/UHF) they left.

Being "duped" is not just for individuals anymore. It's all
over the news nationwide that many municipalities are
not happy with their radio communications upgrades
and all because someone or group that was responsible
for making the final decision to "switch up" was being
sold into the hype.

Unfortunately the taxpayers will eventually bear the
brunt of the financial costs as well as the added dollars
to fix the current system. It's obvious that there is NO
ACCOUTABILITY on new radio communication
deployment and/or upgrades. Once these multi-million
dollar systems are turn on, the repair and maintenance
of such systems are the sole responsibilty of the
municipality.

Today conventional (non-trunked; non-800MHz) radio communication costs are the BEST VALUE GOING! Look at the product lines being offered by Kenwood, Motorola and Vertex and see what you get for your dollar. It's a shame that many municipalities won't reconsider their options and possibly look into re-establishing their comms systems back on the VHF or UHF band.

Looks like it will get worse before they get better.

610. Is this in store for Pa's 800 Mhz system?

Yahoo group: CPMA
Date: 2004-02-03 13:51:45 UTC
From: worksntv@aol.com
Topic: 610 Message: 610

The problem centers on commercial wireless interference in the 800 MHz emergency response radio band. The leaders charge the interference puts at risk the lives of the responders and the people they seek to protect.

According to “Crisis Counselor” newsletter editor Noel L. Griese, APR, “Interference incidents have reportedly reached a critical level with nearly 1,000 cases reported in more than 30 states – and the problem continues to grow.”

I'm hearing "Harrisburg Dispatch" on 154.755 mHz in Lebanon county,
noon today.

Transmissions are about traffic accidents, etc. in the Harrisburg
area and there is a slight echo on the audio.
This is the old PSP car-to-car frequency.

My guess would be that 154.755 is repeating possibly a digitized
repeater from another frequency, where I don't know.

Anyone know what this is?

Tom, WA3REY

From: worksntv@aol.com
Topic: 619 Message: 619

Montgomery uses a community repeater from Bill's Electronics that was installed in the summer of 2003. the repeater output is 152.8775 and the input is 159.8175 PL 100.0 this is located next to the Forest and Waters tower at Shaffers path on Skyline Drive. Montgomery Police, EMA and boro workers are on this, the last i knew the fire dept was not however. They use talk around often as well instead of the repeater. The frequency of 155.940 they still have but Clinton Twp uses this as well. At some point there may be other users to be on this repeater with a different PL.

Also, he installed another community repeater that is located at Bill's site further east on Skyline Drive closer to Route 15. No one is on this as of this date but there have been a couple groups that have been on testing. One of those was the county coroner and another was my chief and myself for Hepburn Twp Fire Co. Tests worked well but since we dont have that many narrow band capable radios as both of these repeaters are for that matter we are holding off at least for now. This repeater is 152.3675 output and the input is 157.6275 with multiple PL's as the one Montgomery is using as well. Im sure there will be more to come on these 2 repeaters.

Topic: 620 Message: 620

Do any of you guys know what kind of system Bucks county is running. My local department here on Long Island is specing out a new system, I hope one of the current trunk-trackers will be able to monitor it. Here's the press release.

Nassau County Police Department Radio and Data Communication Project
NOTICE TO ALL INTERESTED PROPOSERS
NASSAU COUNTY RADIO PROJECT

Update on RFP Release
Release of the RFP is expected to be mid March 2004

NOTICE TO POTENTIAL PROPOSERS□SYSTEM DEMOS
JANUARY 23, 2004

In order to better understand the performance of currently available trunked radio equipment in the 500 to 506 MHz frequency band, Nassau County will be evaluating a single site trunked radio system that will shortly be temporarily installed in Nassau County.

Nassau County will also be evaluating an existing trunked, 500 to 506 MHz, radio system currently in use by a public safety agency in Bucks County, PA.

The results of these evaluations will help Nassau County to better understand the capabilities of current, state-of-the-art 500 to 506 MHz trunked LMR systems.

Any questions or comments should be made via email to
radioproposal@...
NASSAU COUNTY RADIO PROJECT
NOTICE TO POTENTIAL PROPOSERS□SITE VISITS

JANUARY 23, 2004

Due to the tight time schedule required to procure and implement a new state-of-the-art Land Mobile Radio System, Nassau County has decided to allow potential proposers to begin site visits as early as 01/27/04. Interested parties should make a request via email to radioproposal@... , as soon as possible, with: 1) a list of potential radio sites that they wish to visit, and 2) a recommended visitation schedule.
Mission

To implement a wireless communication system that provides seamless coverage throughout Nassau County, While maintaining interoperability with agencies within and outside the county

Objective
To provide a seamless. coordinated, and integrated communication system to serve the county's mission in serving and protecting life and property

Register
In order to receive more information regarding this procurement, interested parties should register their contact information by clicking here
http://www.police.co.nassau.ny.us/radioproject.htm

627. Attn: Lower Luzerne Co, Pa

Yahoo group: CPMA
Date: 2004-03-09 13:45:23 UTC
From: worksntv@aol.com
Topic: 627 Message: 627

Several members from Suburban Mutual Aid and White Haven Fire Company met at the Luzerne County 911 Center with Joe Scheff and Jim Urban from the center and walked away knowing we had a very productive meeting. The main topic of discussion was improving communications in the lower portion of Luzerne County. This could be accomplished by converting the Suburban Mutual Aid - 154.325 simplex frequency into a repeater. Some of the license holders of the 154.325 frequency have agreed to re-assign their rights to the frequency over to Luzerne County. The other license holders will (hopefully) agree to do the same. LC will do all the necessary FCC ULS filings.

Making this a repeater will greatly improve inter-agency communications as well as communications back to LC911. Along with the new input frequency a PL change will also take place to help eliminate some of the interference that is on 4.325 now. One of the hurtles will be coordinating the programming of all the fire/ems radios. This needs to be done in a very short time as once the new repeater is 'on the air', no one will be able to talk to county until their radios are programmed. One way of accomplishing this is to have the radios pre-programmed with the new frequency and not use it until the county give the go ahead.

Also, the new ALL county paging frequency (157.45) will be operational this late summer / early fall. They are waiting for some additional equipment to arrive and as soon as that happens, the new CAD (Computer Aided Dispatch) system will be installed. The paging transmitters are all in place except for White Haven. They are waiting for the new tower to be erected. (mid to late summer). The new system will be a single tone out with no talk back. Talk back will be on the assigned frequency for the respective departments. < Suburban, Fire North, Fire East, Fire West, Back Mountain, ect>

All in all it was a very good meeting and there are a few bugs, but nothing that can't be worked out.

634. another digital sell

Yahoo group: CPMA
Date: 2004-04-06 12:49:32 UTC
From: worksntv@aol.com
Topic: 634 Message: 634

What amazes me is the fact that the lack of "parts" seems to be a theme which is used time and time again to sell 800 mhz systems.
Most of the countys in Northeastern Pa are VHF, some agencies have dumped 800 mhz and gone back to VHF because of problems....Those agencies don't seem to have a problem with finding "parts" for their VHF systems.
Bob
==========

An impending conversion from an analog to digital city radio system could cost $14 million and impact how soon Aurora takes a serious look at building a new police headquarters.Aurora officials have been notified by Motorola that the city's current analog radio system — used by the police, fire and public works departments — is quickly becoming obsolete. Because technology is advancing so fast, the firm can't promise Aurora that the current equipment will be easily supportable.

Has anyone heard if this is a problem with the "Open Sky" system which has gone online in Pa??

Bob
==========

It's a national problem made much worse by cellular phone interference: The cell towers are more prevalent and powerful, and drown out the weaker signals of the region's 800 megahertz emergency radio system.Rush hours are particularly bad for emergency communication.

Appleby should know, having spearheaded Pennsylvania's statewide radio system based on M/A-COM's OpenSky technology. But Appleby understands the skepticism, which is what caused him to send employees to M/A-COM in the late 1990s to see if the company's bid for the Pennsylvania project was just “smoke and mirrors” that looked better on paper than it would in practice. M/A-COM got the contract after proving its system “was real,” Appleby said.

Anyway, to elaborate a little bit on the turnpike (mileposts approximate):

District 1
MP 0-110
Dispatch: 159.045
PSP Gibsonia (T1)
PSP New Stanton (T2)
Maintenance Sheds:
Western Regional Office/Homewood
Gibsonia
Harrison City
Greensburg
Jefferson
Donegal

District 2
MP 110-201
Dispatch: 159.075
PSP Somerset (T3)
PSP Everett (T4)
Maintenance Sheds:
Somerset
Kegg
Allegheny Tunnel
Everett
Burnt Cabins
Tuscarora Tunnel
Blue Mtn./Kittatinny Tunnel

District 3
MP 201-298
Dispatch: 159.045
PSP Newville (T5)
PSP Bowmansville (T6)
Maintenance Sheds:
Newville
New Cumberland
Mt. Gretna
Bowmansville

District 4
MP 298-359
MP 20-41 (NE Extension)
PSP Bowansville (T6)
PSP King of Prussia (T7)
Maintenance Sheds:

Devault
Eastern Regional Office/Plymouth Meeting
Trevose

District 5
MP 41-131 (NE Extension)
Dispatch: 159.045
PSP Pocono Station (T8)
Quakertown
Slatington
Lehigh Tunnel
Pocono
Wyoming

The "T" numbers are found on the front quarter panel of the PSP patrol vehicle,
next to the vehicle number. The vehicle number would be what you are hearing when they call on the radio (i.e. Somerset 5 would be the vehicle marked with T3 5). Of course, there are also unmarked cars that they use, but they follow the same pattern, just without the visible markings on the vehicle.

Out in the east (from Newville through KoP and Pocono), PSP patrols routinely refer to "zones". The zones are patrol zones. "99" would be the roving car not assigned to a specific patrol zone. The other numbers would refer to a specific zone that makes up a portion of the overall patrol territory for that station. I do not know what all the zone numbers are for each station. King of Prussia uses the following:

20 - east/west MP 298 to MP 312
21 - east/west MP 312 to MP 326
22 - east/west MP 326 to MP 343
23 - east/west MP 343 to MP 359
24 - north/south MP 20 to MP 38
25 - north/south MP 38 to MP 57.4
99 - unassigned roving patrol

Bowmansville uses 17, 18, and 19 for their zone designations. I'm not sure on the MP limits of each.

Maintenance sheds have gone to a "plain speak" system over much of the turnpike
(maybe all of it buy now? I don't go west of Carlisle.). Whereas you used to hear 3103 or 3104 for the Newville Shed supervisors, you'll now hear them call out as Newville 41 or Newville 42. As with the PSP patrols, each maint. facility has its own designated coverage area. The "Shedname"-100 ID is the primary responder vehicle for accidents and whatnot.

PTC vehicles (not PSP Troop T) use the following:

0001-0999 - Misc. Harrisburg Admin. (HQ)
3600-3699 - PTC Pool Vehicles
5100-6199 - District 1 Administrative Personnel

5200-6299 - District 2 Administrative Personnel
5300-6399 - District 3 Administrative Personnel
5400-6499 - District 4 Administrative Personnel
5500-6599 - District 5 Administrative Personnel
7000-7999 - Off Turnpike Fire/EMS Vehicles
8000-8999 - Off Turnpike Authorized Tow Services
9100-9199 - District 1 Call Box/Radio Maint., TRANSCORE
9200-9299 - District 2 Call Box/Radio Maint., TRANSCORE
9300-9399 - District 3 Call Box/Radio Maint., TRANSCORE
9400-9499 - District 4 Call Box/Radio Maint., TRANSCORE
9500-9599 - District 5 Call Box/Radio Maint., TRANSCORE
9600-9699 - Misc TRANSCORE Call Box/Radio Maint. Staff
Shed Name-41 - Foreman
Shed Name-42 - Asst. Foreman
Shed Name-43 - Asst. Foreman
Shed Name-4x - Misc. Pick-up Trucks
Shed Name-5x - Misc. Stake-body or Crew-cab Trucks
Shed Name-100 - First Responder Vehicle
Shed Name-1xx - Misc. Heavy Equip. (dumps, etc.)
Shed Name-2xx - Misc. Trades (electricians, etc.)
Shed Name-800 - Auto Equip. Supervisor

House Republican Communications
(717) 787-3993

FOR IMMEDIATE RELEASE

April 22, 2004

Lewis, Browne Request Audit and Review

Of Statewide Radio System Project

Original Price Tag of $179 million now exceeds $400 million

HARRISBURG – Two members of the House Finance Committee and House Judiciary Committee requested an audit and review of the beleaguered statewide radio system project, which remains three years behind schedule.

Rep Browne stated, “In 1996 the Commonwealth budgeted $179 million to fund the statewide radio system project. In the spring of 1999, the contracts for the statewide radio system were awarded and scheduled to be installed, tested, and operational by April 2001. Cost overruns and delays continue to plague the project and we believe a thorough audit and review is reasonable and warranted.

Rep Lewis added, “Today, we ask the Administration, the Auditor General and the Attorney General to audit and review the statewide radio system project for good reason. Recent testimony at the House Appropriations committee indicated the total project costs now exceed $400 million. To date, the project is over $220 million over-budget and three years behind schedule. I’m very concerned that a project of this size and importance has languished for so long and for so many taxpayer dollars.”

Four vendors were awarded components of the overall statewide radio project. M/A Com received the largest portion of the contract, which includes installation of the radio system using their OpenSky technology.

Lewis, and Browne, who are both lawyers and accountants, indicate the complexity of the interdepartmental accounting, the implementation delays in the radio system implementation and the rapid changes of available technology warrant

a thorough audit and review of this situation.

Rep Lewis continued, “I’ve heard and read from several public safety leaders that the proposed statewide radio system won’t work as planned and will continue to experience cost-overruns, delays and coverage shortfalls. Several experts question the use of 800 MHz technology and its growing interference difficulties. While I have a proven record of supporting and encouraging high technology investments by local, county and state governments, I’m very concerned that we aren’t headed in the right direction with the statewide radio system project.”

Rep Browne concluded, “Obviously, Pennsylvania public safety requires a modern telecommunications system for law enforcement and related agencies to communicate and I believe that was one of the main reasons to commence the statewide radio system project. However, I share concerns about the costs, delays and technology shortfalls. We can’t afford to squander an opportunity to get to the bottom of this situation as soon as possible.”

In September 2003, Rohn Industries, Inc., the company responsible for constructing the 800 Mhz radio tower sites filed for Chapter 11 bankruptcy protection. Recently, several industry reports are questioning the effectiveness and interference blackouts of public safety agency radio systems using 800 Mhz frequency radio systems.

I spoke with Rep Lewis Friday--Despite the meeting Lewis is still pushing for a performance audit by the Pa Auditor General..Performance audits just don't say how much money was taken in and how much was spent. It's a detailed investigation of how/why decisions were made and if tax dollars were misspent and/or if contracts were awarded properly.
Bob

Reps. Pat Browne (R-Lehigh/Northampton) and Kelly Lewis (R-Monroe/Pike) met with leaders of the Statewide Public Safety Radio System (SPSRS) project this week to discuss ways to complete the SPSRS Project in a timely fashion, address past concerns and costs, forecast future costs and develop a game plan to finish the public safety radio system in Pennsylvania

648. Pa's 800 Mhz system and the Auditor General

Yahoo group: CPMA
Date: 2004-05-30 15:07:13 UTC
From: worksntv@aol.com
Topic: 648 Message: 648

Here's the latest on requests for the Pa's Auditor General to conduct a performance audit of the 800mhz Ma/Com system.

For background after State Rep Kelly Lewis and Pat Browne started questioning the technology of Open Sky and the cost overruns [40 million dollars] and delays [3 years] they called for the Auditor General to conduct the audit. A performance audit is NOT "so many dollars taken in and so many spent" It is a detailed investigative look from top to bottom as to how the contractor got the contract--what steps were taken to insure the company followed the instructions needed to get the contract and a follow though on how state employees interacted with the contractor. If wrongdoing is found there have been some audits which have been forwarded to the State Attorney General for possible criminal investigation.

The following info is gleaned from a letter signed by the AG Bob Casey to the Deputy Secretary of Information Technology Arthur Stevens.
The state after getting pressure about the system decided to spend more money. It hired IXP Corporation of NJ. http://www.ixpcorp.com/
The following is a list of dollars per hour possibly involved. The following is from the state of New York and there was some kind of contract between IXP and NY.
http://www.ogs.state.ny.us/asp/purchase/snt/consulting/CompanyDetail.asp?Customer_ID=426

IXP Corporation will look at "an independent assessment of the [systems] current status, and whether the project is properly positioned for near term completion in the most efficient and cost effective manner possible.
http://www.pahousegop.com/index.cfm?ContentID=3952&ParentID=117&SectionID=218&SectionTree=89,117,218&lnk=b&ItemID=3926

The Auditor General in effect has decided to postpone opening an audit until it sees the results of the IXP audit. The AG also has sent a list of 9 questions to the state that he wants answered:

Many of the questions involve how the state chose Rohn Corporation for the tower work. In one question the AG asks why the state said in December 2002: Rohn's contract would be substantially complete by January 2003 and the state told Rohn to close it's project office in Harrisburg. However as of May 2004 tower site construction is still imcomplete and here's the important part:"that current coverage concerns" are a result of Rohn's filing bankruptcy in the summer of 2003. The AG wants to know how the state can report the tower erection would be complete by January 2003[before the Rohn bankruptsy] and then the company folds in the summer of 2003.

The state contract calls for 95 per cent PER COUNTY. The state has reported to the AG that "significant coverage" has been achieved in all but six

counties. The AG wants to know what "significant coverage" means and asks for the actual coverage now available in ALL 67 counties.

Here are some other questions that some would ask:

Why was Ma/Com chosen when it does not have a fully operational statewide public safety system in place anywhere in the U.S.

Why is the state allowing a system which has a "modulation format" which is not the national standard, APCO Project 25.

Why, according to those with inside information, have some of the tower sites been eliminated and replaced by small lower powered cell sites. Most of the these cell sites are in remote locations, tied into the main system using phone lines. If the phone lines go down from wx related incidents, wind, snow, ice---then a Trooper trying to radio for help, assistance etc. has no communications.

Why according to one State Trooper and another technical source does the current system, as currently deployed: does NOT allow car to car coverage. There is currently no talk group for that. Many times under the current system a trooper will see a fellow trooper pulled alongside the road [traffic stop etc.] Trooper A will ask Trooper B "is everything OK--do you need assistance?" This is done on one of three VHF tac/mobile to mobile channels.
I am told this is an officer safety issue and once/if the state "accepts" the 800 MHz system--that inability to talk mobile to mobile will probably be eliminated when Troopers find the car to car coverage is not available. This information is spreading word of mouth among the rank and file. I asked one high ranking Trooper when his station will be using the 800 MHz system for voice. He actually started to laugh and then told me the story about the lack of car to car coverage.

Any questions/comments? Feel free to post them here.

Bob

649. Letter from the Auditor General

From: worksntv@aol.com
Topic: 649 Message: 649

I am posting the letter from the Auditor General to Rep. Kelly Lewis and a letter from the AG to the state asking specfic questions about the 800 Mhz system.

Bob

Department of the Auditor General

Commonwealth of Pennsylvania

Harrisburg, I'eniisylvnnia 171204)018

May25, 2004

The Honorable Kelly Lewis

State Representative

gg;h Legislative District

Room 1498 East Wing

House Box 202020

l-lastisburg, Pennsylvania 17120

Dear Representative Lewis:

Thank you for your letter of May 4. 7004 in which you requested that the Department of the Auditor General conduct an audit of the Commonwealth's project to build a new state-of-the-art Statewide Public Safety Digital Radio Systern (SPSRS).

As you are aware, the Office of Administration issued a press release on May 12. 2O04, indicating that the Commonwealth had retained IXP Corp. to conduct an independent assessment of the SPSRS' current status and whether the project is properly positioned for near term completion in the most efficient and cost effective manner possible. In addition, the press release stated that IXP Corp. will examine, as part of its assessment. concerns raised by you and Representative Pat Browne about the level of resources necessary to ensure interoperability between the Commonwealth's SPSRS and county and local systems.

Based on the Office of Administration's action, we have decided to refrain from commencing a formal audit of the project at this time. However, we will examine the results of the IXP Corp.'s assessment and re-evaluate the need for future audits. We have also requested additional information from the Office of Administration about the status of the project. Enclosed is a copy of that correspondence.

We will keep you and Representative Browne apprised of any further action the Department of the Auditor General takes after IXP Corp. completes its assessment. T

Thank you for bringing your concerns about the project to my attention. Please do not hesitate to contact Sandy Williams or me at (717) 787-2543 should you have any further questions concerning this issue.

Sincerely.

Robert P. Casey, Jr.
Auditor General

I posted the following letter eariler--however this time I've added the list of questions the Pa Auditor General's Office has of state officials concerning the 800 Mhz system.
Bob

May 25, 2004

Mr. Arthur Stephens
Deputy Secretary for Information Technology
Office of Administration
Room 209 Finance Building
Harrisburg. Pennsylvania 17120

Dear Mr Stephens:

As you are probably aware, the Department of the Auditor General has recently received requests from state legislators to conduct an audit of the Ccrmnonwealth's project to build a new state-of-the-art Statewide Public Safety Digital Radio System (SPSRS).

The Office of Administration issued a press release on May 12. 2004. indicating that the Commonmwealth had retained IXP Corp. to conduct an independent assessment of the SPSRS current status and whether the project is properly positioned for near term compleation in the most efficient and cost-effective manner possible. In addition. the press release stated that iXP Corp. will examine, as part of its assessment, concerns raised by State Representatives Kelly Lewis and Pat Browne about the level of resources necessary to ensure interoperability between the Commonwealth’s SFSRS and county and local systems.

To prevent audit duplication and reduce audit imposition on Office of Administration
staff. we have decided to refrain from commencing a formal audit of SPSRS at this time. However, we will use information reported by IXP Corn. to determine whether to commence an audit in the future. Toward this end, we request that you provide us with copies of all reports and work products issued to the Commmonwealth by IXP Corp..

In addition and in the interim, we are requesting that the Office of Administration provide us answers to the enclosed list of questions about the SPSRS project. These questions will update similar information provided to the Department of the Auditor General by former Secretary of Administration Martin Horn and former Acting Secretary of Administration Charles Gethards in letters dated October 16. 2002 and December 6, 2002. respectively. Please provide the information requested by June 16. 2004.

Thank you in advance for your cooperation in providing the information requested if you have any questions or need additional information

concerning this requested.

Sincerely,

Tern Kostoff. CPA

##

Statewide Public Safety Radio System -- Questions

1. In December 2002, then Acting Secretary of Administration Charles F. Gerhards reported that Rohn's contract would be substantially complete by the close of tower site construction in January [2003]; that Rohn had "been advised to close their project office in Harrisburg at the end of January; and that "the final acceptance process will continue until March or April 2003." (CA December 6, 2002, Response to Auditor General)

Recently however, on May 6, 2004, Rendell Administration officials reported that tower site construction was still ongoing into the summer of 2003 and that current coverage concerns are the result of Rohn's inability to continue construction past that time due to its filing for bankruptcy protection in late summer of 2003. (Statewide Public Safety Radio System Update from Arthur C. Stephens. Keith Martin and David Sanko, "SPSRS Update")

A. What were the changed circumstances that delayed the close of tower site construction beyond January 2003 (as projected by Secretary Gerhards on December 6, 2002) and resulted in tower construction remaining incomplete into the summer of 2003 when Rohn filed for bankrupsy? When were Rendell Administration officials made aware of these changed circumstances?

B Did Rohn close their project office in Harrisburg at the end of January 2003. If not, when did this office close?

2. According to the SPSRS Update, even though coverage still remains less than the final design requirement of 95 percent by county, "significant coverage" has now been achieved in all but six counties, Please indicate what level of coverage constitutes "significant covcrage." Please provide the actual coverage levels currently achieved in all 67 counties.

3. According to the SPSRS Update, 19 counties are projected to exceed the required 95 percent coverage level by the end of June 2004. Please iden these 19 counties. Please indicate projected coverage levels for all 67 counties as of June 2004.

4. According to the SPSRS Update, "the system requirement of 95 percent coverage by land area by county is unchanged from the original requirement" Also according to the SPSRS Update, the Rendell Administration "hopes" for a prompt resolution of the Rohn issue, with the result being coverage statewide improving to exceed 90 percent by the end of this calendar year."

A. Assuming a prompt resolution of the Rohn issue is achieved, what coverage level are currently projected on a county—by-county basis for We end of calendar year 2004?

B. Assuming a prompt resolution of the Rohn issue is achieved, at what point in time does the Rendel! Administration expect that the original system requirement of 95 percent coverage by land area by county will be met?

C. Assuming a prompt resolution of the Robin issue is not achieved, what levels of coverage are projected on a county-by-county basis for the end of calendar year 2004?

According to the SPSRS Update, while the original project plan called for each state agency to plan and execute its own transition to the new statewide system, “it became apparent,” as actual transitions began, that “a much higher degree of support was warranted.”

A. At what point in time did the need for a higher degree of transitional support first become apparent?

B. What contractors and/or offices of state government will be providing this higher degree of transition support?

C. How much money has already been spent and/or is currently being budgeted to pay any additional unanticipated costs associated with this higher degree of transition support? Please provide these figures on an agency-by-agency basis.

D. How much money was budgeted or projected to be necessary at the inception of the project for each participating state agency to plan and execute its own transition from its legacy radio system to the new statewide system? Please provide these budgeted or projected amounts on an agency-by-agency basis.

6. Please provide budgeted amounts and actual expenditures to date for each of the following items which the SPSRS Update identifies as being included itt the “well over $400 million.. . value of total investment in wireless system infrastructure in Pennsylvania”:

A. Investment in the State Police’s Integrated Information Management System.

B. The “Commonwealth’s.. .previously planned and identified operating expenses.

C. The “value of county, local government and commission wireless infrastructures.

D. The “value of non-governmental infrrstructures owned by such partners as First Energy that is used in the construction and operation of the system.”

7. What is the composition of the payments made through April 30, 2004 for the contracts, including contract amendments, with Alcatel USA. M/A-COM Inc., Rohn Construction Inc., and KCC Consultants Inc. as they relate to the contractuaL terms br making payments? For example, Rider E to the MA/COM Inc. contract calls for payments to be made based upon certain tasks or actions being completed. There are 15 items listed in this Rider. For each contractor, identify the items and amount paid for those items that comprise the total paid to the contractor as of April 30, 2004.

8. If other contractors were engaged for this project in addition to those listed in Question 7, please provide the same information for these contractors as for the contractors listed in Question 7. In addition, please provide the names, contract number, contract amount and appropriation symbol for all contracts with these other contractors,

9. What, if any. impact (monetary or operational) will the state’s current delay in implementing the new Public Safety Digital Radio System have on county and local governments?

657. more problems with Pa's system

Yahoo group: CPMA
Date: 2004-06-27 15:28:19 UTC
From: worksntv@aol.com
Topic: 657 Message: 657

The following note comes from someone who has "inside" knowledge of Pa's 800 MHz system.
He's asked not to be identified fearing retaliation from the power brokers.

Regards,

Bob Reynolds
==========

Just had to reply to your posting this morning. I guess the item you reference may seem like a broad statement, but it is reference to the M/A Com OpenSky technology. It is a fact that there are no OpenSky systems that are fully installed and accepted anywhere. None are in any full-time active day to day use as the primary radio for any of their rather few sold systems.
On the PA system, despite the project office claims that there are users on the PA system, inputs from the users we speak to indicate that very few are using it as their "Mission Critical" means of communications. For example, PSP has around 1000 radios operating as data only and considers this use as non Mission critical. If they run a data inquiry and it doesn't go through, they pick up the mic on their existing 25 year old VHF radio and call it in as they always have. In fact, because PSP now realizes the system will still not be ready for Mission Critical use at the end of the year, they just gave their IIMS contractor (Lockheed) a change order of around $90K - $100K to interface the VHF system into the new Consolidated Dispatch Center in Norristown, slated to go online in December. The change order is needed because the original plan was to have the OpenSky system running by then, and the assumption was the VHF would not be in use by then.

658. more on Pa's 800 Mhz system woes

Yahoo group: CPMA
Date: 2004-06-27 16:28:09 UTC
From: worksntv@aol.com
Topic: 658 Message: 658

Three miles up a narrow gravel road in central Pennsylvania, a fenced-in radio tower atop a mountain represents a critical link in a $240 million public safety communications network the state began work on eight years ago.
Below the tower, a simple building contains racks of sophisticated electronics, the guts of a system designed to tie together 22 state agencies in a single centralized radio network.
Critics say replacing the state government's hodgepodge of largely incompatible radio systems has already taken too long and cost too much. Questions also remain about whether the system will work properly.

662. letter from Rendell Adminstration to lawmakers on 800 Mhz

Yahoo group: CPMA
Date: 2004-07-02 12:44:27 UTC
From: worksntv@aol.com
Topic: 662 Message: 662

Text of June 21 letter.

Dear [lawmaker]:

Recently, you may have received an unsigned, unattributed flyer entitled "Another Missed Deadline." The Bravo Group, public affairs and communications firm has admitted to distributing the flyer. They did so in relation, to the Statewide Public Safety Digital Radio System Project (the "Project"). The flyer asks the Legislature to demand that the Administration "answer the Auditor General's concerns over a project that is 3 years late, $200 million over budget and does not currently work". The Administration is disappointed by this flyer. Not only was it inaccurate, it asked you take certain action based on false information. To be blunt, it took us all for granted. Timely and truthful and trustworthy information is, in my opinion, the most important tool you have in representing the best interests of your constituents. The Bravo group failed you in that regard. We will not. The purpose of this letter is, as Paul Harvey would say, to give you "the rest of the story." First, the Administration has taken steps to address the concers raised by Representatives Lewis and Brown [sic], as well as Auditor General Casey, about the Project. The Administration has contracted with iXP Corp., a nationally recognized public safety and emergency communications consulting company, to conduct an independent assessment of the Project. Specifically, iXP has been tasked to determine whether the Project is positioned for near term completion in the most efficient and cost effective manner possible. We anticipate receiving a formal report from iXP in early August. As noted in the attached June 14, 2004 correspondence to the Auditor General's Office, the Administration expects that the Auditor General's questions will be addressed through the iXP report. If the questions are not addressed in that report, the Administration will prepare an additional response at that time. In the interim, the Administration has scheduled a meeting with the Auditor General to update his Office on the Project's status. Second, the project is NOT $200 million over budget. As previously communicated in the attached May 6, 2004 memorandum from Deputy Secretary Arthur Stephens, Homeland Security Director Keith Martin, and PEMA Director David Sanko, the estimated cost for completion of the project is $240 million, or $18 million over budget. The Bravo Group flyer further states that the project is $200 million over budget and that we will be asking for additional money from the Legislature to bring the Project to completion. At this time there is no expectation that the Administration will seek additional funding from the Legislature for the project. Third, the svstem is working. The Bravo Group flyer states that the system does not currently work. This is not true. The system is currently in use by State Police for data transmissions and is in use by multiple agencies for voice communication. As stated in the May 6th Memorandum, there are coverage issues that the Project is addressing that will expand usage of the system, but to state that the system does not currently work is not accurate. Fourth, the Rendell Administration inherited this project. The Rendell Administration did not

conceive the Project or select its vendors. Rather, the Project was inherited from the Ridge Administration after three quarters of the Project's budget had been expended. Regardless, this Administration is committed to completing the Project as quickly as possible in the best interests of both public safety and the taxpayers. Inaccurate attacks on this critical public safety initiative for big retainers or corporate financial gain are not what the Project needs to reach completion. Instead, the Project requires that the Administration, Legislature and all public safety stakeholders work together in a cooperative fashion. Inasmuch as Motorola serves many of our county and local government partners, the Administration looks forward to working in a cooperative fashion with that company as well. This Administration is committed to sharing accurate and trustworthy information to members of the General Assembly. We would be pleased to share the iXP report with any of you. If you have any questions or concerns about this matter, please contact myself, or the Governor's Deputy Chief of Staff, Adrian R. King, Jr. Thank you for your thoughtful attention to this important public safety issue.

Sincerely, [signed] Steven Crawford
Secretary of Legislative Affairs

Reply-to: PRO95@yahoogroups.com
To: PRO95@yahoogroups.com

Thought id let u guys know, if you use win95 and program a channel to 20mhz (normally out of the scanners range) you can pick up shortwave communications!!!. I used about 50 feet of phone cord with all 4 wires twisted togeather to make an antenna and tied from my housse to a tree in my back yard. once you go to the channel you programed to 20mhz hit "func tune" and you will be able to search down. i picked up about 10 different channels in the 16-18 mhz range that were in all sorts of different languages so i know they were from FAR away. the scanner didnt seem to find much below 16mhz. not sure if its caouse i need a longer antenna(if you can call phone line that) or if the scanner just wont pick it up. anybody else had luck on the lower (15mhz and down)communications???

Subject: Re: 99 channel radios

Ben:

I am curious about your "I am holding my breath" remark on Open Sky....
Do
you have a similar map or any info on what has been made operational and
what is still to be done ?

I am asking because last year I visited the very first Open Sky
deployment
at OCTA (Orange County Transportation Authority), near LA and it
appeared
that they were still not ready after many years with the project under
way.
If I recall correctly, they were still using Motorola hand helds because
the Open Sky units were not working they way they were expected, and the
vehicle mounted units apparently were reported to have low selectivity
parameters.

I had been a great enthusiast of Open Sky, the last time I met with Don
Appleby, the program manager in PA was at the APCO show in Denver four
years ago and he was delighted with the upcoming program at the time. I
also know the folks who designed the system (almost neighbours) and have
great respect for their technical team.

http://www.philly.com/mld/philly/news/local/9321879.htm?1c
By Charles Sheehan

Associated Press

PITTSBURGH - State lawmakers in Pennsylvania yesterday questioned whether a state-of-the-art communications network authorized in 1996 might now be outdated and inadequate.

That network, the Statewide Public Safety Radio System, is several years overdue, although much of it is in place. It is under increasing scrutiny for its cost and usefulness to first responders.

Commissioners from four counties told lawmakers at a hearing yesterday that they would not be linking up to the state system any time soon, mostly because of the cost.

"I can't ask fire departments that have trouble keeping their doors open to buy all this new equipment," said Jim Scahill, an Armstrong County commissioner.

The communications network was initially designed to link a limited number of government agencies. That changed after the Sept. 11, 2001, terrorist attacks, with the focus shifting to first responders and their ability to communicate with one another and with state agencies in a crisis.

However, authorized in 1996 at a cost of $179 million, the system has technical limitations that could exclude a number of first responders, largely because of bandwidth issues, said Art Stephens, a deputy secretary for information technology in the state's Office of Administration.

The Rendell administration awarded a $96,000 contract last month to iXP Corp., a consulting firm, to determine whether those barriers could be overcome, how much overcoming them would cost, and why the project, scheduled for completion in 2001, was still not done.

State officials said yesterday that the report should be completed in about two weeks.

Much of the delay has been outside the control of the state, Stephens said. A company awarded a contract to build radio towers filed for bankruptcy, halting construction for nine months, he said.

The system now is expected to cost at least $240 million. That figure excludes a $134 million data system being implemented by state police and separate but related contracts for mobile radios that also run into the millions.

678. Lawmakers question setup of Pa. emergency communication system

Yahoo group: CPMA
Date: 2004-08-07 14:24:11 UTC
From: worksntv@aol.com
Topic: 678 Message: 678

I believe the author is a non technical person. I think he's confusing true "bandwidth" with Frequency allocations. Did anyone here attend the hearing? Is it possible even in the 800 MHz range that Pa did not apply to the FCC for enough allocations to run more talk groups?
Bob
==========

PITTSBURGH (AP) - State lawmakers questioned whether requirements for public safety have been raised to such a high level that a state-of-the-art communications network authorized in 1996 might now be outdated.
That network, the Statewide Public Safety Radio System, is already several years overdue and under increasing scrutiny for its cost.
Commissioners from four counties told lawmakers Wednesday in Pittsburgh that they would not be linking up to the state system anytime soon, mostly because of the cost.
The statewide radio network was initially designed to link a limited number of government agencies. That changed after September 11th when the focus shifted to first responders and their ability to communicate with each other and with state agencies during a crisis.
One of the biggest technical hurdles remains the bandwidth available in a number of counties.

679. more costs for Pa's 800 Mhz system

Yahoo group: CPMA
Date: 2004-08-08 16:33:13 UTC
From: worksntv@aol.com
Topic: 679 Message: 679

I obtained a copy of the contract between the state and the IXP Corp of New Jersey.

As you know because of all the questions raised concerning the 800 MHz system being overbudget, being 4 years late, worries about coverage, and that it's not APCO 25 compatible, IXP was hired and will be paid nearly 96 thousand dollars to study what Pa officials have done so far to "roll out" the system.

One of the things those in charge of the system have admitted that the costs have risen from 179 million to 220 million. The IXP contract says that cost has risen again by 17 million dollars bringing the total to just under 240 million.
That additional 17 million was, according to the documents, for "site construction issues". Thats after getting 43 million more 5 years ago for "site construction"

By the way--that does NOT include the costs of the radios--which has an average price of three grand.

Just some info FYI.

Bob

686. a report on VP's visit

Yahoo group: CPMA
Date: 2004-08-26 14:07:36 UTC
From: worksntv@aol.com
Topic: 686 Message: 686

Here's a brief description of the comms on the vist this week to Pottsville, Pa of VP Dick Cheney.

Secret Service was running simplex on 165.375, all comms scrambled. But it was still possible to track what was going on..ALL law enforcement, Pottsville PD, Sheriff's Office, Secret Service, Pa State Police were on 155.475. That included comms as the Bush/Cheney bus entered and left the area.

A command post was set up inside of the school.

Pottsville's street dept freq 151.415 was also used--but that was mainly road crews setting up barricades ;-)

Hope this helps for the future.

711. Reminder - CPMA Monthly Meeting

Yahoo group: CPMA
Date: 2004-11-14 18:02:09 UTC
From: CPMA@yahoogroups.com
Topic: 97 Message: 711

We would like to remind you of this upcoming event.

CPMA Monthly Meeting

Date: Sunday, November 21, 2004
Time: 1:00PM - 3:00PM EST (GMT-05:00)

Monthly meeting of the CPMA will be held at the White Rose
Senior Center, 1059 Kelly Drive, in York.

712. CPMA Monthly Meeting

Yahoo group: CPMA
Date: 2004-11-14 20:34:23 UTC
From: SteveH
Topic: 97 Message: 712

Who is going to be at the next meeting? If there is enough interest I will
bring my new
QRP IC-703 transceiver to demo. It also makes a nice shortwave radio with
the built in
DSP filter and auto notch filter.

Steve

I'll be there, Steve.

I left a message for the other Steve (ne was taking a nap!) ....
hopefully the Mrs. will encourage him to attend.

716. New website for all Public Safety Radio monitoring.

Yahoo group: CPMA
Date: 2004-12-05 20:24:25 UTC
From: Peter C. Kirk
Topic: 716 Message: 716

Would like to invite all members to please check out my new project.

A website for all scanner and radio monitoring of Public Safety radio systems in PA.

Simple registration is required.

This is a work in progress, but you can begin posting News and related Items, you can post in the forums, you can setup polls, add links, add download files that pertain to the programming and control of scanners or radio's.

Several staff / admin jobs are available.

Working on adding, Live chat, Database system, Photo Gallery, a Non YahooGroups Based Mailing list.. & much more!

http://www.scan-pa.com

Thanks...

From: DICK
Topic: 717 Message: 717

A news letter from the Office for Information
Technology, vol 1 number 2 contains a reference
to a full 71 page report on the radio system.

http://www.oit.state.pa.us/oaoit/cwp/view.asp?Q=193651&A=653

The 71 page report is listed as iXP report. It
makes interesting reading.
Merry Christmas DICK

Actually folks, we decided to cancel thwe December meeting due to it's proximity to the holidays.

Last month's meeting was the first meeting with decent attendance in a while. We decided to try to regroup at the January meeting.

Happy holidays everyone!

Greg

726. CHARGE: FCC has dragged heels for two years

Yahoo group: CPMA
Date: 2005-02-23 17:28:30 UTC
From: worksntv@aol.com
Topic: 726 Message: 726

Leaders representing emergency responders charge that Federal Communications Commission has dragged heels for two years, failing to resolve emergency communication problem. According to a story in the February issue of Anvil Publishers' Crisis Counselor newsletter, fire and police leaders are charging the Federal Communications Commission with negligence in its failure to remedy emergency radio communication problems that threaten the lives of emergency responders and the people they seek to help. The problem centers on commercial wireless interference in the 800 MHz emergency response radio band. The leaders charge the interference puts at risk the lives of the responders and the people they seek to protect.

727. Uniden 785d

Yahoo group: CPMA
Date: 2005-03-05 22:23:17 UTC
From: worksntv@aol.com
Topic: 727 Message: 727

I am looking for some advise/input.
I just bought a Uniden 785d without the digital card....I programmed it with Butel ARC250 software...but do NOT run the scanner with the program.

There are about 50 percent of the freqs that I plugged in hsvr pl's/dpl's. I also programmed in Alpha tags for just about all of the frequencies. All the stuff is conventional---there are no trunked systems in my area ;-)
Anway my question is: Is it normal when in the scan mode that the pl's/dpl's are not reading out? Looking at the manual it appears the alpha tags "cover up" the "space" where the pl frqs would read out.
Also when in the search mode for pl's/dpl's when I press enter when the proper pl/dpl is flashing and I've aleady programmed in the pl/dpl with the software would that do anything to the radio's operation as far as "detecting" pl's/dpl's when in the conventional scan mode...

Any help would be appreciated!

The sound is from a police scanner. It's on all the time.

It belongs to John and Shelba Spears, who are the eyes and ears of the police to their neighbors. The Griffing Park couple organize Neighborhood Watch programs and go an extra step. Spears makes regular calls on other seniors in the area.

"They keep us all informed," Norma Huckaby, a friend who nominated the couple as Seniors on the Go, said.

732. call for action on BPL

Yahoo group: CPMA
Date: 2005-04-30 14:34:50 UTC
From: worksntv@aol.com
Topic: 732 Message: 732

I submit the following for your review==Congressman Kanjorski's e mail is: paul.kanjorski@...

If you live outside of the 11th Congressional District your reps e mail can be found at:
http://www.visi.com/juan/congress/

Also pass on to your contacts in the Public Safety Community: why? Many fire departments still run low vhf---right in the middle of the BPL "interference" band.

73'
Bob
WB3DYE

>US HOUSE RESOLUTION CALLS ON FCC TO EVALUATE BPL INTERFERENCE, REVIEW RULES

Rep Michael Ross, WD5DVR, of Arkansas, has introduced a resolution in the US House of Representatives calling on the FCC to "conduct a full and complete analysis" of radio interference from broadband over power line (BPL). The resolution, H. Res 230, says the Commission should comprehensively evaluate BPL's interference potential incorporating "extensive public review and comment," and--in light of that analysis--to "reconsider and review" its new BPL rules, adopted last October. If approved by the full House, the non-binding resolution, introduced April 21, would express the requests as "the sense of the House of Representatives."

"We are grateful to Congressman Ross and his staff for taking a leadership position in recognizing that the BPL interference issue deserves more careful consideration than the FCC was willing to give it under former Chairman Powell," said ARRL CEO David Sumner, K1ZZ. The resolution has been referred to the House Committee on Energy and Commerce, on which Ross serves.

The resolution's prime focus is on BPL's potential to disrupt critical public safety radiocommunication. It cites National Telecommunications and Information Administration (NTIA) studies that "have determined that broadband over power line creates a 'high risk' of radio wave interference, and that harmful interference to public safety mobile radio receivers can be expected at distances of 75 meters from the power line where broadband over power line is in operation, and at distances of up to 460 meters from fixed stations, such as VHF police or fire dispatch communications facilities."

The resolution notes that the same NTIA study determined that BPL interference to aeronautical and airline travel communications "could be expected at distances up to 40 kilometers from the center of the broadband

over power line system, and that interference to outer marker beacons for airline instrument landing systems could be expected at great distances as well."

Many public safety agencies and support services, including emergency medical services, fire, and law enforcement, utilize Low-Band VHF (30-50 MHz), the resolution points out. According to the resolution, at least 13 states--California, Connecticut, Florida, Illinois, Indiana, Mississippi, Missouri, Nebraska, North Carolina, South Carolina, Tennessee, West Virginia and Wyoming--use the band for state police operations. It's the primary public safety radio band in nine states.

The resolution further notes that the Association of Public Safety Communications Officials Inc (APCO), and the National Public Safety Telecommunications Council (NPSTC), urged the FCC to withhold final action in the BPL proceeding for at least a year, pending a "conclusive determination" of BPL's potential to interfere with public safety and other licensed radio systems operating below 80 MHz. It also cites comments filed by the Missouri State Highway Patrol, which uses a statewide radio system with more than 1400 Low-Band VHF users. The Missouri State Highway Patrol commented that the overall effect of BPL implementation would be "a potentially significant increase in interference to the mission of critical public safety communications," the resolution says.

The resolution recounts that the FCC has struggled for years to resolve widespread harmful interference to the radiocommunications of first responders on 800 MHz and "should not have proceeded with introduction of a technology which appears to have substantial potential to cause destructive interference to police, fire, emergency medical services, and other public safety radio systems" without first conducting a comprehensive evaluation.

ARRL President Jim Haynie, W5JBP, has urged ARRL members to contact their US representatives to support the resolution. A sample letter is available on the ARRL Web site <http://www.arrl.org/tis/info/HTML/plc/filings/hres230/HRes230-SampleLtr.doc>. Members are encouraged to express their support in their own words. If you're not sure who represents your congressional district, visit the United States House of Representatives Web site <http://www.house.gov/>.

To expedite delivery, send all correspondence bound for Members of Congress--preferably as an attachment--to <hres230@...> or fax it to 703-684-7594. The ARRL will bundle correspondence addressed to each Member of Congress for hand delivery.

A copy of HRes 230 is available on the ARRL Web site <http://www.arrl.org/tis/info/HTML/plc/filings/hres230/HRes230.pdf>.

734. PA Turnpike PL's???

Yahoo group: CPMA
Date: 2005-05-25 14:09:13 UTC
From: WA3YSU Mail
Topic: 642 Message: 734

It looks like the PA Turnpike is implementing PL's on the Turnpike repeaters at last. Indications are that District 3 has implemented a 136.5 PL. Has anyone seen this in any of the other districts to date? - Kel

-----Original Message-----
Sent: Wednesday, May 25, 2005 10:03 AM
To: 'PhillyScanner@yahoogroups.com'
Subject: RE: [PhillyScanner] PA Turnpike pl tone?

This is great news since the turnpike repeater outputs have never had PL's on them. I may finally be able to program PL tones on the repeater outputs so I don't need to listen to the Harrisburg section or, when the band opens in the morning, to the VA State Police. I'll post this to the PA State list to see if guys in central and western PA have seen PL's in use yet in the central and western parts of the state. - Kel

-----Original Message-----
Sent: Wednesday, May 25, 2005 12:53 AM
To: PhillyScanner@yahoogroups.com
Subject: Re: [PhillyScanner] PA Turnpike pl tone?

Charlie and Kel,
Yes the East/West Turnpike has changed PL's, much like the northeast ext is separated by different PLs. We (emergency contractors (FD/EMS) were told this at a meeting that is was going to be in effect as of the 2nd week in May. But I don't remember what the PL's are going to be right now but 136.5 does sound familiar. Also they were talking about using DPL's too, so it might be wise to search them too. The Turnpike Powers to be, what to make it so that one oend of the state can't hear the the other end to avoid confusion. So certain districts are getting new PLs and others are going to remain the same. Hope this helps Tom Steiner

Subject: RE: [PhillyScanner] PA Turnpike pl tone?

Hi Charlie - From my vantage point it sounds like District 3 has added the 136.5 PL to their 159.045 repeater. District 4 (159.075) and 5 (159.045) are still PL 'free' as of this time based upon monitoring in the past 10 mins. This would be a huge improvement if they added PL's to all their districts!! - Kel

Subject: [PhillyScanner] PA Turnpike pl tone?

Did the PA Turnpike start using a pl tone on 159.045? I'm monitoring them on two scanners & both scanners show a pl tone of 136.5.

On 159.075 I'm getting a weaker than usual signal. Anyone have any info?

The following is something I recieved....The comments are NOT mine...but I'd like to know if the author's "facts" are accurate...
Bob
==========
From what I know, there
is still no one in Public Safety actively using the Cumberland County OpenSky system as their primary communications, nor has the system fully passed all acceptance testing.

Looks like the Editor who wrote this article is completely confused and has absolutely no idea that the report he references is about the state system and not about Cumberland County's. (Also incorrectly says that AP did the study indicating the referenced coverage numbers, but that's also incorrect, AP only published an article based on a letter from the state claiming these numbers).

Anyway, the editorial makes it sound like everyone in Cumberland County is happily now using the system and that it has 99% coverage. Just curious to hear your take on this, and wondered if someone ought to let the editor know just how confused he is.

736. seems agencies now have a choice

Yahoo group: CPMA
Date: 2005-06-06 14:00:48 UTC
From: worksntv@aol.com
Topic: 736 Message: 736

Seems that agencies with VHF, UHF radio systems don't have to rush to 800 MHz...Several companies are selling "patches" for the systems.

Came across this the other day: http://www.link-comm.com/security/dealers.php

They sell devices that can provide links between non compatible radio systems. Page down to one of the dealers--Inter Op out of Harrisburg. It's run by Jeff Logan, who used to be a Deputy Pa Secretary of State, who tells me he helped secure the funding for the Open Sky system the state is trying to deploy. He hired the former project manager for the state system.
He left the state in or around the time the report was released last year about problems with deployment of the 800 Mhz system.

HI I am starting to get out of the radio game! So I am interesting in selling my R7000, complete with SERVICE MANUAL,which cost me $25.00 back in 1987. Frequency coverage is 25 to 1000MHz and 1240 to 1300 MHz. Serial 2197 purchased NEW for $969.00 from the HAM STATION on 9/10/1986
A voice synthesizer unit IC-EX310 is also included,which cost $46.00 back in Nov.1986. Original shipping boxes have also been saved so as to make the package complete.

Oh yes the unit does work and has NOT been scratch ,dented or banged up!

What is it worth????
Thanks DICK

I live in Northeastern Pa===when the band opens some local repeaters for fire and emergency management open up with some strange stuff....

Does anyone have a repeater OUTPUT of 155.025 pl 156.7 or 154.100 pl 110??????????

155.025 is the repeater in for Luzerne County fire/ambulance and 154.100 is the repeater in for Luzerne Co EMA.

Thank u

753. Long Island / NYC Metro Hamfest

Yahoo group: CPMA
Date: 2005-09-08 12:21:17 UTC
From: Ed
Topic: 753 Message: 753

Don't miss the annual Long Island Hamfair & Electronics Show
sponsored by the Long Island Amateur Radio Club. This is the one
event in the NYC Metro region you won't want to miss this fall!

When & Where:

Sunday, September 25, 2005 at:
Briarcliffe College
1055 Stewart Ave, Bethpage, NY 11714

The doors open at 8:30 AM for buyers --and
open to sellers at 7:00 AM (ends @ noon to 1 pm "ish")

How Much?

General Admission is $6.00*
*children 11 and under (accompanied by a paying adult) FREE!

Vendor info~ All spaces $10.00 + Admission for each person including
the main vendor is $6.00 each.

So, what is going to be there?

Free parking for all! Door Prizes!
Food & Refreshments Available
Amateur Radio Equipment
Computers
Ham Equipment Dealers
ARRL Information
CB Equipment
VHF Tune-up Clinic (Get your rig checked)
Long Island Mobile ARC Information

and best of all..... a great excuse to get out of the house or put
off raking the leaves!

Where do I get more information:
http://www.limarc.org/fest.htm
or Call the Hamfest Chairperson, Rick Bressler-K2RB at: 516-526-6975

How do I get to this God forsaken place?

It's easy.......

For a map click here:
http://www.limarc.org/briarmap.html

From LIE

Take LIE to exit 44S (Seaford-Oyster Bay Expressway-Rte 135) South to exit 9 (Broadway, Bethpage). Make a right turn onto Broadway and bear right onto Cherry Avenue. Go past Bethpage High School and at the light make a right turn onto Stewart Avenue. Go past the flashing light and watch for Briarcliffe College on your left -watch for the hamfest entrance.

From Northern State Pkwy:

Take the Parkway to exit 36A South (Seaford-Oyster Bay Expressway-Rt3 135)
and follow directions above.

From Southern State Pkwy:

Take the Parkway to exit 28AN (Seaford-Oyster Bay Expressway-Rte 135) North
to exit 9 (Plainview Road). Make an immediate left at the bottom of the ramp (under the Expressway) onto Broadway and follow the LIE directions above to the college.

Talk-in on W2VL, 146.85 repeater (136.5 PL, negative ' - ' shift)

We hope to see you there!

756. big public safety meeting this week in Harrisburg

Yahoo group: CPMA
Date: 2005-09-15 02:08:15 UTC
From: worksntv@aol.com
Topic: 756 Message: 756

Public safety officials throughout Pennsylvania have been invited to the demonstration of mission critical communications solutions for government taking place this Thursday, Sept. 15, from 9 a.m. to 3:30 p.m. at the Four Points By Sheraton Harrisburg Hotel at 800 East Park Drive.

Motorola has conducted several of these "Motovision" sessions thoughout the country in 2005 and the Pennsylvania event is expected to be the final one of the year. These events have drawn hundreds of police and fire chiefs, state Homeland Security directors and others interested in viewing the demonstrations of communications technology available to assist state, local and federal first responders. Other sessions have taken place for public safety officials in Washington, D.C., Toronto, Chicago, St. Louis, New Jersey, Anaheim, and Orlando, among others.

Some of the technology to be demonstrated will include interoperable public safety communications like the systems purchased by Dauphin County and Westmoreland County, among others. There will also be demonstrations of mesh networking, the Motobridge interoperable solution which ties together users of disparate radios/radio systems at the site of an emergency (this was used at the last Super Bowl and is being looked at by first responders to Hurricane Katrina to aid in future emergency communications) and a product called Mobile Video Enforcer, which is an in-car, digital mobile video device that allows for clear video of traffic stops and crime scenes, but also allows for easy storage of these digital videos for use in court (there will also be a demo of the next phase of this technology coming out later this year which includes automatic license plate recognition for police squad cars.)

The Harrisburg session will also include seminars, including one by Rich Matason, Director of Public Safety for Westmoreland County, Pa. He will address the issue of interoperable communications, an issue that obviously came to the forefront of public attention in the aftermath of 9/11 and once again in the emergency response to Hurricane Katrina.

In the wake of Katrina, the topics being discussed in Harrisburg once again ring very true and I believe would be very relevant to your viewers as first responders continue to discuss the need for mission critical interoperable communications in emergencies like these as well as daily public safety situations.

760. LATEST ON PA STATE SYSTEM

Yahoo group: CPMA
Date: 2005-10-27 02:43:38 UTC
From: worksntv@aol.com
Topic: 760 Message: 760

Date: 10/26/05
Day: Wednesday
Newspaper: THE HARRISBURG PATRIOT
Section: A Section
Edition: FINAL
Page: A04
Headline:Cost of statewide radio net questioned
Byline: JAN MURPHY
Source: Of The Patriot-News
Subject: Emergency;Cost
Length: 18
Art: PHOTO

The cost of a new statewide emergency radio system is already more than twice what was initially budgeted and behind schedule. Now, a state senator wants to know how much more it will cost to put local responders on the system, and when it can be done.

Sen. Rob Wonderling, R-Montgomery, said he is considering requesting a study to find out those answers after getting an update yesterday on the overdue radio project during a joint meeting of two Senate panels.

The Rendell administration estimates it will cost $378 million to make the radio system accessible to local responders. Wonderling said he suspects the cost to taxpayers will be higher, because of the equipment that local governments will need to buy to connect their radios to the system.

The system will put all 22 state agencies on a single 800-megahertz radio network capable of transmitting voice and data. Right now, agencies operate on separate systems.

The Sept. 11, 2001, terrorist attacks led to expanding the system's purpose to include communicating with local emergency responders around the state.

The statewide radio system is projected to be operational by November 2007, six years after the original completion date and far above the $179 million appropriated for the project .

"You get to a point in time where I think taxpayers are demanding the state government to stop squandering dollars," Wonderling said after yesterday's hearing.

The radio project was launched in 1996, and construction began in 1999. Last year, Gov. Ed Rendell, when questioned about the project , called it "a mess" and said the original contract for the project was "not a good one."

Wonderling said after the hearing that he was surprised that the administration "has continued to fund something that clearly is not ... working as it was intended."

Sen. Connie Williams, D-Montgomery, requested the update on the project after hearing of the communication breakdown that arose when Hurricanes Katrina and Rita ravaged the Gulf Coast.
Sen. Don White, R-Indiana, compared the radio system's importance in emergency response to an insurance policy.
"We need this system up and running at full capacity as soon as possible," White said.
Art Stephens, Rendell's deputy chief of staff, said the system, which is supposed to be capable of supporting 50,000 users, is used daily by 707 voice users from five state agencies and 893 data users from the state police.
The state police awaits 21 software upgrades to the system that ensure troopers' safety before it will switch for voice transmissions, said state police Lt. Col. Henry Oleyniczak.
The biggest challenge to completing the project by 2007 is acquiring tower sites to ensure the system will work in at least 95 percent of the state, Stephens said. That is the level of coverage that was required by lawmakers. Right now, he said the coverage reaches over 80 percent.
Acquiring tower sites has been part of the reason for the delay, Stephens said. So was last year's bankruptcy of the contractor that the state had hired to construct the towers.

762. why project 25 should be used

Yahoo group: CPMA
Date: 2005-11-01 16:48:08 UTC
From: worksntv@aol.com
Topic: 762 Message: 762

When procuring equipment for communication system development and expansion, a standards-based approach should be used to begin migration to multi-jurisdictional and multi-disciplinary interoperability. Specifically, all new systems should be compatible with the ANSI/TIA/EIAA-102 Phase 1 (Project 25 or P25) suite of standards. With input from the user community, these standards have been developed to allow for backward compatibility with existing digital and analog systems and to provide for interoperability in future systems. The FCC has chosen the P25 suite of standards for voice and low-moderate speed data interoperability in the new nationwide 700 MHz frequency band and the Integrated Wireless Network (IWN) of the U.S. Justice and Treasury Departments has chosen the Project 25 suite of standards for their new radio equipment. P25 has also been endorsed by the US Department of Defense for new LMR (Land Mobile Radio) radio systems. 09/26/03 3 http://www.safecomprogram.gov/NR/rdonlyres/55066F6A-A2FD-4285-AEDD-39F62EE04AAD/0/Recommended_Federal_Grants_Guidance_Public_Safety_Communications_Interoperability_Grants.pdf

The days of sitting by the reliable scanner to keep tabs on the neighborhood dispute are coming to an end.
The county’s switch to a new 800 MHz system means emergency communication among police are out of the public domain.

Each radio has an IP address that the county must activate and there is “ nothing in place right now for the general public” to access the system, Cumberland County Commissioner Bruce Barclay said.

Home scanners will continue to pick up radio dispatches for fires and ambulances until June 1 when they also will flick switches to eliminate the public from listening in to calls.

769. latest IXP report on the Pa system

Yahoo group: CPMA
Date: 2005-12-30 15:36:48 UTC
From: worksntv@aol.com
Topic: 769 Message: 769

I have filed a copy of what I believe to be the latest IXP report on the Pa system.

Some of the things mentioned: radios being delivered to comm centers with the wrong programming, suggestions that all future radio deployments be Project 25, and the state will buy the Ma/Com boxes to make other radio systems "play" with Open Sky.

The report seems to sidestep the issue of SAFECOM and the Federal Office of Homeland Security's recommendation that all future systems not be propriety but P25 compliment.

You can find the PDF file in the files section of the PA-800MHZ group

Yahoo group: CPMA
Date: 2006-01-04 17:05:13 UTC
From: worksntv@aol.com
Topic: 770 Message: 770

Here's a trick that some agencies use. We all know that a PL/DPL coming out of a transmitter and going into a repeater will usually come out as the same PL/DPL.
But sometimes that's not always true. I know a police department in Northeast Pa that does the following:
When they want their conversation to be "private" They can change the PL on their input frequency to be different. That way the repeater doesn't open and they chat on the input.

I don't think this method is used a lot. One of the members of the PD is a ham--so I suspect he came up with the idea ;-)

I do have a question for the group: The Wilkes Barre Police Department has repeaters. The main channel is using an input PL of 156.7---yet the output is 82.5! Any techs out there know why that would be the case??

Topic: 770 Message: 771

It is simply the set-up of the tone panel for the repeater, most of which have numerous options that can be configured in 'non-standard/unexpected' ways. There are repeaters around that not only use differing PL's for the input and output, but use a PL on the output and a DPL on the input to help alleviate interference from co-channel users and skip, while still trying to use a uniform regional PL for output.

From: worksntv@aol.com
Topic: 772 Message: 772

there was no immediate news about layoffs. M/A Com employs about 500 in its two Lynchburg facilities.
The breakup will cost Tyco $1 billion, which will mostly cover tax and debt refinancing, Woodruff said.
However, executives of Tyco Electronics will be receiving some additional benefits.
Thomas Lynch was appointed chief executive officer and will receive a 6 percent increase Jan. 23.
According to Tyco International’s Security and Exchange Commission 8-K filing, Juergen Gromer, who has been president of Tyco Electronics since 1999, also will become vice chairman.
According to the filing, Gromer will be paid a cash retention bonus equal to two times his salary and bonus if he stays with the company for two years after the company separates.
Tyco’s proxy report lists Gromer’s salary at $999,575 in 2004.

LURGAN TOWNSHIP — Questions about a 2002 donation to the Newburg-Hopewell Volunteer Fire Department most likely will be answered next month, Lurgan Township Supervisors said at a Monday night meeting.
According to a Dec. 30 letter from Newburg Borough Council Secretary Rae Ann Sprecher-Frey, the $2,929.30 township donation for an 800 MHz radio system in February 2002 was not received by the fire department.

Under the plan, Jackson police and fire departments would turn in their M/A Com radios and equipment and get Motorola hardware — the same kind used by the Sheriff's Department, Clinton and other metro-area emergency agencies. The replacement would take up to a year and cost about $8.5 million.

SuitSat has been deployed!

A Russian space suite has been placed in an earth orbit courtesy of the International Space Staion Expedition 13 flight engineer Valery Tokarev during a spacewalk he performed earilier today.

The ham radio equipped space suite, equipped with a transceiver transmitting
on the Amateur Radio 2m band frequency of 145.990 MHz, is expected to stay
in orbit from anywhere between two to six weeks, until its orbit decays and
it falls victim to the friction of the earth's atmosphere.

SuitSat-1 consists of a surplus Russian Orlan spacesuit, reconfigured to serve as a free-floating Amateur Radio transmit-only satellite, equipped with a Kenwood TH-K2AT handi-talkie transceiver. With three batteries powering the radio operating at 500 mW, it's tranmissions are expected to

last about 1 week.

The artificial satellite will operate under the Amateur Radio call sign, RS0RS. SuitSat will transmit for 30 seconds, pause for 30 seconds, repeating the phrase, "This is SuitSat-1, RS0RS," followed by a prerecorded
greeting in five languages. The greeting contains "special words" in English, French, Japanese, Russian, German and Spanish for students to record and decipher.

The orbiting space suite then continues it's audio transmission loop, using
a text to speech synthesizer, by transmitting telemetry information consisting of mission time, suit temperature and battery voltage followed by
an SSTV (slow-scan TV) image.

The entire transmission loop runs on an eight-minute cycle as the space suite satellite circles the Earth.

Please visit the SuitSat website (http://www.suitsat.org/) for more details.

780. RE: [CPMA] Fw: SuitSat

Here is an excerpt from the latest NASA report on the ISS; it describes the

failure of the SuitSat.
==========
Report #5=20
11:30 p.m. CST, Friday, Feb. 3, 2006
Mission Control Center, Houston

Space station crew members released a spacesuit-turned-satellite during the

second spacewalk of their mission last night. Called SuitSat, it faintly transmitted recorded voices of schoolchildren to amateur radio operators worldwide for a brief period before it ceased sending signals.

Expedition 12 Commander Bill McArthur and Flight Engineer Valery Tokarev ventured outside for a five-hour, 43-minute spacewalk to release SuitSat, conduct preventative maintenance to a cable-cutting device, retrieve experiments
and photograph the station's exterior. Clad in Russian Orlan spacesuits, McArthur and Tokarev opened the hatch to begin the spacewalk at 5:44 p.m. EST. It
was the fourth career spacewalk for McArthur and the second for Tokarev.

After setting up tools and equipment, they positioned the unneeded Orlan spacesuit on a ladder by the station's Pirs airlock hatch. The suit reached the
end of its operational life for spacewalks in August 2004. It was outfitted by
the crew with three batteries, internal sensors and a radio transmitter for

this experiment.

The SuitSat provided recorded greetings in six languages to ham radio operators for about two orbits of the Earth before it stopped transmitting, perhaps
due to its batteries failing in the cold environment of space, according to

amateur radio coordinators affiliated with the station program. The suit will
enter the atmosphere and burn up in a few weeks. Tokarev pushed the suit away
toward the aft end of the station as the complex flew 225 miles above the south central Pacific Ocean. The suit initially drifted away at a rate of about
a half meter per second, slowly floating out of view below the Zvezda Service Module and its attached Progress cargo craft. The suit is now separating

from the station at a rate of about six kilometers every 90 minutes. . .

The current communications system used by dispatchers at York County's 911 center is at least 30 years old and uses what was state-of-the-art technology in the 1950s - vacuum tubes, which can be found now only in antiques, ultra-expensive audio equipment and guitar amplifiers.
Now, though, the county is on the cusp of acquiring technology that would make the 911 system one of the best and most technologically advanced in the state.
The price tag? Estimated at between $38 million and $42.5 million.http://www.ydr.com/newsfull/ci_3490888

From: worksntv@aol.com
Topic: 798 Message: 798

WATSONTOWN — The Warrior Run Area Fire Department has been having problems with firefighters being notified or pagers being activated when there is an emergency, according to Fire Chief Mark Burrows.
This problem dates to August 2002 when a letter was sent to the Union County Department of Emergency Services and the Union County commissioners about the inability of fire, rescue, and emergency medical services personnel to receive pager notification of emergency calls, he said.

799. A COW could turn out to be the cure

Yahoo group: CPMA
Date: 2006-03-27 13:25:39 UTC
From: worksntv@aol.com
Topic: 799 Message: 799

A COW could turn out to be the cure for inconsistent 800 MHz radio service that troubles Shippensburg police trying to use Cumberland County's new 800 MHz emergency radios.

Emergency officials from the county and the state met Friday for an inspection of a hilltop just outside the borough to see if the location is a good site for a COW -- or cell on wheels.

Pennsylvania authorities would lend the portable cellular transmission tower to the county as a temporary measure while county officials try to secure a permanent Federal Communications Commission broadcasting license for the Reservoir Hill location. The COW is towed on a trailer and telescopes to various heights when in place.

Another example of using a non propriety system and comms in the clear helped police.

Bob

Swindle said that as police searched for the suspects, a phone call led them to the right location.
"We received a call at 9:39 p.m. last night from a citizen who had been monitoring scanner traffic and thought the suspects had just pulled into the La Michoacana Meat Market," he said. The caller described the vehicle as a dark truck with a Hispanic driver.
"We don't know who the person is who called us, but he deserves a lot of credit," Swindle said. "We would like to know who that person is and would like to talk to them."

805. TV REPORT ON OPEN SKY

Yahoo group: CPMA
Date: 2006-05-21 13:54:23 UTC
From: worksntv@aol.com
Topic: 805 Message: 805

WPXI-TV (Pittsburgh NBC Affiliate) ran a story on tonight's 6PM local news regarding the Pennsylvania statewide "Open Sky" radio system that has gone way
over budget, although they didn't mention it by name. They also commented on how it cannot be used to interoperate with the local police departments. They showed the Washington D.C. police dispatch center and how they have set up their systems to interoperate with just about all of the local and federal systems in D.C. The story is posted in video form on the WPXI.COM website at:
http://www.wpxi.com/video/9247516/index.html?rss=burg&psp=news

From: Creighton Rabs
Topic: 806 Message: 807

I hope Open Sky fails miserably and they have to go to another system.

I'm also hoping it's just the Lancaster barracks and not all Troop J stations (Ephrata in Lancaster Co; Avondale and Embreeville in Chester Co) that's switching over to the "DARK SIDE OF SCANNING"; if that's the case, then I'm not going to be able to hear PSP in Chester County any more.

From: worksntv@aol.com
Topic: 809 Message: 809

The other choice was a competing M/A-COM radio system.

It used different technology than the P25, but was substantially cheaper at about $5 million, including 15 years of maintenance.

But Young said the county didn't like the fact it wouldn't own the M/A-COM system.

Some local radio managers question M/A-COM's interoperability successes, saying it is not a proven system and is unnecessary because the county already has a countywide 800 MHz system.
"So far what I've seen about the system has been theoretical," said Mark Filla, the county's 800 MHz system manager. The county's system serves the sheriff's office, county agencies and some cities and is capable of serving all cities, he said.
"The deployment of the (M/A-COM) system may add another layer of complexity to something that we've successfully deployed over the past years," Filla said.

817. MOTOROLA VS MA/COM AGAIN

Yahoo group: CPMA
Date: 2006-08-02 15:27:59 UTC
From: worksntv@aol.com
Topic: 817 Message: 817

efforts to establish a emergency communication channel to improve safety and response time are being hindered by old-fashioned competition. The state is part of a larger battleground between two communication companies offering different versions of an 800-MHz system.

Motorola Inc. and M/A-Com compete to supply radio service to Oklahoma cities and private utilities. The difference in radio systems creates compatibility problems between the Motorola system used by Tulsa and the Oklahoma Highway Patrol and the M/A-Com system used by Oklahoma City, Broken Arrow, Bixby, Glenpool and Jenks.

"Every state is a battleground. It's no secret," said Chuck Shaughnessy, vice president of operations for M/A-Com.

M/A-Com just won a $2 billion contract to install an 800-MHz system and VHF system in New York, Shaughnessy said.

Motorola, meanwhile, leads M/A-Com in installing state systems, said Steve Gorecki, a company spokesman. Gorecki said Motorola has built 29 of 32 systems across the nation

Penn Dot.
==========
-----Original Message-----
From: bob reynolds
Sent: Wednesday, July 05, 2006 3:44 PM
To: Dussinger, Karen C
Subject: RADIO SYSTEM

Karen:

When you get a chance can you confirm the following information?
As you may know Pa is deploying a new 800 Mhz two way radio system. It's my
understanding that the new radios have been in use by Penn Dot. Recently the
"old" radios the new system replaced are being reinstalled in Penn Dot units.
I need to know why thats being done. Some Penn Dot employees there are
reception problems with the new system.
Best regards,

Bob Reynolds

----- Original Message -----
From:
To: bob reynolds
Sent: Monday, July 10, 2006 7:33 AM
Subject: RE: RADIO SYSTEM

Bob, I sent it to you last week (Friday, I think.). Here is what I sent:

PennDOT began deploying the statewide 800 MHz public safety radio system in
the fall of 2003 and currently has more than 3,400 employees using the system
in 43 counties throughout Pennsylvania. We have successfully implemented the
800 MHz system in most of our engineering districts throughout the state.
Response where the system has adequate coverage has been excellent.

Due to recent reports by field staff that radio communications is difficult
in the more rural areas of the state, PennDOT has decided to temporarily
re-install its low-band radios in Wyoming, Pike and Susquehanna Counties in
Engineering District 4-0. PennDOT continues to work with the office of
Public-Safety Radio Services to expand radio coverage in these rural areas. In the
interim, the installation is necessary as a backup to ensure adequate
communication for our workforce and to ensure effective operations.

820. editorial

Yahoo group: CPMA
Date: 2006-08-27 14:40:40 UTC
From: Ed
Topic: 820 Message: 820

We are always so busy....busy doing what? That's an interesting concept to think about and one Harold Ort -N2RRL explores in his editorial in the September issue of Popular Communications.

Harold discusses hamfest attendance and bringing youngsters in to the hobby....stuff we have been talking about for years. Read it an give it some thought.

One line that stands out goes like this "......some hamfest organizers are more of a roadblock than a welcoming committee for vendors...."

Harold is right folks.... having run 13 hamfests for LIMARC (one of the largest clubs in the country) I can say....not always are the people I had around me (when I was hamfest chair) putting their best foot forward. Some people are wonderful, and others....we probably would have been better off without.

It's a hard call....when I would get fed up with the crotchety old hams the club "elders" would tell me.... "well, they are all volunteers...what can you do?" Yet, having been a used car salesman for 2 years after college...I guess I had it ingrained in me that you always have to "sell yourself" and put your best face on even if you want to tell the customer to go take a flying leap....cause the bottom line is putting cash in your pocket...or in our case the club treasury.

Anyway, check out Harold's article in PopCom.

Firefighters on the scene learned of the threats when a Viola firefighter arrived and told Brown about police scanner traffic regarding the threat. Brown said he met with Baxter County Office of Emergency Management Director Tom Fischer Friday morning to find out why he and his firefighters were not told about the danger they were walking into.

Lebanon County Commissioner Bill Carpenter yesterday said that the cost is expected to be higher than the $10.4 million contract the county has with M/A-COM, a Tyco Electronics company, to build the system.
At yesterday's county commissioners meeting, Carpenter said the price could rise by "hundreds of thousands" of dollars.

From: worksntv@aol.com
Topic: 825 Message: 825

An audit recently issued by the Office of the State Comptroller found overcharges, unreasonable interest rates, maintenance paid for but not performed and continued assessment of user fees after agency payments had reached the full value of the equipment. M/A-COM is negotiating amendments to existing contracts with State Police, the Division of Correctional Services and the Department of Transportation to address audit findings. While seeking recovery of monies spent on preventive maintenance for which there is no record of delivery, the Office of the State Comptroller has initiated a further audit of M/A-COM's preventive maintenance practices. All of these issues would best be addressed in a centralized contract subjecting all users of M/A-COM equipment to consistent contract terms.

Gainesville police love Brown. She is "a strong pillar in the community," said Sgt. Chris Robinson, who supervises the department's three public housing precincts.
Brown also is a keen set of eyes and ears, Robinson said. "I wish we had a lot more like her."
Brown said she does not always alert police; only when they are needed. She said she sleeps like a cat. And keeps a police scanner on in her bedroom.

LANCASTER COUNTY, PA - Manheim businessman Doug Shaub was working in his dry-cleaning store Sept. 5, 2001, when his police scanner started crackling. Shaub, a borough councilman and volunteer firefighter, heard a report of a robbery at the nearby Farmer’s First Bank, and he jumped into action.
Shaub ran outside and hid until he saw the suspect in a getaway car, then followed him out of the bank’s parking lot, took down his license plate number and contacted Penn Township Police.

Yahoo group: CPMA
Date: 2007-01-27 20:32:00 UTC
From: worksntv@aol.com
Topic: 833 Message: 833

The first problem involved the reliability of the pagers carried by first responders, which are used to alert them to emergencies. Firefighters, especially in the eastern end of the county, complained about missed messages. That issue was partially resolved when the original pagers were swapped out for a more reliable brand. However, it did not put an end to all of the dropped messages.
It was then discovered that certain areas of the county, notably Cornwall Borough, and Millcreek and Annville townships have coverage problems caused by topography that affect transmissions.
Yesterday, Tesh explained that engineers have come up with solutions involving the installation of additional equipment that will add about $700,000 to the final price tag for the system.

From: worksntv@aol.com
Topic: 845 Message: 845

PITTSBURGH — A statewide radio transmission system meant to allow different rescue agencies to communicate with one another during an emergency will be more than $180 million over budget when it is completed in about three years, officials said.
The state has already been working on the project for 10 years and spent nearly $311 million on the radio system, officials said, well over the projected $179 million. When it is completed, the total bill is expected to top $360 million, partly due to added expenses after the Sept. 11 attacks.

From: worksntv@aol.com
Topic: 848 Message: 848

If I could leave you with a central message today, it would be this:
First, let’s not assume that the traditional suppliers of radio systems with proprietary
technology will offer the most desirable solutions.
Second, we absolutely need to support the hard work by states in their interoperability
efforts, but with an approach that doesn’t require every first responder in the country to
buy a new radio.
Third, an open, device-independent, standards-based, software approach such as
IP Radio, already embraced elsewhere, will meet several of our most critical needs
immediately. And save lives. And we may actually be able to afford it.

Topic: 852 Message: 852

Did you miss Dayton or are you just suffering from withdrawal?
There's no need to wait till July for Sussex, get your "fix" this weekend.....Now that Mother's Day and Memorial Day are behind us, why not spend a nice Sunday morning checking out some ham radio equipment?

Check out all the radios, visit with old friends, make some new ones, pick up some coax, connectors or antennas to get your shack back in shape for the summer, or just walk around and catch a tan. It's all here at the LIMARC hamfest.

This Sunday, June 3, 2007 at
Briarcliffe College
1055 Stewart Ave, Bethpage, NY 11714

The gate opens at 9:00 AM for buyers, maybe slightly earlier if all are ready....the gate opens to sellers at 7 AM

(ends @ 12:30 pm to 1 pm "ish")

General Admission: $6.00*
*children 11 and under (accompanied by a paying adult) & non-ham Sweethearts FREE!

Free parking for all! Door Prizes!
Food & Refreshments Available

Talk-in on W2VL, 146.85 repeater (136.5 PL, negative shift)

Vendor info ~ All spaces $10.00. Admission for each person including the main vendor is $6.00 each.

NO Pre-Registration is required for any outdoor hamfest, But it would be nice if you'd let the hamfest chairmen know so that they know to expect you. Thanks in advance!

For more info contact: hamfest@...

Directions:
From LIE (495)

Take LIE to exit 44S (Seaford-Oyster Bay Expressway-Rte 135) South to exit 9 (Broadway, Bethpage). Make a right turn onto Broadway and bear right onto Cherry Avenue. Go past Bethpage High School and at the light make a right turn onto Stewart Avenue.
Go past the flashing light and watch for Briarcliffe College on your left >>watch for the hamfest entrance.

From Northern State Pkwy:

Take the Parkway to exit 36A South (Seaford-Oyster Bay Expressway-Rt3 135)and follow directions above.

From Southern State Pkwy:

Take the Parkway to exit 28AN (Seaford-Oyster Bay Expressway-Rte 135) North to exit 9 (Plainview Road). Make an immediate left at the bottom of the ramp (under the Expressway) onto Broadway and follow the LIE directions above to the college.

Date: 2007-06-15 16:50:06 UTC
From: worksntv@aol.com
Topic: 854 Message: 854

STATE COLLEGE, Pa., June 14 /PRNewswire-USNewswire/ -- More than 200 stakeholders representing first emergency responders and federal, state and local organizations gathered today to find ways to improve emergency response communications in Pennsylvania
http://www.earthtimes.org/articles/show/news_press_release,122895.shtml
==========

The federal government recognizes it's important for public safety personnel to be able to speak to each other not just in the middle of a crisis, but whenever they need to. We learned from Sept. 11, 2001, we don't have that ability, and six years later, we still don't have it to the place where it needs to be. Pennsylvania is in a unique situation. We'll be one of the first states to have a fully interoperable communications system."

855. M/A-COM system in Cambria County

Yahoo group: CPMA
Date: 2007-06-20 20:44:37 UTC
From: worksntv@aol.com
Topic: 855 Message: 855

The new public safety communication platform is a M/A-COM system provided through TransCore, Inc., based in Harrisburg, Pennsylvania. The system will be tightly integrated into the CONXX backbone and will improve coverage in areas where public safety communications has been a longstanding problem.
“When we found that we had to upgrade our public safety system, I was concerned about the cost,” Brian Feist, director of emergency service for Cambria County, said. “We needed to find a system that would not only fix our public safety problems, but could also address some of the bigger communication issues we have to leverage the investment. I think we succeeded.”
http://home.businesswire.com/portal/site/google/index.jsp?ndmViewId=news_view&newsId=20070611006169&newsLang=en

Here is a reply to my email asking about the system:

We are going to use analog UHF in a 12 tower county wide simulcast system. Our equipment will be digital working in the analog mode. Our police have been UHF for years. We are bringin fire up from low band and EMS uf from high.

Brian Feist

858. CUMBERLAND CO AND MA/COM

Yahoo group: CPMA
Date: 2007-07-05 16:22:28 UTC
From: worksntv@aol.com
Topic: 858 Message: 858

A tentative date for transition to 800 MHz for Fire and EMS was announced at the radio transition committee meeting of June 5. Tuesday July 24 is being targeted as the go-live date for the services. This date is dependant on acceptance by the Commonwealth of PA of corrective code for the Release 6 portable problem involving reverse channel roaming. The transition committee will decide formally on the July 24 go-live date at their next meeting scheduled for July 10.

859. BAPERN radio network

Yahoo group: CPMA
Date: 2007-07-05 16:33:07 UTC
From: worksntv@aol.com
Topic: 859 Message: 859

Georgetown’s highway and health departments were each given special two-way radios and trained in using them at an open house last Tuesday by the Northeast Homeland Security Regional Advisory Council at Beverly Emergency Management near the Beverly Airport.
Unlike the radios already used by the town public safety departments, these federally funded devices are programmed to the existing BAPERN radio network, according to open house information. BAPERN, which stands for Boston Area Police Emergency Radio Network and is owned and operated by the Greater Boston Police Council, is the largest public safety radio network in Eastern Massachusetts. Should ever a disaster strike in Georgetown, these radios will allow for instant contact with a network of nearby emergency agencies.

862. MA/COM ISSUES with pd/fire dept's ok

Yahoo group: CPMA
Date: 2007-08-01 17:10:05 UTC
From: worksntv@aol.com
Topic: 862 Message: 862

Two years after Cumberland County's OpenSky 800 MHz radio system was installed, police departments are still reporting kinks in the system that need to be ironed out.

Middlesex Township police Chief Barry Sherman was ambivalent toward the new radios during last Friday's township supervisors meeting, but he was obviously tired of having to deal with the radio issue any longer.

“It works 100 percent of the time in other places, but we can't get it to work in Country Manor (Estates), and that's about 60 percent of our calls,” Sherman said.

The dead zone area, Country Manor mobile home park, is not only a high traffic area for police but also a dangerous area for officers who find themselves unable to reach county dispatch during an arrest, he said.

“We've already had two incidents where our officers have been under fire and were not able to use the radio,” Supervisor Victor Stabile said. “I don't want one of our officers dying when we know, and the county knows, that this area has a high problem rate and the radio doesn't reach it.

Thanks

868. MORE OPEN SKY: YORK CO PA

Yahoo group: CPMA
Date: 2007-09-16 01:30:55 UTC
From: worksntv@aol.com
Topic: 868 Message: 868

York County is pursuing a $2.5 million grant to defray the cost of its new 911 radio system and improve communication with state agencies and other counties.
The county is upgrading its radio system in part to avoid the communication problems that plagued emergency responders during the terrorist attacks of Sept. 11, 2001. In that case, agencies such as the fire department and police were unable to communicate with each other using their respective handheld radios.
The same problem exists in York County. Responders must use different equipment, communicate through the county's 911 center or through face-to-face meetings.
The new radio system will address that difficulty by allowing agencies to use new handheld radios to communicate with each other, said Rob Sterner, project director.

Sent: Sun Sep 16 15:13:52 2007
Subject: a question

Audrey:

As a ham radio operator I recently spotted an article concerning York
County's radio system.
http://www.yorkdispatch.com/local/ci_6882340

I understand the system will be in the 500 Mhz range. As you know the state
has been marketing it's 800 Mhz Open Sky system where agencies can
piggyback
on.

May I ask if the state system was considered and if so why did you folks
decide to go with another design. Did it have anything to do with the fact
that
the state system was supposed to be completely online in 2001 and the costs
have risen to twice what the state had projected?

Best Regards,

Bob Reynolds-WB3DYE
White Haven, Pa 18661

Bob,

There are no 800 frequencies left in the spectrum, and we were able to
procure frequencies in the 500 band. Additionally, the EDACS system is a proven
system, with a long and successful track record. Given the terrain of York
County, and the positive history of the EDACS system, we felt it was a better fit
for the County.
The state system does not have the capacity for us to piggy back on the 800
Open Sky system, so it was not a consideration.

Please feel free to give me a call if you have additional questions at
717-840-2906.

Audrey

873. shut down part of Sprint Nextel’s network

Yahoo group: CPMA
Date: 2007-11-18 16:29:59 UTC
From: worksntv@aol.com
Topic: 873 Message: 873

Federal regulators are threatening to shut down part of Sprint Nextel’s network if the company doesn’t fix interference problems with public-safety radios by June.
Though Sprint is making progress, an incredibly complex, multibillion-dollar project affecting 2,200 police, fire and other public-safety agencies across the nation is not on track to meet the deadline.
The possible consequences, according to the latest order from the Federal Communications Commission, include Sprint losing access to radio wave spectrum needed for its Nextel- and Boost Mobile-branded wireless service, which it sells to nearly 20 million subscribers.
Sprint executives stress they are making extraordinary efforts to finish the project and prevent the shutdown of part of the company’s wireless networks.
Waivers seeking leniency from regulators are a possibility.
But Sprint also is challenging what it called the commission’s “draconian” action, urging the U.S. Court of Appeals to intervene as soon as possible

874. the proprietary technology

Yahoo group: CPMA
Date: 2007-11-20 02:49:12 UTC
From: worksntv@aol.com
Topic: 874 Message: 874

So far, M/A COM has a spotty at best record of delivering on the contract.
The company is already a year behind.
More importantly, the proprietary technology M/A COM is selling remains unreliable. Outside industry professionals are cautioning that the technology, even if reliable, does not meet federal compatibility standards so New York can talk to the rest of the country.
Still, that puts in question federal reimbursements, not to mention that one of the main points of this expensive exercise is that the system is supposed to be part of a national network.
On top of that, because M/A COM is crafting its own exclusive technology, any of the first responders or public safety types that opt to hook into it will have to buy equipment from M/A COM.

Date: 2007-12-19 15:42:02 UTC
From: worksntv@aol.com
Topic: 875 Message: 875

A $2 billion emergency radio network intended to connect all emergency agencies and local police and fire departments in New York State has failed its first major test, prompting concerns from some state officials and causing the state’s second largest city, Buffalo, to opt out of the system.
The contract to build a network of wireless transmission towers that would allow tens of thousands of police officers, firefighters and other emergency personnel statewide to communicate was awarded in 2005 to M/A-Com, a division of Tyco International. The system was supposed to be in operation in Buffalo and surrounding Erie County and neighboring Chatauqua County by last June.
http://tinyurl.com/22xsve
http://tinyurl.com/2pxwzw

Dennis Vickery, regional vice president for Dailey-Wells, told The Courier after the meeting he was prepared to bid $6.8 million for a comparable service. Vickery's company manufactures M/A-COM radio technology and was competing with Motorola for the contract.

While some say voice over Internet Protocol (VoIP) over the radio interface could be the next big thing in mission critical communications, in fact, VoIP has a long way to go before it meets mission critical standards in the same way the global customer driven standards devices do today.
Today, VoIP is successfully deployed in indoor, enterprise applications, but it is an emerging technology in the mobile wireless domain outside the four walls. In the cellular world, handsets and devices are dominated by digitally vocoded circuit switched voice, which is the base for what exists in mission critical voice today.

It is a simple issue – open versus closed systems. Imagine if you could only access
Google if you were on a Dell laptop, because IBM laptops didn’t work with Google.
That might sound absurd, but that’s exactly the current state of first responders in the
Pacific Northwest – a police radio from Seattle, Washington does not work on the
Portland, Oregon system – that is the world that proprietary systems create.
The more proprietary – the less interoperable.

Pack up the car and head east to Long Island.... but don't come empty handed...a shoe-fly pie would go a long way towards goodwill...LOL.

Sunday, January 13, 2008
Briarcliffe College
1055 Stewart Ave
Bethpage, NY 11714

"A day of education to share ideas, experiences, knowledge and fellowship among Amateur Radio operators"

Featuring
Spreading Ham Radio Knowledge and Know How by Keynote Speaker
Gordon West WB6NOA.

What is HRU? Many of you have already heard of Ham Radio University but the idea may be new to some of you. HRU was created by Phil Lewis, N2MUN. Phil was searching for ways to get inactive hams back into the swing of Amateur Radio. In addition, Phil wanted to help newly licenced hams who ask "What Now?". Since 1999, HRU has been bringing the local ham community together for a special day of learning and fellowship.

Gordon West, WB6NOA, will be our keynotes speaker. He always has exciting things to offer to newbies as well as old timers. I have had the opportunity to hear Gordon speak on a number of occasions. On each occasion I have learned something new and have walked away with a new sense of optimism for the future of Amateur Radio.

Speaking of the future of Amateur Radio, we will be treated to a demonstration of D-STAR, a cutting edge technology developed by ICOM to bring repeater communications into the 21st century through digital speech technology.

What else do we have in store for 2008?

For our "Welcome to Amateur Radio" track, we plan to feature a beginner's forum on setting up your first station as well as a young ham forum aimed at "Elmers" who are looking for more effective ways to get kids interested in ham radio.

A second track is dedicated entirely to public service, emergency communications, and public relations as well as a brand new forum dedicated to radio clubs: "Join a Club, Join the Fun".

Our "How-To Workshop" track will feature DF'ing and hidden transmitter hunting, portable antenna construction, and VHF propagation.

For the technically inclined ham, we have a "technical" track with an all new forum on RF Interference as well as HRU's first forum dedicated to power supply technology.

Finally, we have an "Operating" track featuring HF Propagation, operating techniques and current events for serious DXers, and contest operating at home and abroad.

And yes, there will be a VE session for those who want to obtain their first "ticket" or to upgrade an existing license.

In short, there is something for everybody at Ham Radio University. If you have not been to an HRU, I encourage you to attend this year.

Yes, Yorks New IP25 System is looking and testing very well. Great results from what I have heard from the techs talking on the MA/COM Tech Talk Groups.

Lancaster County has dumped there plans to continue instalation and use of the OpenSky Trunking System for Public Safety.

Plans are now to decide on either a MA/COM EDACS Analog / ProVoice Digital System like Lebanon, or go with a MA/COM ip25 Trunked Digital System like York.

Either one, the new date is 2011 to go live, with buildout to begin in late 2009.

There was little encouragement, in that regard, from the network's rollout in Buffalo. Fire Commissioner Michael Lombardo was quoted as saying problems were so severe that radios failed to work in about half the city. That's hardly a ringing endorsement.
Success was achieved in Chautauqua County, company officials eagerly point out. Factors there include the area's mainly rural terrain and less interference from other radio transmissions. But there were other concerns raised by local government officials. Some say the system does not meet industry standards that would allow any vendor to manufacture radio equipment eligible for purchase under federal grants

888. "fill in" frequencies

Yahoo group: CPMA
Date: 2008-02-02 17:45:43 UTC
From: worksntv@aol.com
Topic: 888 Message: 888

Remember I had some questions concerning the "fill in" frequencies being assigned to the state. Here is the apparent answer.

73'

Bob Reynolds
WB3DYE
AAR3BA/T\
==========
453.2125 MHz FB2100 Watts11K3F3E0.010453.4625 MHz FB2100 Watts11K3F3E0.010453.7125 MHz FB2100 Watts11K3F3E0.010453.8625 MHz FB2100 Watts11K3F3E0.010OK,

Take this with a grain of salt as I am going to do my best to convey my understanding of what this is about. Word of warning - I may be a little off.

As I understand the project, the Commonwealth is going to create talkgroups on the OpenSky system that are "perma-patched" into these VTac and UTac interop channels. In theory this will allow people operating on VHF and UHF legacy systems to have a gateway into the 800 MHz statewide project. These have been referred to as "legacy umbrella networks" at the meetings I have been to. As I understand it (IF I UNDERSTAND IT), someone in Phila on one of these channels (VTac for example) could then communicate with an OpenSky user down the street from them (the Open Sky user would need to be on the "patch" talkgroup) or communicate with another user on the VTac channel in Erie (as the VTac channel users will essentially be connected through the OpenSky network).

I hope I got this right as I don't want to be a rumor mill but I have explained it as best as I could given the explanation offered to me.

890. microwaves instead of telephone lines

Yahoo group: CPMA
Date: 2008-03-08 23:30:22 UTC
From: worksntv@aol.com
Topic: 890 Message: 890

I am posting this because in the Pa STARNET system most of the "cell" sites (used where high profile tower sites can not "see") are using phone lines for connections to the system.

73'

Bob Reynolds
WB3DYE
AAR3BA/T

The police department plans to select a vendor within 45 days for the new system, which will transmit via microwaves instead of telephone lines, police spokeswoman Laura McElroy said. The project will be paid for through federal, state and local grants, including about $6 million of homeland security money earmarked to improve interoperability among local public safety agencies, she said.
"I don't know if it would be foolproof, but it would be much less likely for something like this to happen," she said.

897. Just when you thought you had heard it all.....

Yahoo group: CPMA
Date: 2008-04-11 12:29:57 UTC
From: Ed
Topic: 897 Message: 897

I saw this on the Pro-97 list and need to vent a bit, I'm 43 I have been playing with scanners since I was 13 and thought I had heard it all.

I don't even know where I would start with this guy, but if I were buying a scanner, just as I would with a car, microwave, dishwasher, etc...I would have done a little research first on scanner basics.

I know the face of scanning has changed since trunking came along, and it isn't as simple as pressing: 33.100 ENETER anymore but come on (see the post below):

How do I know if local PD (etc.) is trunked or my area is in WIN97?
Posted by: "David Lord" dcl_subs@... dcl_ygroup
Thu Apr 10, 2008 1:50 pm (PDT)

Before I put out about $60 for the program and programing cable, I guess the first question is are "all" areas covered in WIN97. I am in eastern Berks County, PA (50 miles NW of Philadelphia).

Does WIN97 cover most users (public utility, PD, fire, ambulance, RR)? Broken down by type?

And how does one know if local systems are trunked? All the lists I have seen is usually just a list of frequencies.

And I guess I'd like to ask (to limit messages) - why can't I hear 39.400 (and a couple others in same range) on PRO-97 where my desktop PRO-2021 does?

Thanks,
Dave

Proprietary Shared Systems and Standards-based Shared Systems—Regional shared systems are the optimal solution to interoperability. While proprietary systems limit the user's choice of product with regard to manufacturer and competitive procurement, standards-based shared systems promote competitive procurement and a wide selection of products to meet specific user needs. With proper planning of the talk group architecture, interoperability is provided as a byproduct of system design, creating an optimal technology solution.

From: worksntv@aol.com
Topic: 905 Message: 905

They've had problems for several months. Chief Fred Scott said the problem is not limited to his force, as other nearby departments have made similar reports.
When the radios gave out during a May 31 emergency services drill at Shippensburg Area Senior High School, Scott and Moriarty decided they would wait no longer than July 1.
The radios gave out inside the school, forcing police to switch to their Nextel handheld units.
Moriarty was concerned for the implications of such a failure.
"We need to be able to talk with the corresponding departments and I need to be able to talk to the county in the event of an emergency,"

Senators Specter and Casey Announce Committee Approval of Pennsylvania Projects

Funding Is Contained in the Fiscal Year 2009 CJS Bill

Washington, D.C. - U.S. Senators Arlen Specter and Bob Casey announced the U.S. Senate Appropriations Committee has approved funding for several Pennsylvania projects. The projects are contained in the Fiscal Year 2009 Commerce, Justice and Science (CJS) Appropriations bill.

“This funding will have tremendous impact on local communities by enhancing safety through advanced law enforcement programs and promoting important scientific initiatives,” Senator Specter said. “I am pleased my Congressional colleagues have approved federal funding for these vital projects.”

"I am thrilled the Appropriations Committee has approved these projects for Pennsylvania," Senator Casey said. "I will continue to work with Senator Specter to fund economic development programs, law enforcement and violence prevention initiatives, and scientific research projects throughout the commonwealth."

The bill will now await action on the Senate floor and must be approved by the House of Representatives and the President of the United States before funding is final.

Pennsylvania projects in the bill include:

$500,000 for the Franklin County Emergency Services Alliance in Franklin County to provide interoperable telecommunications equipment to emergency responders throughout the county. This project, in conjunction with the county’s upgrades to its 9-1-1 Center, will improve operations and response times to emergencies, which have been hampered by incompatible radio communications between local and state entities.

$500,000 for Clarion County to implement, enhance and sustain an interoperable communications network among local, regional, and State public safety entities. The investment in radio communications technology and equipment will help meet the needs of first responder agencies in natural, man-made or terrorism-related incidents, while providing a direct link to all first responder agencies in the county and other counties in the region.

913. MORE ON MA/COM AND NYS

Yahoo group: CPMA
Date: 2008-09-21 19:49:35 UTC
From: worksntv@aol.com
Topic: 910 Message: 913

An electronics company called M/A-Com won the bid to build a system that would be tested in Western New York. The company has failed a series of tests there.
The most serious problem was that first responders lost stable contact when they left their vehicles. The portable radios they wear on their hips and shoulders are supposed to be able to repeat a signal to the car radio, but that connection does not consistently work, officials said.
Erie County intended to be a full partner in the SWN, but lost faith in it at the end of last year and decided to build a separate radio system

915. $10 billion public-safety voice and data network

Yahoo group: CPMA
Date: 2008-10-05 16:54:36 UTC
From: worksntv@aol.com
Topic: 915 Message: 915

A new Carnegie Mellon University research paper estimates that a public-safety voice and data network built through a public/private partnership would cost about $10 billion. The paper also noted that if the federal government’s Integrated Wireless Network (IWN) network could be extended and used for a nationwide public-safety network, the cost would be around $6 billion.

York County, Pa., plans to roll out its new Project 25 (P25) digital trunked radio system next month. The county conducted digital radio audio tests to determine how its new system is affected by specific noise conditions.

The county’s $68 million, multifaceted technology system and infrastructure project, which began four years ago, includes a new emergency services center; a fully functional, geographically redundant long-term backup facility (LTBF); CAD system; automatic number identification/automatic location identification (ANI/ALI) controllers; VoIP telephone system for administrative functions; UHF Project 25 (P25) T-band digital trunked radio system with full microwave connectivity; 22 transmission sites, complete with hardened climate-controlled shelters with full generator backup power; and a 16-site full simulcast digital alphanumeric UHF fire and EMS alerting system.

927. ENCRYPTION IN GA

Yahoo group: CPMA
Date: 2008-11-21 21:58:21 UTC
From: worksntv@aol.com
Topic: 927 Message: 927

The recent switchover to a digitally encrypted emergency dispatch system in Gwinnett County has drawn a veil of secrecy around police communications even as it has made transmissions clearer and more secure.
The $35 million Motorola P25 digital 911 system was paid for by SPLOST, the voter-approved 1 percent sales tax.
Static and interference typical on the old analog system have been virtually eliminated since the switchover happened Monday, said Angie Conley, the Gwinnett 911 center’s communications manager.
“It’s a whole lot quieter,” Conley said. “It’s like officers are sitting in the room with you.”
Problems with some dead zones also have disappeared, Conley said.
Previously, the areas near the Chattahoochee River in Peachtree Corners and behind Lanier Mountain in Centerville were notorious for bad or dropped transmissions.
The department opted to encrypt the system as an added safety feature for officers, said Gwinnett police spokeswoman Cpl. Illana Spellman.
“Clearly we don’t want to give away our advantage to someone who is going to break the law,” Spellman said. “The safety of officers is paramount.”
Yet the encryption doesn’t sit well with some police- scanner hobbyists.

From: worksntv@aol.com
Topic: 928 Message: 928

As a ham radio operator I was viewing with interest the following article.
http://www.cumberlink.com/articles/2...6296288300.txt

Part of your report said:
"once a vendor for the radios has been selected, the grant money will be released to pay for the equipment. He said the total estimated cost of the radio equipment needed will be about $1.7 million."

This may be a good time for a follow up article. There is ONLY ONE vendor that can be chosen. Ma/Com.

You see the system is county is using is "piggyback" on the state system. It's using a propriety (patented) format for voice transmissions. No other manufacturer can make the radios needed! The fire department can not put it out to bid and ask many manufacturers to submit bids! Why? They don't have the patent to make the Ma/Com system! That's good for Ma/Com, bad for taxpayers! There is a national standred, which has been endorsed by the federal government called Project 25. That is an open standard. If Cumberland County and the state were using that format only then could be radios be put out to bid.

Look at it this way. Lets say I had a radio/TV station on the air and decided I was not going to use the national standard for transmission and patented that system. If people wanted to watch/hear my station---they would have to buy a TV/radio from ME!!!!!

Best Regards,

Topic: 929 Message: 929

I would like to thank the owner/moderators for allowing me to post this notice. I'm attempting to recruit writers in the Central PA area to help support the Scanner Digest Newsletter. Many interesting posts have been listed here on this group so naturally a notice to this select group makes sense.

Open letter from the publisher of the Scanner Digest Newsletter -

Just curious if there are any communication buffs out there that would like to provide scanner-related information, frequencies and photographs as a regional column editor for our publication. Our all-volunteer staff submits insightful topics on various radio communication systems in their respective geographical area. Popular topics in public safety law enforcement, fire, EMS as well as aircraft, business, utilities and amateur radio are covered.

Our publication is produced in an easy-to-read PDF format and is distributed free via email. Past issues of our newsletter are available from our website.

www.ScannerDigest.com

If we've peaked your interest regarding submission of material, please contact us directly at: ScannerDigest@... for consideration.

If you interested on being placed on our distribution list, email us at the address below and indicate "subscribe" in the subject line.

Thank you for your time and consideration.

934. AURORA II and MA/com: disappointment

Yahoo group: CPMA
Date: 2009-01-10 17:15:16 UTC
From: worksntv@aol.com
Topic: 934 Message: 934

AURORA -- Last month, city leaders selected the Virginia-based M/A-Com company to build the city's new $16 million public safety communications system, which they hope to have ready when the new police station opens in January of 2010.

But some of those same leaders now say they wish they had been better informed about M/A-Com's track record in New York before voting on the project, which would replace the current police, fire and emergency management radio system.

M/A-Com, a division of Tyco Electronics, was contracted in 2005 to build a $2 billion statewide wireless network in New York. The first phase of that network was meant to cover two western New York counties and was to be completed by December 2006.

ALBANY -- The company seeking to build a $2 billion statewide emergency wireless communications system has ratcheted up its threats to sue New York State if it is not given the go-ahead to build the network beyond Erie and Chautauqua counties.
M/A-COM, growing frustrated by the delay in a decision from Albany whether to expand the system statewide, fired off a lawsuit-threatening letter to top state officials Friday, warning of the legal ramifications if it does not get the broader contract to build the system in the rest of the state, according to several sources.
M/A-COM and the Paterson administration declined to provide a copy of the letter.

When they pick up the emergency message on the police scanner in Daryl's truck, the two join the rescue efforts, hoping to be able to put to use the zodiac inflatable boat that Daryl happens to have on a trailer on the back of his truck. But, when they reach an access point where they can launch the inflatable, Daryl is badly injured when the boat falls on his arm. With her uncle being cared for by a passing motorist, Petra decides that she must carry out the rescue attempt on her own. She gets the boat into the icy waters and heads out into the river in search of the missing boys.

This year, Pennsylvania expects to finish building a $368 million radio system -- a process that has dragged on since 1996 -- even as New York last week killed a similar system over questions whether it will work.
Some Pennsylvania lawmakers also say the technological advances of the past 10 years may have made the system for emergency responders, which is now in partial use, obsolete.
"It's never acceptable for any public-safety project to take 10 years," said state Sen. Kim Ward, R-Westmoreland, who serves on the Communications and Technology Committee and the Veterans Affairs and Emergency Preparedness Committee

Kansas City Council members last week urged the city staff to continue pursuing a public-safety radio upgrade — and said they would figure out how to pay for it later.
“It’s a critical need,” said Councilwoman Deb Hermann, chairwoman of the council’s Finance and Audit Committee.
Assistant City Manager Rich Noll told the council Thursday that radio towers and other critical infrastructure are aging and system failures pose a grave risk to firefighters, police and the public they serve.
The cost of the improvements to eight radio towers and other equipment is expected to run about $30 million to $35 million.

A lawsuit filed Monday on behalf of law enforcement officers across York County demands a return to the old 911 radio system while glitches with the new system are fixed.
The lawsuit alleges that communication problems with York County's new, $36 million 911 system are a public safety hazard and are putting law enforcement officers at risk of injury or death. It also complains of inadequate training and problems with a computer-based system used to dispatch officers.
The lawsuit asks the court to prevent the county from continuing to use the new 911 and dispatching system until the problems are resolved and the proper training is provided.
County officials, meanwhile, say they are diligently working to resolve the problems. Bistline said he believes the significant problems should be fixed by next week

From: worksntv@aol.com
Topic: 947 Message: 947

York County President Commissioner Steve Chronister said the majority of the problems with the new 911 communications system are software-related.
But, the blame can be spread around a little, he said.
"There's also a user problem," Chronister said.
Chronister said he spoke with a M/A-COM representative who accompanied a police officer on a patrol last week and found that the officer didn't hear York County 911 while answering a domestic dispute call -- because he had turned down his radio.
York City Police Detective Bob Pace, who is also vice president of the White Rose Lodge 15, disputed this, saying the radios have been confusing to operate.
"It's got all the bells and whistles, but sometimes simple works just as well," he said. "Pushing a button and getting someone to answer you on the other end is not hard. . . . They give you a Cadillac with every single option, but you don't need all those options."

From: worksntv@aol.com
Topic: 949 Message: 949

York County officials believe that glitches with the county's new 911 radio system largely have been solved for local police officers, and system vendor M/A-COM is soon expected to focus on fire companies and emergency medical services.
"The process from here on out should be a lot smoother," Commissioner Chris Reilly said Wednesday.
So far, county administrator Chuck Noll said, tests with the mobile radios in police officers' cars have yielded good results. Problems with the portable radios carried by the officers were fixed last week, according to the county.
Now M/A-COM must upgrade software and reprogram radios for the county's fire departments and emergency medical services.
"We think we're in good shape, and we look forward to rolling it out to fire services." said Steve Frackleton, spokesman for the Lynchburg, Va.-based company.
Frackleton declined to say when the upgrades will be finished

From: worksntv@aol.com
Topic: 951 Message: 951

Firefighters, fire police and emergency medical personnel could begin transitioning to York County's new 911 radio system in a few months.
The county, its radio vendor and a consultant have developed a new schedule for the 911 radio project after communication problems prompted delays.
With the system apparently working better, the goal is to have the project wrapped up in October, said York County Emergency Services Executive Director Eric Bistline.
That would put the project 12 to 13 months behind the original schedule.

953. more difficult for different agencies to standardize their communications

Yahoo group: CPMA
Date: 2009-03-07 16:54:57 UTC
From: worksntv@aol.com
Topic: 953 Message: 953

Further examination of the article reveals that M/A COM appears to be using proprietary hardware in the system, thus making it more difficult for different agencies to standardize their communications equipment. Indeed, the whole point of communications interoperability is to allow common communications among various agencies. While this might mean purchasing common equipment, it does not necessarily mean that proprietary common equipment is required.

Hard to believe. Tyco is promoting P25 as the best thing since sliced bread yet Pa continues to install Open Sky in Pa--which will NOT work with any other manufacturers systems.
Bob

“Not only are we pleased to show that the Tyco Electronics Wireless Systems’ radios operated successfully within the P25 requirements, but we are delighted the industry is working together to advance interoperability,” said Paul May, business development manager, Tyco Electronics Wireless Systems. “The results of the testing further prove that Tyco Electronics Wireless Systems’ P25 enabled radios work with other manufacturers’ P25 communications systems. This testing effort should help America’s first responders identify the extent to which interoperability both increases their ability to serve, and, through open competition, lowers their operational budgets.”

New York state terminated a $2 billion contract with Tyco Electronics M/A-COM for a statewide wireless network (SWN) because the state was seeking financial relief during a time of unprecedented budgetary deficits, not because the land mobile radio, or LMR, system failed to operate as contracted, M/A-COM claims in a lawsuit against the state.
Made available to Urgent Communications last Friday, the litigation — filed in the New York State Court of Claims on Feb. 13 — also alleges that testing of the initial buildout phase of the SWN project was executed poorly and was largely inappropriate, because the tests targeted portable-radio functionality on a system that was only contracted to provide mobile-radio coverage. In addition, M/A-COM claims that the state ignored its independent consultant's findings that the system worked properly in three of the 19 areas cited by the state as being deficient

960. Fwd: Reply to thread 'Oakland County M/A-COM OpenSky TRS'

Yahoo group: CPMA
Date: 2009-04-18 13:34:50 UTC
From: worksntv@aol.com
Topic: 960 Message: 960

This thread is located at:
http://www.radioreference.com/forums/michigan-radio-discussion-forum/90933-oakland-county-m-com-opensky-trs-new-post.html

Here is the message that has just been posted:
****

---Quote (Originally by Wyandotte)---
For the fourth time, I call on the RR members in Oakland County to take this and run with it. Get a letter in the Oakland Press, use the info Thunderbolt posted as a starting point, along with all the other postings, and show Oakland County residents how, in this econoinic downturn, your county is wasting taxpayer dollars on a unproven, unreliable, highly costly, and severly problematic radio system.

Carry on how the MSPSC system, (which you can hear), is the greatest thing to hit the airwaves since Marconi tickled the ether with his longwave. Sure you may be doing more baffle than dazzle, braggin on the MSPSC system. But fight, Fight, FIGHT to get a radio system you CAN hear.

You need to tell John Q. Public, through the Oakland Press. Don't write a letter to the sheriff or L. Brooks, or the County Board of Commisioners. They are the ones that approved spending millions so far. Do think really they are going to acknowledge, after all the money spent so far, they were wrong? That would not be politicallty correct. They may lose the next election that way.

I know there will be a reply or two to this post, saying how OpenSky is working just fine somewhere. And I'm sure there have been many sucessful implementations. So what? All I read about on here is Oakland County residents (and others) whining because they can't, or won't be able to hear the new system. Well, you have a golden opprotunity, right now, to park the tears and actually do something about it.
---End Quote---
I'm afraid all of the hand wringing about Open Sky in Oakland County continues to ignore several points:

- The contract with M/A Com was signed years ago (long before our current economic climate). Even IF the county wanted to back out of Open Sky today, they would be found in breech of contract in the subsequent litigation (i.e., law suit) and still liable (i.e., responsible) for the money. Remember too, M/A Com spent huge money out of pocket when this project was begun - money that would not be recouped until AFTER completion of the various stages. Do you really think M/A Com would just walk away and sulk after taking such a hit? I think not. Oakland County would be dragged into court

almost immediately and bogged down there for the next few years. Tell me that wouldn't be expensive.

- Do you even know how the Open Sky system in Oakland County is funded? Tell you what.... we'll get back to that.

- The infrastructure is already in place; 36 towers and miles and miles and miles of interconnecting data lines. The radios continue in production and delivery.

- Those who insist the MPSCS is the greatest thing since "Marconi tickled the ether with his longwaves" (????) and THE way for the county to go (just so scanner listening won't die in Oakland County) are forgetting the fact that local police and fire departments don't want their communications system to be under the thumb of the Michigan State Police. The OakWin program will permit a great deal of autonomy for individual public safety agencies, while allowing interoperability (including with MSP). The great and powerful Oz (MPSCS) is not spectrum efficient and not capable of carrying all of the police, fire, EMS, and hospital traffic in Oakland County given the number of frequencies available and the number of users. MPSCS would NOT be free, either. Do you really think MSP would supply a complete MPSCS system to every police, fire, EMS provider, and hospital for free???? Please. They're in worse economic straights than General Motors. Either way, the county pays. Better to !
pay for something you'll own and control.

- Has Open Sky had its share of problems? You bet. But, given the available spectrum and the demands for interoperability, new technology is badly needed. Do you remember cell phones 10 - 15 years ago? Who would even think about going back to that system? Look what new wireless phones can do: enable a conversation, texting, surfing the web, checking your e-mail, and taking photos of your trip and sending them to relatives on the other side of the country. The explosion of cell users and finite frequencies available demanded new systems and new equipment. Somehow, humanity survived that step in evolution. Fortunately for our generation, a couple of bicycle makers in Dayton, Ohio, decided to try something new a hundred years ago, instead of staying with "the greatest thing to tickle the cobblestone since the horse-drawn buggy."

- Some would say Open Sky is the county's way of keeping scanner listeners from hearing what's going on. To those people, I would say, "Get over yourself." Were that the case, a basic county-wide encryption system would be far more inexpensive than a completely new radio system. The fact that the Open Sky algorithm cannot be scanned is an accident; M/A Com had to come up with something new given the requirements placed before them. After years of research and development on this system, do you really think they'd just hand it over to scanner manufacturers AND (subsequently) other competitors? Why do you think Microsoft's products aren't open source? Answer: they don't want to do all of the work for competitors who'll make money off of that labor. Makes sense to me. Sorry, guys. That's how smart business is run.

- The suggestion that everyone start writing the Oakland Press in protest of Open Sky is laughable, but quite apropos . Firstly, newspaper readership and subscription in the United States has suffered a sharp decline since cable news and the Internet (over 20 years now). Newspapers are to the electronic media what most legacy radio systems are to newer available technologies.

- Now, back to how Open Sky in Oakland County is financed. Here it is:

"1) A monthly statewide 9-1-1 surcharge of .18 cents will be placed on the monthly billing of 'all communications devices.' (MCL 484.1401a [1]-[7] and MCL 484.1408 [1]-[3]). This surcharge is to be remitted to the Michigan Department of Treasury.

The above is a tax enacted by LANSING on each cell phone, fax line, and land line phone you have. Oakland Country DID NOT just add a tax, contrary to popular (and sadly mistaken belief). Oakland County has elected to use this incoming tax revenue to fund the new radio system. Okay, that's 18 cents a month on each of your communications devices. This is money that would be going to your local police / fire agencies ANYWAY. The OakWin coalition members have taken their share of those funds and contributed them to the new system. Do you want to cut off funding for OakWin? Fine. Get rid of your cell phones, your home phone, fax lines, etc. In my circumstance, I pay $6.48 A YEAR for three phones. How much do you spend on just one Starbucks? A pack of cigarettes? Beer? MP3 downloads for your $200 iPod? A ticket to the Wings / Pistons / Tigers? Gas for your snowmobile?

Go ahead and flame me. It won't change the facts.

By the way, as of Tuesday, April 14, 2009, another police agency flipped the switch.

Date: 2009-04-18 15:31:20 UTC
From: worksntv@aol.com
Topic: 961 Message: 961

Increasingly, the county has been under pressure by police, fire and other emergency service providers to fix the problems with the new, $36 million 911 radio system.
Workers from system manufacturer M/A-COM and parent company Tyco Electronics have been working out glitches, Bistline said. The known glitches include lost or garbled transmissions.

Controversy is swirling around the city of Cleveland's (Ohio) radio system after the local newspaper revealed that officials there used $2.3 million from a homeland security grant to buy a Motorola radio zone controller last year, locking the city in to only Motorola gear for a future upgrade. The Plain-Dealer story also pointed out that the city didn't make certain parts of their upgrade Request for Proposal public, nor are they encouraging bidders to visit existing radio sites and comm centers. The entire effect of the story is to suggest that Motorola has blocked other potential bidders from bidding, and for less money. Read the story and the interesting reader comments here

964. subpoenaed records involving a top lobbyist

Yahoo group: CPMA
Date: 2009-05-02 17:42:55 UTC
From: worksntv@aol.com
Topic: 964 Message: 964

ALBANY - State investigators have subpoenaed records involving a top lobbyist with close ties to Assembly Speaker Sheldon Silver, the Daily News has learned.
Attorney General Andrew Cuomo's subpoenas cover companies that have won state contracts using Patricia Lynch Associates as their lobbyist, sources said.
Lynch was a longtime communications director for Silver and has created one of the biggest lobbyist firms in the state.
The subpoenas were sent to the state controller's office.
"We are cooperating with the attorney general's office," said controller's office spokeswoman Jennifer Freeman.
The records sought include those for Cablevision/Madison Square Garden, Disney, City of Yonkers, Destiny USA, First Albany, Port of Albany and Accenture.
Also sought are records on Long Island Power Authority, Erie County, InsCap, M/A Com-Tyco, Macquarie, Markstone and M&T Bank.
Some are current clients of Lynch's firm. Others are past clients.
"He's looking to see if the [Lynch] firm had any undue influence on the contracting process," a source said.

From: worksntv@aol.com
Topic: 968 Message: 968

In other parts of the country, the digital radios–manufactured by Harris Corp.–have caused problems.

Earlier this year in New York, officials terminated a $2 billion contract with M/A-COM to build a statewide public safety radio network, citing the system's failure in numerous operational tests. The company has filed a lawsuit against the state for backing out of the contract, claiming New York officials were seeking financial relief during budgetary deficits.

In Milwaukee, the police department's neighborhood task force still was reporting problems with the company's radios six years after purchasing the system, according to local news reports. Milwaukee police spokeswoman Anne E. Schwartz said in an e-mail that the system "is still a work in progress for our department."

At a 2006 firefighters association meeting in Lebanon County, Pa., one firefighter said he found M/A-COM radios did not always function inside buildings. That raised the possibility that a firefighter could be stranded with no way to call for help, The Lebanon Daily News reported.

"I am not bringing body bags out on a watch of mine over any radio system," said Chief Paul Longenecker of the Annville Union Hose Fire Co., according to the paper.

Bob

Yesterday, Harris Corporation announced that its VIDA® network and OpenSky® technology were used successfully as the communications backbone for the recent G-20 Summit in Pittsburgh.
The Commonwealth of Pennsylvania’s STARNet system, which was built with Harris Corp. technology, allowed federal agencies, state and local police (as well as with Allegheny County, the city of Pittsburgh and emergency medical personnel) to work together, using a single communications tool. The PA-STARNet system processed more than 100,000 calls during the G-20 Summit, according to the Pennsylvania Office of Public Safety Radio Services.

I see that York County is petitioning the FCC
(http://wireless2.fcc.gov/UlsApp/ApplicationSearch/applMain.jsp?applID=5239479), to grant them an STA,
so they can upgrade their system and add more tower sites. Very interesting
letter to the FCC
(https://wireless2.fcc.gov/UlsEntry/attachments/attachmentViewRD.jsp?applType=search&fileKey=183724005&attachmentKey=18492135&attachmentInd=applAttach), explains this in greater detail. I wonder who is
footing the bill for this upgrade? Nonetheless, I see they filed under the PW
(conventional) section, rather than the proper trunking section with the FCC.
I hope this is not a mistake, as the FCC will reject this and the other
pending applications.

Topic: 980 Message: 980

Hi there... I am new to this site and have been reading many of the post. I apologize if this a repeated question but I am new to the new scanner/radio frequency specs.

I am a scanner enthusist, retired from fire & EMS in south central PA. With the "new digital" radio systems my understanding the "old" style Bearcat/ Uniden scanners will not pick up even a dispatch much less enroute, on scene, etc. police/fire/ems radio transmissions. Are there new "scanner types" that the public can buy to continue to scan and do you know how pricey they are?

I am ignorant to how the changhes to digital affect the old scanner as I do not understand frequencies UHF/Digital/analog... Anyone feel up to teaching a new to this era radio situations in south central PA - i.e. York County7 and Northern Marylnd Harford County.
Many Thanks!!
Dee

First, the county and M/A-COM, the Lynchburg, Va., company hired in 2000 to create a new 800 megahertz system called OpenSky, decided to part ways.

"We didn't like where it was going with cost or coverage or penetration of buildings," explained Scott Martin, chairman of Lancaster County's commissioners and the board's liaison to public safety groups.

The commissioners terminated the M/A-COM contract in 2008 after spending $13.8 million on the system.

That expenditure for 32 radio towers and other communications equipment was not wasted, county officials have noted, because the towers and equipment will be needed for any new radio system

Pa. County Readies New Communications System

By JIM HOOK
Public Opinion (Chambersburg, Pennsylvania

Franklin County's $6.9 million 911 dispatch system has passed muster, and will see use later this month.

Police departments will be the first agencies to switch to the new emergency communications system, according to county Emergency Services Director David Donahue. Municipalities will follow later this month. Fire and ambulance companies will begin moving over in February. The transition will continue over the course of a year.

The county tested the ultra-high-frequency system in November and found that a responder can communicate with a handheld radio in 99 percent of the county. The current low-band system has just 82 percent coverage. Mountains and buildings can block radio transmission and reception.
The system will allow first responders from various agencies to communicate directly with each other at the scene of an emergency. The system also passed tests patching communications between police officers and volunteer responders and between Franklin County first responders with first responders from neighboring counties.

"The new system has greatly improved our ability to communicate with responders in the field," said Bryan Stevenson, Franklin County Communications Center coordinator, "and will greatly improve the safety of emergency responders and the community."
The county will broadcast off frequencies between 450 and 512 megahertz, Stevenson said.

Citizens wanting to listen to fire and police calls will still hear the original dispatch on their old scanners, but will need equipment with digital trunking to follow the action, according to Stevenson. A compatible scanner costs about $500.

The county has also prepared trainers from local agencies to train their own personnel in the use of the radios, according to Donahue. Training is to be conducted annually.

The new radios are more akin to the latest cell phones than old-style walkie-talkies, according to Donahue. The radios can access the Internet and have appointment calendars.

"The ultimate measure of the project's success will be in lives saved," Commissioner Bob Ziobrowski said. "Our citizens are safer because of their investment in this radio system."

The coverage area exceeded the performance standards in all areas of the contract with Motorola.

About a dozen county employees traveled across the county to test reception in a grid of blocks, ranging in size from a square mile in rural areas to 1/16 square mile in towns. They were able to access and test in 84 percent of the blocks (7,575 of 9,029 blocks). The others were too remote.
Of the blocks tested, 99.8 percent have acceptable coverage using hand-held radio. Just nine blocks failed, notably one in the Borough of Waynesboro and three in the mountains -- one at the Maryland line in Warren Township and two at the far north end of Fannett Township.
More powerful radios in fire trucks and other vehicles have coverage in those dead zones where hand-held units failed, according to Commissioner Robert Thomas.

Local agencies were invited to witness the testing, Donahue said.

The county began the project in 2003 to improve 911 communications. Commissioners borrowed $4 million in 2004 to finance it. The Federal Communications Commission was overrun with requests for use of ultra-high frequencies. The county had counted on a UHF signal, but eventually was assigned to former television broadcast frequencies.

The cost of the system jumped from $2.7 million to $6.9 million, even after Motorola, the county's contractor, offered the county a special deal in making the change.

Many police, fire and rescue agencies spent millions of dollars to purchase radios programmed to operate on UHF. Commissioners agreed in September to compensate them for $415,000 to reprogram 383 radios for use on the final system.

The county also moved the 911 center from the courthouse basement to a renovated building in the Cumberland Valley Business Park. Five towers were constructed, bringing the total to seven.

The successful completion of the system is "a testament to the hard work, planning and cooperation of numerous public and private organizations," Commissioner David Keller said.

So work took me to the Harrisburg area today, and a pit stop at Arby's off of Progress Avenue for lunch on our way to afternoon training.

Well who do I manage to run into than our own Dave Bennett! Great to see you Dave, if only for a brief conversation. Now this was after seeing Steve Busch at work that morning, so I guess I kinda had a CPMA day today!

So how's everybody esle? Steve? Mike? Dave from Lancaster? Are you guys still reading messages on here?

Greg

Good to hear from you! I was wondering how everyone was doing. Work
has kept me busy.
I do some hiking from time to time. I been to Pine Grove Furance state park
for some hikes.
I also done some local hikes on the AT.

Not much to listen to on the scanner up here so I spend some time with the
ham radio stuff.

I was in York in early December. I last saw Mike back in the summer.
Dave lives about a mile from me.
We should try to get together one day this summer. Maybe have a cookout
for old times sake.

Steve

Steve,

I'v been looking to do a little hiking on the AT myself.....let me know if you're ever looking for someone to tag along!

Hi Chris,

What area do you live in? When it warms up I like to get back out. I been wanting to do sections from the MD line to Boiling Springs

It was great to see you too Greg. I don't usually go to that Arby's. But I just happened to pick a time when you were there.
